BL dismisses 13 'infiltrators' at Cowley car plant

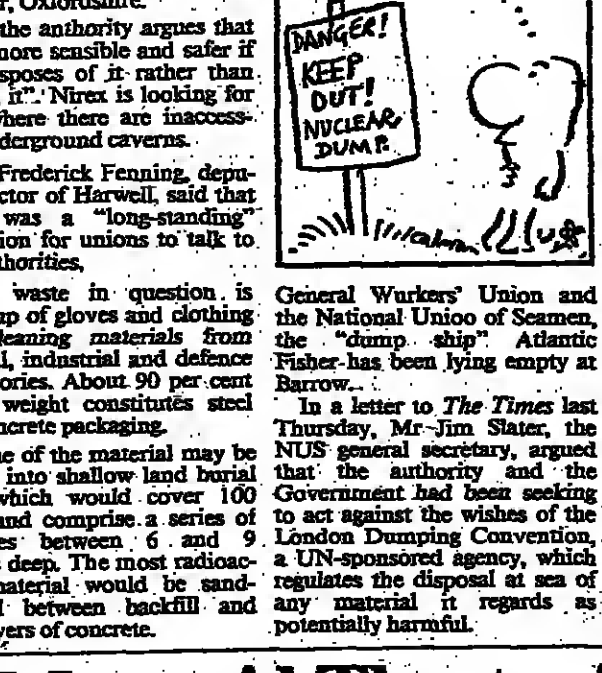

By Barrie Clement and Clifford Webb British Leyland yesterday dismissed 13 alleged political activists said to have lied in job applications in order to infiltrate the shop floor at the company's Cowley assembly plant in Oxfordshire. The six women and seven men, who plan to appeal today against the decision, are thought by the company to be Trotskyists belonging to the International Marxist Group. It is believed they were informed on by fellow workers on the assembly lines of the new Maestro car, who noticed their unusually good knowledge of union affairs. The company checked the workers' application forms and found 13 of them contained information regarded as deliberately inaccurate. The 13 were originally suspended under the company's disciplinary procedure. A further six workers suspected of belonging to the same group are understood still to be working at the plant. Their application forms were in order and the company is proceeding on the basis that only those who gave false information are guilty of breaching company rules. One more alleged activist who is off work because of illness is to face disciplinary procedure. One of the dismissed staff is a young woman who, in applying for a job as a track worker, declared that she had three O-levels and three CSEs. British Leyland says that it discovered that she had four A levels and a political science degree. Company administrators also wrote to the referees listed by some of the applicants as previous employers and received genuine-sounding replies. But checks revealed that the references were forged; addresses were private homes where businesses did not operate. Company names given on the application forms were not registered at those addresses, according to a letter which all hourly paid employees will receive today from Mr Doug Dixon, the plant director. Mr Dixon's letter adds: "This deliberate provision of false information does not represent a genuine mistake. Neither does it represent an innocent attempt to get a job." He said that all 13 had signed statements saying that they accepted that incorrect information could lead to dismissal; almost all of the 13 had admitted giving false information. The alleged activists had submitted their forms in May last year before starting work among 1,000 workers required to produce the Maestro car. BL investigators are understood to have been alert for some time to the activities of a group of Marxists intent on working their way into important trade union positions on the shop floor at Cowley. According to shop stewards, the newcomers joined one of the Factory's branches of the Transport and General Workers Union, attended meetings and became involved in branch affairs. Their immediate interest in, and knowledge of, union matters led to speculation that they belonged to an ultra left wing group trying to infiltrate the local union. Six of them became shop stewards. One steward said: "Some of these people have been bragging about the way they got into the factory. All the signs point to someone putting the finger on them and telling management." The transport union recently asked for one newly elected shop steward to be officially recognized by the company requests which normally lead to a cursory examination of personal records. Mr David Buckle, the union's district secretary, said: "I cannot imagine that a request for credentials would prompt an investigation as expensive as the one now going on." He refused to comment on the company's decision. He will be involved in the employees' appeal against dismissal which begins today. Mr Buckle said earlier: "With unemployment at its present level it is not surprising that in their desperation to find work, people give false information."

Search for caves as nuclear dump sites

By Barrie Clement Labour Reporter Nuclear waste may have to be dumped underground in Britain after action by three transport unions to stop it being disposed of at sea. A search for dump sites is being undertaken by the Nuclear Industries Radioactive Waste Executive (Nirex), a wing of the United Kingdom Atomic Energy Authority. The location of 'potentially' suitable sites will be decided this autumn when the authority will seek planning permission. A spokesman for the authority said: "The waste exists and something had got to be done with it. If one disposal option is closed we have got to find others." The "low grade" radioactive material concerned is now being stored in buildings at the authority's sites in Winfrith, Devon, and Harwell, Oxfordshire, and at the Ministry of Defence establishment at Bicester, Oxfordshire. But the authority argues that it is "more sensible and safer if one disposes of it rather than storing it." Nirex is looking for sites where there are inaccessible underground caverns. Mr Frederick Fenning, deputy director of Harwell, said that there was a "long-standing" invitation for unions to talk to the authorities. The waste in question is made up of gloves and clothing and cleaning materials from medical, industrial and defence laboratories. About 90 per cent of its weight consists of steel and concrete packaging. Some of the material may be tipped into shallow land burial sites which would cover 100 acres and comprise a series of trenches between 6 and 9 metres deep. The most radioactive material would be sandwiched between backfill and two layers of concrete. Possible sites include clay outcrops which run across England from the south-west coast through the Midlands to the Wash and the Humber. Some of the waste might be too "high grade" for such a repository or might have a longer radioactive life. This would be dumped in subterranean caves. The material was originally due to be disposed of 500 miles from Land's End starting on July 11. But because of action by the Associated Society of Locomotive Engineers and Firemen, the Transport and

Hattersley rank and file appeal

By John Winder Mr Roy Hattersley, MP, will next week appeal direct to the rank and file membership of the Labour Party. In his attempt to win the leadership of the Labour Party. In a speech at Leicester on Monday he is likely to direct his words especially to the members of unions who have been asked to ballot for their choice among the various candidates for leader and deputy leader. Mr Hattersley, like his main rival, Neil Kinnock, MP, is seeking election to either post. In his speech, Mr Hattersley may be expected to point out that at the general election Labour had urged control on prices, dividends and profits but had not said much about how those profits should be invested. Mr Hattersley has long been a supporter of a national minimum wage and some in his camp believe that the party's commitment to it in the manifesto was weaker than it might have been, partly because the biggest union, the Transport and General Workers' Union, is opposed to it because it is against any incomes policy. His appeal to the union membership is seen by his supporters as crucial to his campaign. A further development in the Labour leadership campaign yesterday was a letter from Mr Neil Kinnock to Labour Weekly, published by the Labour Party, strongly supporting consultation of the rank and file membership of constituency Labour parties in arriving at a decision on whom to support in the leadership elections. He complains in the letter that hints in the Press that he was opposed to a wider franchise had never been backed by evidence.

Mermaid Theatre is put on the market

By Christopher Warman Arts Correspondent The Mermaid Theatre, founded by Lord Miles more than 20 years ago, has been put up for sale by the theatre's trustees after failing to solve the financial difficulties which have beset it since reopening in refurbished premises in Puddle Dock, Blackfriars, in 1981. Lord Miles said last night that he was distressed at the decision and criticized the Corporation of the City of London for not providing more help. He said that over the whole period the corporation had given an average of £5,000 a year, ranging from £1,000 at the beginning to £8,000. Lord Miles said he still had hopes that the theatre might be saved but he believed his connection with the Mermaid had ended. "There is no room for my wife and me now. The professions are broken in and there is no creative energy there. It is not the sort of theatre I would want to confine in." The Mermaid's reopening production, Eastward Ho, proved a disaster and lost £80,000, while an appeal for £1m to put the theatre on a solid financial basis raised about £350,000. Recently the theatre has had to bring in productions, including Children of a Lesser God and Trafford Taxi. These succeeded in keeping the theatre open after a period of "darkness" but have made little impact on its deficit. Lord Miles and his wife invested £10,000 in one production and cut their salaries to save costs. He is at present appearing at the Yeoman Armes Theatre, Guildford, in The Cherry Orchard, which is scheduled to come to the West End in the autumn. Trafford Taxi is to close on August 20, when the theatre will be temporarily let to Riverside Studios for a production of the Engage O'Neill play, Moon for the Misbegotten.

Honoured for bravery: Mr Peter Gurney (top) and the late Mr Kenneth Howorth.

Bomb disposal men get top award

By Stewart Tendler A Scotland Yard explosives expert who defused a Provisional IRA bomb in London despite the knowledge that a similar device had killed a colleague minutes before is today awarded a bar to the George Medal he already holds. Mr Peter Gurney, aged 52, is named in a list of civil gallantry awards published in the London Gazette. The colleague who died, Mr Kenneth Howorth, is awarded a George Medal posthumously. The list also includes the award of a George Medal to Constable David Browning of the Royal Ulster Constabulary for gallantry in Northern Ireland. The awards to the two explosives experts follow a bombing attempt on shops in Oxford Street, central London, in October, 1981. A warning of the bombs was given and the two men, both former members of the Royal Army Ordnance Corps, were called to the scene. They faced bombs which were apparently due to explode 30 minutes after the warning. Mr Howorth, who was aged 49 and married with two children, went into an evacuated Wimpy Bar to deal with two packages in a lavatory. It Continued on back page, col 1

Entertainment ousts religion on ITV

By David Hewson Serious Sunday night religious programmes on independent television are to make way for light entertainment in order to enable the commercial channel to compete more evenly with the BBC. The move has incensed many church officials. In three weeks the programme slot between 6 and 6.30pm, frequently occupied by LWT's Credo, will be moved to 2pm on Sundays for an experimental period of a year. The Sunday evening hymn programme at 6.45pm will be unaffected. Seven years ago, the BBC moved its equivalent serious religious programme, and has been attracting large audiences with its holiday programme and The Antiques Roadshow at 6pm on Sundays. The Rev Donald Reeves, Rector of St James's, Piccadilly, who recently retired from CRAC, said: "There seems to be an enormous loss of confidence among religious broadcasters at the moment. The fact that they cannot make programmes which will stand up to Arthur Negus I find really distressing."

Test cricketer seeks asylum in Britain

Aftab Gul, the former Pakistan test cricketer, said yesterday he had applied for political asylum in Britain because he faced a death sentence on trumped-up charges if he returned home. Pakistan's military Government said last month that two Sam7 ground-to-air missiles were found in his home in Lahore and accused him of being a member of the clandestine Al-Zulfikar guerrilla group. Mr Gul, aged 37, a lawyer who played six tests for Pakistan between 1963 and 1971, was in Britain when the Government reported finding the arms cache. He told a press conference in London that if any missiles were found at his home they were planted there by Government agents. "It is an attempt to frame me." He had never been connected with Al-Zulfikar. He said the Zia regime was using fabricated charges to victimize his family.

Druze hand over ministers in Jumblatt castle

From Robert Fisk, Beirut President Amin Gemayel of Lebanon retrieved three of his ministers from the hands of Druze gunmen yesterday at the price of his credibility and a ceasefire that is unlikely to last more than 24 hours. After a morning of fierce artillery battles around the capital, the Druze militias who had abducted the three men on Wednesday night surrendered them to the Israeli Army in the hall of Mr Walid Jumblatt's stone castle in the Choni mountains in condonados of near force. There are those in Lebanon who are kidnapped and never live to tell the tale. And there are those who talk long and hard to their heavily-armed captors and then insist that they had never been kidnapped at all. A third of President Gemayel's Cabinet clearly fell into the second category. Indeed, the three ministers insisted that they had merely been guests at the gloomy castle of Moukhtara. Their Druze captors, who had earlier demanded the resignation of Mr Gemayel's entire Government - including his secret service chief - in return for the ministers, then claimed that nothing was further from their minds. The destruction of the Gemayel Government was merely the condition that would have to be met if the Druze were to stop bombarding Beirut airport with missiles. Mr Jumblatt himself, comfortably ensconced in Damascus, was unaware that his gunmen had released the prisoners. Lebanese Government officials subsequently claimed that the Israelis had themselves initially refused to free the men unless they agreed to have their photographs taken next to some Israeli officers, a condition which the ministers are said to have rejected. They eventually returned to Beirut in the company of Mrs Kholis Arsalan, a member of the Jumblatt clan but the wife of Mr Jumblatt's rival among the Druze, escorted by armed Lebanese security police. The three men - Mr Adel Hamiyeh, Minister of Finance; Mr Pierre Khoury, Minister of Public Works; and Mr Adnan Mrowa, Minister of Labour - had called on Wednesday night at the village of Baadaran to discuss the nine months of Druze-Christian fighting with Shaikh Muhammad Abu Shakra, a Druze spiritual leader. They were abducted at gunpoint outside his home and taken to Moukhtara - "it was suggested that he went there for the night", one of the ministers ventured discreetly - and it was the white-bearded prelate himself who negotiated their release from the castle yesterday. Israeli troops and plain clothes security agents of Shio Beth - all wearing dark glasses - escorted the ministers from the castle and then placed half-track Continued on back page, col 3

Chad admits fall of Faya-Largeau

Njamena (AP, AFP) - The Chad Government of President Hissene Habre yesterday admitted that the strategic northern outpost of Faya-Largeau had fallen to Libyan troops and rebels backed by waves of jet bombers, Soviet-supplied heavy artillery and T-62 tanks. Western military sources, with access to satellite reconnaissance information from the combat zone, said Faya-Largeau fell at midday on Wednesday to the first unopposed intervention of Libyan troops in the latest phase of Chad's 19-year civil war. The Information Minister, Mr Soumaila Mahamat, said Government forces had set up defensive positions 4.5 miles west and 11 miles east of the settlement, which controls all routes from Libya to the capital, Njamena. The Western sources, insisting on anonymity, said the bulk of Mr Habre's estimated 5,000-man Army had been isolated in the outpost 500 miles north of Njamena almost since it was captured from Libyan-supported rebels on July 30. A Chadian Embassy spokes- man in Paris said Mr Habre's soldiers had departed in small groups to "limit losses from raids by the Libyan Air Force". He said the Government troops had not suffered heavy casualties and that more than 50 Libyan aircraft were operating in the region. The Western sources in Njamena said most of the government troops scattered into the surrounding palm grove and desert after the collapse of all resistance. The American-supplied Redeye surface-to-air missiles were taken out Faya-Largeau before it was lost. During the ill-matched battle, other government troops recaptured the outpost of Oum Chalouba, 200 miles further west, from forces loyal to former President Goukouni Oueddei. A source in Njamena said Libyan fighter-bombers pursued the Government forces to the Chicha Wells, 120 miles south of Faya-Largeau in the direction of Koro-Toro. The Libyan planes yesterday also bombed Oum Chalouba. Continued on back page, col 6

Sharp rise in rescues at seaside

Coastguards between Sussex and north Cornwall have reported 33 per cent rise in rescue incidents this summer. More holidaymakers and the growing popularity of windsurfing were blamed yesterday.

The figures relate to the period since June 1 in the Falmouth search and rescue region, which stretches from Selsey Bill, near Chichester, to Tintagel.

As strong offshore winds continued to blow, holidaymakers on the South coast were warned yesterday not to use inflatable in the sea. Two people have drowned.

The body of Nigel Ellis, aged 53, of North Harrow, Middlesex, was recovered yesterday from the sea off Eastbourne.

Shortly afterwards the alarm was raised for Neil Lawrence, aged 10, of Aylesbury, who was on an airbed off Littlehampton, Sussex. An inshore rescue boat later recovered his body.

Police in Scotland warned tourists yesterday of the dangers of swimming in lochs, as a search went on for a youth seen to disappear below the surface of Loch Lomond.

Dismissal threat to 200 workers

Strikers supporting 400 dismissed electricians at Shell/Esso's £700m petrochemical complex at Mossburn, in Fife, were told in a management letter yesterday that they will be dismissed unless normal working is resumed.

The 400 workers employed by Shell/Hall Engineering on the plant's gas liquids fractionation plant were dismissed on Wednesday after nine days of unofficial strike over working conditions and 200 more employed by Lummus at the site came out in support.

Policing warning to Brittan

Mr Leon Brittan, the Home Secretary, was given a warning yesterday by Labour councillors representing metropolitan areas that the policing of large areas would be barred by the proposed abolition of metropolitan counties.

A delegation to the Home Office from the Association of Metropolitan Authorities demanded an independent study before the Government abolishes the councils.

Protest over council homes

The left-wing labour administration in Liverpool was criticized yesterday by traditional Labour voters in the city over its policy of building 2,000 homes to rent, some of them in private housing schemes.

People who bought their homes on the Walton Hall Park Estate protested at housing committee meeting over a decision to build 67 council houses next door.

17,500 pirated videos seized

More than 17,500 illegal video tapes, including 200 master copies, have been seized this year by investigators from the Federation Against Copyright Theft (FACT).

Several important criminal actions are pending in England and Scotland, according to Mr Peter Duffy, FACT's director of investigations. They are the result of collaboration between FACT, the police and local authority trading standards departments.

Pigeon race ban

Pigeon racing has been banned for at least three weeks in South Wales after an outbreak of poultry disease. Three cases of paratyphoid disease have been reported in pigeons in Llanelli, Dyfed.

M1 tanker blaze

Firemen, battling for an hour yesterday, prevented a big explosion on the M1, near Luton, Bedfordshire after a tanker full of laden with 26,000 gallons of petrol burst into flames.

Chinese gang finds way to beat shipping injunction

By John Lawless

A Chinese gang alleged to have swindled Taiwanese factories out of \$25m (£16m) worth of goods by shipping them to Britain on the strength of cheques which then "bounced" yesterday switched tactics in an attempt to beat a High Court injunction.

The injunction, as reported in *The Times* yesterday prevents shipping lines from handing over the container loads of goods.

"It now appears that they are trying to sell off the shipping documents to British retailers", Mr Eric Ellen, director of the London-based International Maritime Bureau, said. The bureau is co-ordinating the investigation into the alleged fraud.

"We now know that more than one Chinese man is trying to claim the containers in Britain, although we do not know how many", Mr Ellen said.

"We have had no end of calls as a result of *The Times* story. It is clear that they are now trying to off-load to goods by selling the documents, and the message to British shopkeepers must be 'Beware the bargain'", he said.

Mr Ellen, formerly Chief Constable of the Port of London Authority police, has sent a report to the Director of Public Prosecutions. The legal situation is extremely complex, the holder of the shipping documents (bills of lading) are the legal holders of the goods. It is only the week-

long injunction, granted by Mr Justice Popplewell in the Queens Bench Division of the Commercial Court of the High Court on Wednesday, which is stopping the gang from collecting them.

Mr Raveen Arora, the Taiwanese manufacturers' representative who was granted the injunction, yesterday returned to Taiwan.

"I will be back in the middle of next week with sworn statements from my clients saying that the cheques with which they were paid were worthless. I hope they will enable the British police to take action", he said.

He claimed that his life had been threatened and "things are getting rather hot".

Although action in Britain has been taken much more swiftly than elsewhere in Europe and in the United States, where containers are thought to have been collected, the activities of what are now said to be several Chinese men acting in Britain have been widespread.

When the injunction came into force, it was known that one container, carrying \$30,000 worth of toys, had been started to appear in shops in Blackpool.

"But we have also traced two more containers that were collected from the inland container depot at Stratford, east London," Mr Ellen said.

Man tried to claim five consignments

By a Staff Reporter

As officials of the international Maritime Bureau were telephoning shipping lines from their offices in Barking, east London, to warn them not to hand over containers of unpaid-for goods from Taiwan, the man tried to claim five consignments of goods from Taiwan, the man alleged to have masterminded the alleged fraud was calling at a docks office near by, trying to claim five loads.

Mr Raveen Arora, the representative of Taiwanese factory-owners, said yesterday: "He was trying to pick up shipments of toys garments and telephones worth \$100,000."

The director of the Scandinch shipping line, who met the Chinese man named in Wednesday's High Court injunction, was Mr Graham Johnson. The incident happened about one hour after Scandinch had been given notice of the injunction.

"I think it was the first inkling he had that he could not take possession of the consignments", Mr Johnson said yesterday.

"He was a gentleman from the Far East, although I could

£400 rabies fine over guinea-pig

By Peter Evans, Home Affairs Correspondent

A West German holiday-maker was fined £400 by magistrates at Bath yesterday under anti-rabies regulations. A pet guinea-pig he and his family had brought into Britain through Dover was destroyed.

For the prosecution, Mr Charles Kinchin, an Avon trading standards officer, said West Germany had the second highest number of rabies cases in the world last year, with more than 6,500 reported.

Wolfgang Kohner, a computer specialist aged 35, from Mönchengladbach, pleaded guilty to importing the animal. The count was told he and his wife and two children had travelled in Europe with their pet, Mecki.

The police were called when tourists saw the animal in a cage outside their caravan at a camping site at Newbury near Bath.

Kohner told the magistrates through an interpreter: "We had seen no anti-rabies posters in Germany and could not understand the English word for rabies. We didn't think we came on a rabies area and we made no attempt to hide the animal."

Prisoners at Albany guilty of mutiny

By Peter Evans, Home Affairs Correspondent

Twelve prisoners from Albany top security prison on the Isle of Wight have been found guilty of mutiny by the jail's board of visitors.

They are among 15 prisoners to be punished for offences committed during a riot in May. Another four were found not guilty of mutiny.

Six prisoners at Wormwood Scrubs prison, London, have been found guilty of creating a disturbance there in June.

Thirty-one prisoners at Albany were charged, 28 with mutiny. Two panels from the Albany Board of Visitors, with two magistrates on each, have been touring prisons to which Albany's alleged offenders have been sent. Some remain in Winchester, Manchester, Wandsworth, Wormwood Scrubs and Birmingham.

The Prison Department will not give details of punishments until the hearings are completed.

Held in private, the cases have revived a long-standing controversy about the role of boards of visitors in hearing charges against prisoners. Penal

Protection for press criticized

By Peter Evans, Home Affairs Correspondent

Journalists should not receive special protection from police powers to search for confidential information when investigating serious crime, the Media Law Group said yesterday.

The group, set up by the British Executive of the International Press Institute, has sent its comments on "undesirable aspects" of the Government's Police and Criminal Evidence Bill to Mr Leon Brittan, the Home Secretary.

The Bill, which aroused considerable controversy in the last Parliament, and is to be reintroduced, proposes protecting journalists against seizure of confidential information.

However, the group said that special treatment for journalists would violate a fundamental element in the philosophy of the British Press and distance journalists from readers.

Steel veto attacked by London Liberals

One of the strongest of the Liberal organizations, the London region, has decided to back moves at the annual Liberal Assembly next month to get rid of the leader of the party's veto on the contents of election manifestos.

The region's backing for a motion by the Young Liberals and Daventry local association, which has the support of other constituencies, was carried by such a large majority at the regional annual meeting that no count was required.

Officials of the London Liberals and all backers of the move emphasize that it is not an "anti-Steel" motion.

Even so, Mr David Steel is known to be deeply opposed to any such proposal and there is little doubt that many Liberals will be hard to convince that it is not directed against Mr Steel if he opposed it at the assembly in Harrogate.

Some supporters of the move take the line that the leader is a member of the standing committee which draws up the manifesto and if he is opposed to any item in it, then it has little chance of featuring in the final draft.

Proponents of the move say that it will strengthen the Leader's position because he would not then be saddled with sole blame for any manifesto item which proved unpopular with a section of the party.

Mr Colin Darracott, chairman of the London Liberals, said: "This is a point of principle, not an anti-leader, still less an anti-Steel move. This is a grass-roots party."

The Liberal Party did not have its own manifesto at the last election, but fought on a joint programme agreed by a committee of Liberals and Social Democrats. Mr Steel did not have a veto on that. The London region embraces 84 constituencies.

The London Liberal Region has also decided to support the preservation of the Greater London Council.

The region hopes that Mr Ken Livingstone, Labour leader of the GLC, and Mr Alan Greenspan, leader of the Conservatives on the council, may visit the "fringe" of the Liberal Assembly to support moves to save the council, although there is some doubt about the Conservative leader accepting the invitation.

£40m plan to rebuild hotel

A £40m plan to rebuild the four-star North British Hotel in Edinburgh was announced yesterday.

The hotel is not commercially viable in its present form, Mr Peter Tyrie, managing director of its owners, Glencroft Hotels, said.

GLC joins fight over green belt

By David Walker, Local Government Correspondent

The Labour-controlled Greater London Council yesterday joined up with the solidly Conservative Home Counties to prevent the Government crossing the green belt around London in the interests of private house-builders.

Mr George Nicholson, chairman of the GLC planning committee, complained of "an insidious tie-up" between the house builders and the Government.

"Saving the green belt is not just of concern to those lucky enough to live in the leafy suburbs. It is also vital to people in inner London who rely on such countryside near by for a welcome break from the pressures of inner city life."

Mr Nicholson, who identified himself as the only socialist on the Standing Conference of South East Planning Authorities, promised a bipartisan approach to Mr Patrick Jenkin, the Secretary of State for the Environment, to urge him to rewrite the recently issued draft circular on the release of green belt land for development.

"London green belt is one of the major success stories of British town planning", Mr Nicholson told a press conference. He circulated extracts from articles in *The Times* of 1939 praising the role of the London County Council in protecting the greenery around the capital.

"It is the envy of many less fortunate sprawling world cities. Whatever the Government's assurances, once you start making exceptions, they can so easily become the rule and open the door for a flood of development."

Housing benefit review demanded by Labour

By John Winder

An urgent review in to how the new housing benefit scheme could be simplified was demanded last night by Mr Brynmor John, MP, Labour spokesman on social security, who said that in creating the scheme the Government had perpetrated an enormous blunder.

"In large parts of the country, administration of the scheme has simply broken down. Many thousands of tenants are going without the help to which they are entitled and are falling into rent arrears as a result."

Mr John said that local council staff were working at full capacity but finding the task beyond them. For the staff and claimants the new scheme was a nightmare.

The scheme was introduced fully in April and about 80 per cent of local authorities have completed the transfer, so that 95 per cent of claimants receive benefit under the new scheme.

Mr Rhodes Boyson, Minister for Social Security, has defended the scheme and suggested that some "problems" were transferring 7,000,000 households were inevitable.

Transitional arrangements to continue supplementary benefit

Top scientist to review funding of research

By Clive Cookson, Technology Correspondent

The Government has asked Sir Ronald Mason, former chief scientist at the Ministry of Defence, to review the funding of scientific research in Britain.

The review will concentrate on the balance between research commissioned by government departments and that funded by the five research councils and the University Grants Committee.

Sir Ronald, who is professor of chemistry at Sussex University, is conducting a one-man inquiry and he plans to deliver his recommendations to Sir David Phillips, chairman of the Advisory Board for the Research Councils, by October.

But his terms of reference are wide, and the review could signify a shake-up in the present structure of civil science, particularly the "customer-contractor" relationship between ministries and research councils, which was

Sir Ronald Mason: One-man inquiry instituted after the Rothschild report 12 years ago. Leading article, page 9

Pop fans at shot man's funeral

Thousands of teenage friends and neighbours flooded on to the streets of Belfast's Catholic Turf Lodge district yesterday to walk behind a coffin carrying Mr Thomas Reilly, aged 22, who was shot dead on Tuesday evening.

Representatives of two English pop bands - Duran Duran and Bananarama - joined the procession as a mark of respect for the young man, who had worked as a road manager for their groups in England.

Mr Reilly's oldest brother, Jim Reilly, himself a musician, flew back from an engagement in the United States to help to carry the coffin.

The funeral passed the burnt-out hulks of lorries, cars and mechanical diggers which had earlier been hijacked and set on fire.

At the funeral, the parish priest, Father Kevin Donnelly, spoke of Mr Reilly's dedication to the youth of his community.

He said: "People have come from far and near, and from all walks of life, to share in the grief of Thomas's tragic and unwarranted death that weighs so heavily on us all."

After the funeral, one of the area's biggest since the hunger strike processions three years ago, the crowd trudged through the litter-strewn streets of Turf Lodge, which has experienced rioting and fire-bombing since Mr Reilly's death.

An 18-year-old British soldier is in custody accused of Mr Reilly's murder.

A Belfast man was accused yesterday of murdering three Catholics.

William Cowan, aged 23, is charged with murdering a Mr Joseph Donegan aged 47, a father of seven, last October, a 32-year-old milkman, Mr Trevor Close, in May and 19-year-old Mr Stephen Murphy in November 1981, and membership of the outlawed Ulster Volunteer Force. He was remanded in custody until next Friday.

Running girl clue in murder hunt

From Arthur Osman, Leicester

But the man could not recall the make or colour of the car, which was parked at an angle.

The police said it was a vital lead and appealed to any motorist who saw anything similar to come forward at once. It could have been a father playing with his daughter, but it was essential to clarify the incident as soon as possible.

A girl looking frightened was seen in a car near Coldstream in the Borders on the night that Caroline Hogg disappeared. The driver was on the wrong side of the road and going south from Edinburgh. The child was seen by a motorist who stopped to remonstrate.

The girl left a fun fair near her home at Portobello with a scruffy-looking man wearing glasses. Police assume that the man they are looking for may not always wear spectacles.

At Coldstream in July last year Susie Maxwell, aged 11, was taken away by a man believed to be driving a maroon Triumph 2000 car. Her body was found in a lay-by near Uttoxeter, Staffordshire.

Mr Hector Clark, assistant Chief Constable of Northumbria, who is coordinating the murder hunt, believes the same man could have been responsible.

● Detectives hunting the murderer of Susan Renhard, aged 21, an art student, at Castleton, Derbyshire, appeared yesterday to a family of eight to contact them (the Press Association reports).

The police have established that the family of four or five adults and some children, were sitting at the bottom of Cave Dale around the time of the murder on June 27.

The Chartered Associations (Protection of Names and Uniforms) Act 1926

Notice is hereby given that The National Society for the Prevention of Cruelty to Children has applied to the Under Secretary of State, Home Office, for the making of an Order in Council under Sub-sections (1) and (2) of Section 1 of the Chartered Associations (Protection of Names and Uniforms) Act 1926 to protect the name of the Society and the following names, designations and badges used by the Society in pursuance of its Royal Charter and Supplemental Royal Charters, that is to say:-

- (a) The name "THE NATIONAL SOCIETY FOR THE PREVENTION OF CRUELTY TO CHILDREN";
- (b) The abbreviation "NSPCC";
- (c) The name "NSPCC Young League";
- (d) A badge depicting the letters "NSPCC" adjacent to the hand of an adult grasping the hand of a child;
- (e) An oval shaped badge worn without uniform with irregular edges depicting the Scales of Justice, surrounded by the words "The Prevention of Cruelty to Children" and surmounted by a coronet;
- (f) An oval shaped badge, worn without uniform, with regular edges depicting the Scales of Justice, surrounded by the words "The Prevention of Cruelty to Children, transferred by a sword."

Any objection to the application by any person or society affected or likely to be affected by the Order may be made in writing to the Under Secretary of State, Home Office, Room 331, 50 Queen Anne's Gate, London SW1H 9AT by not later than 12th Sept. 1983, specifying fully the grounds for the objection.

Irish solicitor describes 25-hour ordeal tied to a tree by kidnappers

From Richard Ford, Enniskerry, Co Wicklow

A wealthy solicitor was recovering at his home in the Wicklow hills yesterday after being kidnapped for 25 hours and tied to a tree on a disused military range.

He was found early yesterday after a telephone call to his home. A huge police operation while he was missing had involved a press blackout, monitoring of telephone calls and surveillance of his 40-acre estate. An £50,000 ransom had been demanded.

Mr William Somerville, aged 45, a Protestant partner in one of Dublin's leading firms of solicitors, was taken from his home at Enniskerry after persuading the masked gunmen not to take his eldest son James, aged 14, as a hostage, which had been their original intention.

He described yesterday how he was driven away with a bag over his head on Tuesday night by a gunman wearing camouflage, a stocking mask and bandolier.

He was first driven to woods near by and was taken to the military range, five miles from his home, where his arms and legs were tied before he was bound to the tree.

He received no food during his ordeal and said that he was watched by people in the woods.

Mr Somerville said that his worst moments were during the second night. "I was just cold and very tired. I did not know what was happening and I was thinking about other things", he said.

Mrs Manon Somerville said that she had feared for her husband's life because one of

the gunmen had said: "You know who we are. You know what happens to informers."

The police said that no ransom had been paid and Mr Somerville said: "I would not have agreed to any ransom being paid: I do not know where it would have come from."

The kidnapping began shortly after Mr and Mrs Somerville went out, when a masked man who had been hiding in the bushes surprised James as he fed two dogs.

The man put a sawn-off shotgun to the boy's head and while his two younger brothers Charles and Edward were upstairs asleep the man demanded to see the security system of the house.

"I was frightened but he was quite nice and gave me a glass of milk", James said.

When they returned Mr and Mrs Somerville were confronted by the man, speaking with a Northern Irish accent, who locked them in their cellar after making his ransom demand.

Mrs Somerville pleaded "as any mother would have done" to take her son's place. It was finally agreed that her husband would be taken instead.

She said that she only saw one man but had the impression that someone else was outside.

After the police were contacted Special Branch officers were posted in the house and a series of telephone calls were made and monitored. At 11pm on Wednesday, a call was made to the house with a message saying where Mr Somerville could be found.

His brother-in-law collected him, accompanied by armed

police, and the family was reunited at 1am yesterday, after Mrs Somerville had been placed under sedation.

Earlier in the day the police had stopped a man driving a car in Bray not far from the Somervilles' home. He was still being questioned in Dublin yesterday. A search is being made for a man thought to be involved in the abduction.

The police do not think that there was any paramilitary involvement in the abduction, which happened only days after they had foiled a Provisional IRA attempt to kidnap Mr Colin Weston, a wealthy Canadian businessman, from his home 10 miles away.

Mr Somerville could think of no reason why he should have been picked out as a target, although his undoubted wealth could be one factor. He was also vulnerable as a man with a young family.

The family speaks with an educated English accent and the three children go to school in England.

As a solicitor Mr Somerville specializes in personal taxation and tax planning. The practice in which he is a partner deals with civil and commercial rather than criminal law.

Educated at a leading Protestant boarding school and Trinity College, Dublin, Mr Somerville worked with the British Civil Service in Kenya before returning to Dublin, where he is a leading member of the Church of Ireland.

He has cattle and breeds Arab horses. He has denied that he or his firm of solicitors had any links with the Royal Family.

Mr Somerville, reunited yesterday with his wife Manon and son James.

Wombnoise on tape lulls babies to sleep

By a Staff Reporter

Sleepless nights may be a thing of the past for new parents as a result of tests at a Sheffield hospital using a special tape recording of sounds of the womb.

It has been proved, during a six-week experiment with 27 babies, that the tape is more effective than patting, rocking, stroking or talking.

The technique was developed by five Japanese doctors, who decided to find out why so many infants become restless, driving their parents to desperation. It was, apparently, because babies miss the soothing noises of the womb.

Tiny microphones were placed in the womb, a swishing sound like blood rushing through veins was produced and babies were quickly lulled to sleep in large numbers, much to their parents' relief.

Senior Nursing Officer Patricia Callis, of the Northern General Hospital, Sheffield, was delighted yesterday when one baby went obediently off to sleep, soothed by the tape, for a BBC television programme.

"It's wonderful", she said. "The majority of babies go off to sleep within five minutes, but it ranges from one minute to 15."

"The tape has 25 minutes of the sounds on each side. It came out on top of all other methods we tried. The only time it doesn't work is when they need feeding."

"Even the mothers find the tape soothes them. One red-head who was there during the trials said she wished she could get hold of one so that she could get off to sleep herself."

The hospital now has two of the tapes, one for each of its post-natal units. It thinks they could be a boon in cases of child abuse.

Tests first showed in the 1960s that babies will go to sleep faster to the recorded noise of a human heartbeat or similar sound.

Dr Harold Gamsa, consultant paediatrician to King's College Hospital, London, recalled experiments performed six or seven years ago. "We found we had to play the tape very loudly in order to have any great effect - the staff didn't particularly enjoy it", he said. "Things may have improved since then."

Inglorious start for grouse season

By Stephen Goodwin

The opening of the grouse season seems likely to produce more action off the moors than provide satisfactory sport for guns paying up to £400 a day.

Although the British Field Sports Society describes prospects as variable, most other authorities expect a poor start to the season, with an improvement next month.

The wet spring disrupted nesting and there was also a great deal of disease. Some birds reared second broods, but the young are still very small.

Three grouse moors in the Peak National Park plan to open today, instead of the usual six, to give stocks time to recover. Several estates in Scotland have cancelled their let shooting and the Sandiroyal family are among the foreigners to call off shooting holidays.

The estate agents Strutt and Parker, the biggest British agents for sporting lets, consider themselves fortunate in not having anything booked for the early days of the season. "If we had let's I could well have expected cancellations. The birds might well not be of a decent size to shoot."

Five days grouse-shooting with accommodation can cost a team of eight guns up to £20,000.

Reforms proposed on meat labelling laws

By Hugh Clayton, Environment Correspondent

The Government made a second attempt yesterday to win support for sweeping reforms of the meat labelling laws. If its plans are accepted, many of the brown discs now labelled simply as "burgers" would have to be called "economy burgers" to indicate that they contained comparatively little meat.

Packets of slices now described simply as "ham" would have to indicate how much water had been injected into the meat.

The proposed new rules are a response to recommendations made by a food study group in 1980. If accepted they will not take effect for more than two years.

Mr Jobo Bamford, head of food standards of the Ministry of Agriculture, Fisheries and Food, said in a letter to industrialists and consumer groups yesterday that the new

version of the suggested rules is in some ways stricter than the first one issued two years ago.

The new rules would apply to pies, sausages, burgers and fish paste, but not to haggis or black pudding. They would require anything described as a burger to contain at least 50 per cent meat, of which at least 65 per cent would have to be lean.

Under present rules it is legal to call the product a burger if it contains less meat than that.

The proposed new rules say that a dish with between 60 and 79 per cent meat must be called an economy burger. Butchers who sell loose burgers in their shops would be required to display a label showing both the price and the percentage of meat in them.

Fes made at home by members of voluntary organizations for sale on stalls would have to meet the law.

Irate woman bowls over batsman

A woman marched on to a cricket pitch yesterday demanding an apology from opening batsman Robin Smith who had just hit the ball through the window of her flat overlooking the ground.

Mrs Iris Clarke, aged 62, refused to give back the ball and a quarrel erupted in front of spectators at the match between the Hampshire Second XI and a Southern League side on Hampshire's county ground in Southampton.

Mrs Clarke said: "They told me I was holding up their game. I said that if they could break my windows I could spoil their silly cricket. That seemed to stump them for a moment. They were all so smug about it. I didn't think it was funny at all."

A Hampshire Cricket Club spokesman said: "We will not pay for damage of this kind as the flats have an insurance policy."

Mrs Clarke vowed: "They are not getting their ball back."

Inquest opens on Arne case man

An inquest was opened at Westminster yesterday on the man wanted by police over the killing of Mr Peter Arne, the actor.

Signor Giuseppe Perusi, a 32-year-old teacher, of Verona, Italy, was identified from photographs shown to his friend, Signorina Daniela Saoncella, who gave an address in South Kensington, London. Signor Perusi was found by river police at Wandsworth on August 4. The inquest was adjourned until September 7.

Beer honours Himalaya run

Richard and Adrian Crane, the Cumbrian brothers who ran 2,000 miles over the Himalayas and have raised more than £27,000 for charity, are to have a special beer launched in their honour.

Jennings Brothers of Cocker-mouth, will donate the profits on more than 18,000 bottles of "Marathon Ale" to the same charity, Intermediate Technology Development, which supplies simple tools to Third World countries.

Hang gliding helper killed

A man aged 19 who was killed in a 200ft fall at a Lake District beauty spot on Wednesday night had been helping a friend to hang-glide, police said yesterday.

Mr Jonathan White, of Staibbeck Road, Leeds, was on Walla Crag in Borrowdale, helping Mr Keimon Tew, of Baccstone Oval, Leeds, to take off when the hang-glider seemed to veer back and Mr White slipped off the cliff top.

Bone boy better

Doctors at the Royal Marsden Hospital in Sutton, Surrey, were "very pleased" yesterday with the progress of Simon Jenkins, aged two, the youngest patient to receive a bone marrow transplant. They will now in a week if the operation has succeeded.

Equality urged for male prostitutes

Homosexual impersonating should no longer be punishable by imprisonment, the criminal law committee of the Law Society has recommended.

Women are no longer imprisoned for soliciting and the committee urges in a report published yesterday that homosexual and heterosexual prostitutes should be treated the same.

The report of the solicitor's committee is a response to a review of the law on prostitution and related offences by the Criminal Law Revision Committee (CLRC).

The solicitors approve of a CLRC suggestion that the law should no longer refer to brothels. This would have "the distinct advantage of avoiding arguments about what does and what does not constitute the brothel". No offence would be committed where the premises were used for prostitution by not more than two prostitutes having their home there.

The Law Society committee agrees that there should be a new offence to deal with "kerb crawlers". But it opposes a much wider offence to catch all those who accost women for sex in public, in case an "opportunistic boyfriend" fell into the net.

At present men who ask women for sexual intercourse from their cars are not committing an offence. The CLRC proposes that it should be illegal to accost a woman from a car for sexual purposes, so as to put her in fear or "cause her annoyance", or to accost her for prostitution.

The solicitors also suggest "casual" prostitutes - probably driven to the streets by poverty - should be treated differently from the "professional", through the system of giving cautions. The aim would be to encourage the "casual" to give up prostitution.

The Department of Health is to advise homosexuals and other people at risk from Acquired Immune Deficiency Syndrome (Aids) not to give blood.

There is growing concern that the fatal illness, first noted among American homosexuals, could be transmitted through blood transfusions to people otherwise not at risk.

The advice will be contained in leaflets now being prepared at the Health Department for distribution to blood donor centres.

One doctor in charge of a regional blood-transfusion centre said last night that the pamphlet would describe what Aids was and list the high-risk groups: homosexuals, particularly those with more than one partner, drug addicts who inject themselves with drugs into a vein, and partners of people who have Aids.

There have been 14 cases of Aids in Britain so far. Five victims have died. One of the sufferers is a haemophile who would have received large quantities of a form of donated blood.

Fine on rape victim for carrying knife

From Our Correspondent Leeds

A rape victim was fined £150 yesterday for carrying a flick knife which she claimed was for self-defence. Helena Coningham, aged 21, who has been attacked twice in the last year, received the fine after a judge told her that a jury had decided that on the day in question she had the knife for an offensive purpose.

As she left Leeds Crown Court surrounded by 60 women demonstrators she said: "I am very pleased that I was not jailed. I think that now I will have to put up with the threat of being attacked or raped again."

Helena Coningham in Leeds yesterday

Yesterday the court was told by Miss Gillian White, for the prosecution, that the knife was found when Coningham and another woman were arrested outside the Odeon Cinema in Leeds while making a CND protest.

Miss Celia Groves, for the defence, said that Coningham had been raped and attacked twice. She said: "This young woman has that knife purely for her own protection."

TV jingles warning to advertisers

By Kenneth Gosling

Teachers and parents worried about slang and bad grammar in television commercials can take comfort today from the fact that the Independent Broadcasting Authority is also concerned.

Jingles like the Milk Marketing Board's "Gotta lotta bottle" tend to be taken up and chanted by children; and the IBA's advertising control division says it is a matter for advertisers to look at, although the authority is not proposing to reject commercials on those grounds alone.

The matter has come to ahead with the publication of last month's summary of comments and complaints to the IBA about television and radio commercials.

The IBA says it gets many complaints about the possible effect of jingles on children's speech, but maintains there is no evidence to suggest that it has long-term effects. "But it is a matter which should seriously be considered by advertisers and agencies."

Mr Harry Theobalds, the authority's head of advertising control, said "You could equally argue the same thing about material in programmes."

Most of the 24 complaints last month were from viewers and listeners commenting on The Mail on Sunday's series on the Yorkshire Ripper case by Mr Ronald Gregory.

The IBA says: "We noted the fairly large number of objections to this advertising and we acknowledge the force of the argument about offensiveness to public feeling. We also believe it was a mistake for the hoax tapes to be included in the commercial."

Murder charge

Dr Keith Robinson of Tennyson Road, Worthing, was remanded in custody by Worthing magistrates yesterday charged with murdering Mrs Margaret Monnier, also aged 63, of Warwich Gardens, Worthing, on Tuesday.

Young 'still expect traditional marriage'

By Richard Dowden

Marriage is adapting rather than changing radically, according to Miss Catherine Guy of the National Guidance Council.

In a pamphlet published today she says: "In many respects marriage is still the same as it was years ago."

Her findings are based on material from discussion groups, personal experience, and surveys collected by marriage guidance counsellors in 1981.

They suggest that: Almost all young people want to get married, and most are prepared to accept cohabitation only as a preliminary to marriage;

More girls than boys expect marriage to be permanent and almost three quarters of young people expect faithfulness from their partners;

Most young people expect to have children in marriage;

Despite a general agreement that men and women should share housework, when questioned in detail, men were less willing to do jobs like changing and washing nappies;

A very high proportion of young unmarried people wanted a church wedding though they were not predominantly churchgoing. Over half the weddings in Britain are civil.

Miss Guy says that unemployment and the changing roles of men and women will be key factors in determining the future of marriage.

31 AUGUST '83

ARE YOU WORKING TO MEET THIS DEADLINE?

IF YOU ARE APPLYING FOR AN INTERIM CABLE FRANCHISE - YOU CERTAINLY ARE.

GEC-Jerrold is the single most experienced source of network know-how and state-of-the-art equipment for cable operators.

GEC-Jerrold is the joint venture company formed by GEC-McMichael and Jerrold International of General Instrument to combine the best of British and US technology to help develop broadband communications systems in Britain and across the world.

GEC-Jerrold offers:

- Turnkey systems for all network topographies providing progressive enhancement for interactive facilities.
- The world's largest range of cable network equipment proven in service across the USA, Britain and Europe.
- Free technical advice on any aspect of the provision of cable systems.

GEC-Jerrold has a record that speaks for itself.

GEC-Jerrold is developing, by contract with British Telecom, the baseband switch for the BT advanced technology cable system.

GEC-Jerrold will have available a fully interactive mini-hub system by the time installations are being made.

GEC-Jerrold has a two-way addressable set-top converter 'Starcom V' with the features that operators want - programme security, parental locking and interactive subscriber participation for advanced future applications such as polling, mail order and electronic banking.

GEC-Jerrold - shouldn't they be helping you meet the deadline? Call the technical hot line - 0753 821673.

CALL THE TECHNICAL HOT LINE

Reagan to hold weekend summit in Mexico on crisis in his backyard

From John Carlin, Mexico City

President Reagan and President Miguel de la Madrid are due to meet on Sunday in La Paz, in the Mexican peninsula of Baja California. According to both Mexican and American officials, bilateral issues will take a back seat to the potentially far-reaching conflicts in Central America.

The expected presence of Mr George Shultz, American Secretary of State, Mr Langhorne Motley, the Assistant Secretary of State for Latin America, and Señor Bernardo Sepúlveda, the Mexican Foreign Minister and guiding light of the Contadora peace initiative, underlines the importance that will be given to Central America.

There is speculation in both American and Mexican news that the presidential plaudits that will no doubt conclude the meeting will mask what in reality will prove to have been a lead-on clash.

A month ago President de la Madrid called an urgent meeting in Cancun of the Presidents of the four countries which make up the Contadora group, Colombia, Venezuela, Panama and Mexico.

At the end of that meeting, the Contadora Presidents issued a joint statement, "The Cancun Declaration for Peace in Central America", in which they were careful to avoid any direct reference to the countries involved in the regional conflict.

Nevertheless, most analysts interpreted the declaration as another other things, a criticism of the United States' However, an announcement by Washington just two days later that it was both dispatching a powerful naval force to Central America's Pacific coast, and sending about 5,000 troops for military manoeuvres in

considering long-term policy options in Central America, met President Reagan yesterday after the swearing-in of the 12 commission members on Wednesday. Dr Kissinger pledged that the group would produce "the fullest and fairest report of which we are capable". There are two Hispanic members of the commission, one of whom, Mr Henry Cisneros, Mayor of San Antonio, has provoked a storm of indignation within the Administration by publicly attacking American interference in Central America.

The White House merely commented that Mr Cisneros had demonstrated that the commission would not be a rubber stamp for Administration policy. The other Hispanic member, Cuban-born Mr Carlos Díaz-Alejandro, Economics Professor at Yale, has often been accused of being sympathetic to President Castro of Cuba.

COMAYAGUA: US troops have erected a city of tents near this northern Honduran town, the largest for the largest military manoeuvres ever held in Central America (Reuter reports). About 100 troops of the so-called Readiness Command arrived two days ago.

GUATEMALA CITY: Señor Eduardo Castillo Arriola has been replaced by Señor Fernando Andrade as Foreign Minister (Reuter reports). Señor Andrade is expected to take a harder line on Nicaragua.

MOSCOW: The Soviet Foreign Ministry protested to the US Embassy about the stopping of the freighter Aleksandr Ulyanov in the Pacific and the questioning of the captain (Reuter reports).

Washington: The Reagan Administration's diplomatic efforts in Central America are gaining momentum amid hopeful signs of early talks between the US-backed Government at El Salvador and the left-wing guerrillas (Christopher Thomas writes).

The strategy to facilitate regional talks, but not to participate, is beginning to show results, according to a senior White House official.

US assessments suggest that Salvadorean troops are for now beating back the guerrillas to well-defined areas, but it is recognized that they could merely be regrouping.

They continue to be well armed, mainly by stealing from the military and buying on the international market. Supplies from Nicaragua probably represent a minor source, according to Central American diplomats in Washington.

Dr Henry Kissinger, head of a presidential commission con-

The Glorious Twelfth

Church assembly ends on radical note

Vancouver (NYT, Reuter) - The sixth assembly of the World Council of Churches ended yesterday with notes condemning nuclear weapons, calling for a Middle East settlement that takes into account the plight of the Palestinians, condemning US policy in Central America and calling for economic sanctions against South Africa.

The resolution on the Middle East followed the general direction of the council's past actions. While recognizing the right of Israel and Arab countries to have secure boundaries, it called for the withdrawal of Israeli troops from the West Bank, and advocated a negotiated settlement that included the Palestinian Liberation Organization.

In addition, the resolution warned Christians in the West to recognize that their guilt over the fate of the Jews may have influenced their views of the conflict in the Middle East, and led to uncritical support for Israeli policies.

The 900 delegates approved a statement accusing the Reagan Administration of trying to destabilize the Nicaraguan Government as part of an effort to "contain the aspirations of

care" for white South Africans.

The earlier vote on nuclear disarmament described the production of nuclear weapons as "a crime against humanity". The most heated controversy of the 18-day assembly came on Tuesday, when the delegates narrowly voted against a Norwegian bishop's motion calling for an immediate withdrawal of Soviet troops from Afghanistan.

But there was an enthusiastic show of unity earlier when the delegates endorsed plans for a world conference on Christian doctrinal unity in 1987. It would involve the Roman Catholic Church.

South Africa.

But there was an enthusiastic show of unity earlier when the delegates endorsed plans for a world conference on Christian doctrinal unity in 1987. It would involve the Roman Catholic Church.

Help sought to identify sick Briton

A scared and bewildered Englishman, lying in a hospital bed in the United States after a car crash, is desperately trying to remember who he is. He could be helped by radio listeners who are calling the BBC with possible clues about his identity (the Press Association reports).

It was reported that the blond man, aged about 24 and 5ft 10in tall, is in hospital in Portland, Oregon, "rather scared" at not knowing his identity. He thought his name could be David Miller. He had no passport or papers to identify him.

He was injured in a car crash on July 30 and taken to the Emmanuel Hospital, Portland. A hospital worker said that "Mr Miller" remembered living in a flat in Finchley, north London.

Argentina puts on the brakes

Buenos Aires (Reuter) - Argentina's military Government has announced tighter state controls on the economy to curb inflation and help industrial debts.

The measures, which include total state control of interest rates and tighter restrictions on prices and wages, were announced in a government statement after a Cabinet meeting yesterday.

Seoul amnesty

Seoul (AP) - The South Korean Government announced an amnesty affecting 1,944 people, including 693 political prisoners, most of whom are already out of prison. The measure coincides with independence celebrations.

Wind to rescue

Cape Town (Reuter) - Fresh southerly winds spread the huge oil slick from the broken Spanish tanker away from South Africa's Atlantic coastline yesterday. Officials described the escape from a disastrous fouling of the shore as miraculous.

Volta choice

Ouagadougou (AFP) - Captain Thomas Sankara, Upper Volta's new left-wing ruler, has appointed Major Boucary Jean-Baptiste Lingani, to head of the country's armed forces, according to an official source.

Chase tragedy

Coachella (AP) - Eleven people were killed when a car, being chased by a border patrol, collided on Wednesday with a truck near here. The crash occurred on Highway 86, known as California's Blood Alley.

Ethiopia crisis

Addis Ababa (Reuter) - More than a million people are in urgent need of food relief in drought-stricken areas of northern Ethiopia, according to a US congressional delegation.

Palace facelift

Peking (Reuter) - Restoration work has begun at the site of Peking's old imperial Summer Palace, sacked and razed by an Anglo-French force in 1860. Known as the Yuanmingyuan (garden of perfection and light), the palace complex was built between 1709 and 1772.

10 years' grace

Dar es Salaam (AP) - China has granted a 10-year grace on the repayment of a \$340m loan made to Tanzania and Zambia for construction of the Tazara railway between the two countries.

Golfer 'stable'

Sydney (Reuter) - The Australian golfer Jack Newton, who lost his right arm and so eye when he walked into the propeller of a light aircraft, is still in a serious but stable condition.

Mea culpa

Sante Fe, New Mexico (AP) - Chief Justice Vera Payne of New Mexico fined himself \$50 (£32) for being five minutes late for a court hearing. "The reason I leaved the fine is that we have a schedule and there are other people depending on us."

Gelli affair puts Craxi in the shade

From Our Own Correspondent Rome

A vote of confidence in Italy's first Socialist Government was pushed to the sidelines yesterday as attention was focused on the disappearance of Signor Licio Gelli, head of the banned P2 masonic lodge.

Signor Gelli is wanted here on charges including espionage and complicity in fraudulent bankruptcy. He disappeared from a Swiss prison on Tuesday night shortly before his extradition to Italy was due to be discussed.

His disappearance coincided with the planting of a bomb on a train which exploded near Prato injuring three people. Observers here were quick to point out that the Propaganda 2 lodge has been linked in the past with terrorism. Responsibility for the bombing was claimed by the extreme right-wing terrorist group Black Order.

Senator Giovanni Spadolini, Minister of Defence in the new Government and Prime Minister in the administration which had the Propaganda 2 lodge declared illegal, said yesterday: "A year ago with the arrest of Gelli we won a battle but the war against the enemies of democracy is not finished... The moral emergency is not over and we are still in danger."

Signor Bettino Craxi, the new Prime Minister, made no mention of the lodge in his speech opening the confidence debate. He spoke before the news of Signor Gelli's disappearance.

If he is to satisfy public opinion Signor Craxi must now give a convincing lead in Parliament to the opening of a new investigation. The least he could do is reestablish the parliamentary commission of inquiry on the lodge.

GENEVA: Signor Gelli's defence lawyer said yesterday that he believes the masonic leader was abducted from Camp Dollon prison in Geneva. Maître Dominique Poncet the lawyer, said he had never during his months of conversations with Signor Gelli received the slightest impression that he envisaged escaping (Alan McGregor writes).

"He was removed by people - well or ill-intentioned towards him - who do not want him to speak", the lawyer added.

Senator opposes lifting sanctions on Poland

From Roger Boyes, Warsaw

The first senior American emissary to visit Poland since the lifting of martial law has left Warsaw declaring that economic sanctions should not be abandoned in the immediate future.

Senator Christopher Dodd, a Democrat from Connecticut, said that he had held talks with top government officials including Mr Stanislaw Nieckarz, the Finance Minister, and Mr Janusz Ohodowski, the Deputy Prime Minister in charge of the economy, and with Mr Lech Walesa, the leader of the outlawed Solidarity union.

The two ministers had expressed their view that sanctions should be lifted immediately. But Mr Dodd said that while the ministers had been "extremely articulate," his

recommendation to the Senate would be that it was "premature" at this particular hour to lift those particular sanctions.

During four hours of confidential talks with Mr Walesa, the senator gained the impression that the Solidarity leader was against the lifting of sanctions. Mr Walesa had said that he was ready "at any time, in any place" to meet the Government and open a dialogue. He had said that political prisoners should be freed.

Mr Dodd, who is a member of both the foreign and the finance committees of the Senate, said that the Polish side had expressed strong interest in membership of the International Monetary Fund, as well as in the rescheduling of state debts.

Shagari's post-victory priorities

Lagos (Reuter) - President Shagari of Nigeria, fresh from a landslide victory at the polls, said yesterday that the economy and agriculture would be the priorities of his new administration.

He polled more than 12 million votes - more than four million ahead of his closest rival, Chief Obafemi Awolowo of the Unity Party of Nigeria - according to final results released early yesterday.

He said he was not concerned about opposition protests of widespread election malpractice and allegations of rigging by his National Party of Nigeria (NPN).

"Nigerians like to complain, especially when they lose", he said. "Nigerians understand this and I do not take it very seriously".

He said that the first civilian-run elections in Nigeria for nearly 20 years had proved that democracy had been re-established. "I am pleased to have proved wrong those who believe we are not capable of running free and fair elections without violence".

He said that there would be a Cabinet shake-up after his inauguration on October 1 but no change of policy. "What we are immediately concerned with is the state of the economy and our task is to tackle the problem of recession".

Mr Shagari gave no further details, but earlier Professor Emmanuel Edozien, his special adviser on economic affairs, said there would be no relaxation of austerity measures imposed in April last year to cut down on imports.

"We do not intend to be deluded into reverting to old habits by a change of fortunes in oil", he said. "We should not see the cut-down on imports as temporary. The pressure will be kept up, although the levels may change."

Israelis on currency buying spree

From Christopher Walker, Jerusalem

The economic crisis facing the Begin Government remained unresolved yesterday, as many Israelis continued buying foreign currency in the belief that a second devaluation will soon follow this week's cut in the value of the shekel by 7.5 per cent.

Israel radio said the continued high demand for foreign bank notes reflected public scepticism about repeated Treasury denials that a second devaluation was being contemplated.

The Government is now drawing up a programme of new taxes and swingeing cuts in ministerial budgets to rescue the economy and pay for the occupation of Lebanon, estimated at \$1m a day.

Mr Yoram Aridor, the Finance Minister, told a conference of Jewish fund-raisers here that Israel faced two challenges: the economic recession in the West and the high cost of the Lebanon war.

"Since we cannot add to our state budget and must pay new bills, we have no alternative but to cut our budget", he said. The ministerial economic committee has already agreed unanimously on a taxation package which will soon be presented for endorsement by the full Cabinet.

The Cabinet will also be asked to consider a Treasury demand for a 20bn shekel cut in the defence budget, which is being fiercely resisted by the new minister, Mr Moshe Arens. There were unconfirmed reports in political circles yesterday that Mr Arens - current favourite to succeed Mr

Menachem Begin as leader of the Likud coalition - might press for withdrawal from Lebanon if the amount to be pruned from his budget is not substantially reduced.

The planned new taxes are certain to prove unpopular and worsen the Government's poor standing in the opinion polls. The new austerity package is designed to claw in 15bn shekels. It includes a doubling in the tax levied on every Israeli travelling abroad to \$100; the imposition of 15 per cent value-added tax on all fresh fruit and vegetables; a new tax on child allowances.

It was learnt last night that the decision to devalue was taken at a meeting between Mr Aridor, Mr Begin and Mr Moshe Mandelbaum, the governor of the Bank of Israel.

Eastern Scheldt barrage: Memories of 1953 flood disaster

Dutch labour of Hercules to stem the sea

Fighting the sea: The lifting barge used to transport huge piers to their positions on the seabed in the eastern Scheldt estuary to form a sea barrage.

The Delta Act, approving a project which would shorten the Dutch coastline by about 440 miles by closing off all the estuaries, with the exception of the Western Scheldt and the new waterway to allow shipping continued access to Antwerp and Rotterdam.

Thirty years and thousands of millions of guilders after the floods, the gigantic scheme, is nearing completion. It has turned tidal waves into lakes and freed the islands from their isolation by providing roads to the rest of the country over the dams across the estuaries.

The complete closure of the estuary would have meant the end of its mussel and oyster industry and the lobster trade. The eastern Scheldt is also a nursery for other species, such as sole, plaice and shrimp.

Under the combined onslaught of the fishing industry and the environmentalists anxious to preserve the area's unique flora and fauna, Parliament decided in June, 1976, that an expensive storm surge barrier instead of a solid dam would be built across the Eastern Scheldt.

Troubles at sea and in space Soviet atom submarine salvage in Pacific

From Philip Taubman (NYT), Washington

A nuclear-powered Soviet submarine sank in the North Pacific in June, according to American intelligence officials apparently killing all on board.

The United States did not know whether the submarine, which was built in carry cruise missiles, was armed with them when it sank or whether there were any nuclear warheads on board.

The Soviet Government conducted an elaborate salvage effort that ended recently when the submarine was floated to the surface.

The salvage operation was conducted in part to prevent the US from trying to recover the vessel, they said, just as with the attempt to raise a sunken Soviet submarine in the early 1970s.

Intelligence officials said at the time that the CIA had recovered part of the submarine but had been unable to salvage the section that contained sensitive coding equipment.

The cause of the latest is unknown. The submarine, which belonged to a class code-named Charlie by the Western allies, sank in deep water in the Pacific off the Kamchatka peninsula. The Soviet Navy operates a base at Petropavlovsk on the peninsula, and salvage operations began almost immediately.

Charlie-class submarines, the first of which went into operation in 1969, can carry up to eight cruise missiles fitted with nuclear warheads, according to American officials.

Greece aims at free health service

From Mario Modiano, Athens

Legislation introducing revolutionary changes in the country's health system has been tabled in Parliament by the Socialist Government.

The new system aims to give all citizens free and adequate medical care and make it unnecessary for thousands of Greek patients every year to seek treatment abroad.

Mr Andreas Papandreu, the Prime Minister, said in a television address on Wednesday night that it would put an end to "a situation in which the quality of medical care enjoyed by a citizen depends on his financial means".

The emphasis in the new system is on the full-time hospital doctor who will not be allowed to have a private practice, but will receive an annual salary ranging between £3,800 and £14,000, plus overtime allowances which by Greek standards adds up to very handsome pay.

Greece has the highest ratio of physicians per capita in the EEC, but as most of them work in Athens, patients in the provinces tend to drift to the capital, adding to its problems.

Greece aims at free health service

From Robert Shull on board NIS Stad Zierikzee Eastern Scheldt

The walls of ships' sirens cut through the calm night on the Eastern Scheldt in the south-west yesterday to mark a unique feat of hydraulic engineering.

Dutch engineers had just faultlessly completed the delicate task of peering lowering the first of 66 piers, each the size of a cathedral, to within five centimetres of their planned positions on the bed of the estuary, signalling the beginning of the final phase to the most ambitious flood prevention scheme ever undertaken by man.

On February 1, 1953, as had happened all too often in this country's history, gales and a spring tide combined to slash through the traditional dykes protecting the islands in the delta where the Scheldt, the Maas and the Rhine flow into the North-Sea. Nearly 2,000 men, women and children died.

Faced with this toll, the Dutch decided to mobilise their vast experience in harnessing the sea in an effort to defeat their age-old foe once and for all.

In 1958 Parliament passed

Gandhi under pressure over Indian Tamil hostility to Sri Lanka

From Michael Hamlyn, Delhi

The 40 million Tamils in India are in a state of high indignation about the treatment of their brother Tamils in Sri Lanka.

Feelings in the rest of India, too, are hostile to the Government of Mr J. R. Jayewardene and to what are perceived here as his oppressive actions in banning talk of separatism, and sequestering Tamil-owned properties damaged in the disturbances.

The Indian Prime Minister, Mrs Gandhi, and her ministers are having to pursue a delicate task in their relations with the island Government. They must be seen to be taking positive action to relieve the burden of the Tamils, without transgressing the code of non-interference endorsed by the Non-Aligned Movement of which India is the proud chairman.

The inhabitants of Tamil Nadu - "Tamil-land" as the former Madras state is now called - are enthusiastic supporters of the call for Tamil Eelam, the separate state which the secessionists wish to establish in the north and east of Sri Lanka.

A march of 5,000 Tamil volunteers, who signed a pledge in their own blood not to be deterred, is on its way to the coast of the Palk Strait which separates the island from the mainland.

They will undoubtedly be prevented from doing more than jumping up and down at the edge of the sea and making faces across the water, but their actions generate a genuine frisson of fear among certain Sinhalese.

The military forces in the northern province and in the town of Jaffna have a much more real fear, however. They believe that the Tamil terrorists are given aid and comfort across the strait.

According to Colonel Mike Silva, who commands the northern forces, the "Tamil Tigers" not only receive training sessions in Tamil Nadu, they also get medical treatment when wounded, sanctuary when hunted, and a market for the products of their fund-raising robberies.

One effect of the current trouble of the Sri Lankan Tamils had been the establishment in Madras of an office of the Tamil United Liberation Front (TULF), the political party representing the Tamils in Sri Lanka.

The front has had offices in Britain and in the US but never before in India. According to the sponsor of the new office, its first task will be to organize refugee camps in Tamil Nadu.

Not to be outdone, the

president and the general secretary of the opposition DMK (Dravida Munnetra Kazhagam) in the assembly also resigned, protesting at the central Government's failure to intervene to save the Tamils from "genocide".

The competition between the chief minister, Mr M. G. Ramachandran's Anna Dravida Munnetra Kazhagam (ADMK) and the DMK to see who can be most supportive of the Tamil cause, also has an effect at the centre.

Mrs Gandhi is compelled to take some action in support of the Tamil cause. She cannot afford to alienate the ADMK and the chief minister, whom she is thought to be trying to woo into an electoral alliance.

According to informed observers, the Indian Government's policy now is to work up the dialogue begun in Delhi this week with the visit of the Sri Lankan President's brother, Mr H. W. Jayewardene, into a series of high level political contacts.

● COLOMBO: The leader of the opposition and secretary-general of the TULF, Mr Appapali Amirthalingam, has sent a letter to President Jayewardene, which could form the basis for top-level negotiations between the Government and the Tamil front (Donovan Moldrich writes).

Fire blacks out Seventh Avenue

Floodlights blazing in blacked-out Seventh Avenue, New York, as emergency services struggle to restore power after a fire at an electricity sub-station.

The fire plunged the city's fashion industry, in the heart of Manhattan, into darkness during a vital marketing week (Trevor Fishlock writes).

With thousands of buyers in town to look at the new fashion lines, manufacturers yesterday moved their models and clothes into hotel rooms

for shows, or fixed up emergency lighting on their own premises.

The blackout intensified the chaos in what is always a frenzied week in a tightly packed and busy part of the city between 30th Street and 42nd Street. More than half of New York's 5,500 clothing makers were affected.

"It is a blow to the industry at a crucial time", one of the editors of *Womenswear Daily* said. "But remember that this is a resilient industry and people are getting on with business. Hundreds of stores, offices and

businesses have been knocked out by the power failure, which followed a devastating fire caused by a water main bursting and short-circuiting underground transformers. The electricity company hopes to restore power by Monday.

This was New York's worst power failure for two years. It is unlikely to have the spectacular after-effects of the legendary evening blackout of the mid-1960s, which was followed, nine months later, by heavy pressure on the city's maternity wards.

Britain tells Malta to halt Madrid stalling

From Harry Debelius, Madrid

Britain called on Malta at the European security review conference here yesterday to stop delaying the conclusion of the meeting. No further amendments to the proposed final document stood any chance of gaining the necessary consensus of all 15 participating countries, Britain said.

Mr Kevin Passmore, of the British delegation, also responded to Malta's warning last week about the danger to the Helsinki process that might result from trying to by-pass Malta and reach an agreement among the 34 remaining Helsinki nations.

He said Britain has no intention of violating the rule of consensus.

The Maltese delegation did not reply. Its insistence on incorporating changes in the proposed document to reflect its own concern on Mediterranean security, is the last obstacle in the way of final agreement.

If Malta continues to hold out past next Thursday, tentative plans to schedule the final sessions of the conference in the first week of September, with the participation of most of the foreign ministers, may have to be cancelled.

Spain, the host country, said last month that it would not have time to make the necessary preparations for the presence of foreign ministers unless the tentative plan became definite by August 25.

Roo dollar not fair dinkum

News that Australia's new dollar coin will not be "fair dinkum" Australia has set off a storm of protest (Tony Duboulin writes). Dubbed the "Roo dollar", because of the five kangaroos on its reverse, it will be a yellow-gold colour and stamped from a blank made from 92 per cent copper, 6 per cent aluminium and 2 per cent nickel.

The coin will be stamped at the mint in Canberra but the blanks will be made overseas, probably in South Korea.

A Treasury spokesman explained that the contract would be going to an overseas company because there was no company in Australia capable of producing the base metal.

Hectic visit to Dhaka for Yaqub

Dhaka (AFP) - Bangladesh, the country which emerged from a war against Pakistan 12 years ago, held talks with Pakistan here yesterday which were described as free and frank.

They were between the respective foreign ministers, Mr A. R. Shams-Ud Doha and Sahabzada Yaqub Khan, and covered bilateral, regional and international issues, an official spokesman said.

It was the Pakistani foreign minister's first official visit to Bangladesh. The two ministers would continue to discuss all issues of mutual concern, the spokesman said. He declined to answer queries on specific issues being discussed.

Bangladesh and Pakistan have a long list of such issues, including the question of repatriation for the remaining 300,000 stranded Bihari Muslims who opted for Pakistan after the emergence of Bangladesh, the division of assets and liabilities between Dhaka and Islamabad and trade imbalances.

Get on famously on the Glorious Twelfth.

Quality in an age of change.

Queen is still regent, says Swazi minister

From Ray Kennedy, Johannesburg

A 15-year-old prince who is at public school in England has been officially named as the future King of Swaziland but there were signs yesterday of a bitter feud developing between factions of the royal family.

Within hours of the dismissal on Wednesday as Regent of Queen Dzelwe - known to Swazis as the *Indlovukazi* or Great She-Elephant - Prince Bkikimpi, the Prime Minister, announced that Prince Mkhosetive, when he is 21, will succeed King Sobhuza II, who died last August after ruling for 41 years.

The young prince, whose name means "King of the Nation" is the son of the New Queen Regent, Queen Ntombi, who like Queen Dzelwe, was one of King Sobhuza's 100 wives. He is attending Grechill House School, a unit of Sherborne college.

But yesterday, one of the most powerful men in Swaziland, Prince Gabhni, the Minister of Home Affairs and head of the Defence Council, denounced Queen Dzelwe's dismissal as unconstitutional and illegal. He said that despite a notice to the contrary in the government gazette, Queen Dzelwe is still regent. She has not been replaced.

Sources in Mbabane, the

capital of the small kingdom on South Africa's eastern border, said: "It is not a power struggle in the accepted Western sense but is more about the spirit and ethos of the royal family. Prince Gabhni feels that Queen Dzelwe's dismissal is a grave insult to Swazi tradition."

Prince Gabhni is one of the late King Sobhuza's more than 400 sons but because he was not the only son of his mother he can never succeed to the throne.

Observers noted that in naming Prince Mkhosetive as the future king, the Prime Minister appealed for the support of the Army, the police and the civil service - all of which fall under Prince Gabhni's sphere of influence.

According to the Prime Minister, a delegation of Swazi elders will travel shortly to Britain to bring Prince Mkhosetive home and introduce him to his people. It is likely that he will complete his education abroad before returning to Swaziland permanently.

Since King Sobhuza's death the kingdom has been in a state of uncertainty over how to maintain its traditions of absolute monarchy in the face of growing demands by educated younger Swazis for a constitutional form of government.

Britons decide against caning appeal

By Rodney Cowton

At least five of the six Britons who have been sentenced to long terms in prison and to receive hundreds of strokes of the cane have decided not to appeal against their sentences.

They were visited in jail on Wednesday by Mr Douglas Scrafton, a British Embassy official and the Foreign Office said yesterday that they had decided not to appeal.

The sentences were imposed last Sunday after the six men had admitted offences involving alcohol, which is banned in Saudi Arabia. The Foreign Office is expected to obtain official confirmation of their sentences, and of the charges, when an official goes to the court in Riyadh tomorrow.

It is believed that the charges related to alleged plans to take large quantities of whisky into the country.

Birth rate soars in Hongkong refugee camps

From Richard Hughes, Hongkong

A soaring birth rate in Hongkong's crowded camps for Vietnamese refugees still awaiting resettlement, has become a serious problem, it was admitted at the closing 1982-83 session of Hongkong's Legislative Council or parliament.

There were 544 births in the camps between July last year and last June, boosting the refugee population by 4.3 per cent to 12,000. In the preceding 12 months, the increase was 4.66 or 3.3 per cent. Hongkong's population increase last year was 1.7 per cent.

Mr Patrick Williamson, the acting security minister, pointed out that Caritas, the Roman Catholic welfare organization, had introduced "a family life education programme" into one central camp "not only for married couples."

SPECTRUM

Michael Cimino was responsible for the true-life Hollywood disaster of *Heaven's Gate*, which cost \$40m and brought a major studio to its knees. In London for a second opinion, he talked to Nicholas Wapshott

Sympathy for the bedevilled

The history of Hollywood is strewn with expensive failures. Erich von Stroheim's *Greed* of 1923 began as an extravagant, 10-hour epic, only to be cut down on Irving Thalberg's orders to a mere two-and-a-half hours. Sam Peckinpah's *Major Dundee* ran into similar trouble in 1965, causing him years without work until he bounced back with *The Wild Bunch*. But no recent flop has so caught the imagination as the story of Michael Cimino's *Heaven's Gate*. It has become a by-word for disaster, the most notorious example of a young director, given his head and showered in money, turning in a grandiose, unpopular, unmarketable turkey.

This week Cimino flew into London to introduce, for the first time in Britain, the original, uncut version of *Heaven's Gate*. Four days of screenings at the National Film Theatre this weekend will be the latest event in a slow campaign to have the film reassessed. Already the full-length print has been seen in Venice and Rome. In Paris, so many wanted to attend the single showing at the Palais Chailiot that the doors of the Cinéma-thèque were unhinged by those left outside. They burst into the auditorium and demanded that the film be restarted from the beginning.

Meanwhile, in the United States, Z Channel in Los Angeles, a pay-television cable network, has serenced the complete version to record audiences at a record price. The film has also just opened on cable in Canada. Slowly, *Heaven's Gate* is at last finding an audience.

The quiet revival of what was thought to be a dead film has succeeded through the love of filmgoers to "discover" a lost epic and the solid support of Cimino and the others who worked on it. Cimino explained: "I think that most of the people who made the movie have never broken faith with it. That comes as a surprise. Many people would prefer *anima culpa* "show us your stigmata and we'll forgive you from us, but neither I nor the producer, nor the actors, nor the crew has regretted making the movie."

It was three years ago that Michael Cimino became the laughing stock of Hollywood. His rise and fall in the movie business was predictable and traditional, a familiar storyline followed by dozens of cinema celebrities before him. He found himself in the good company of those, like Orson Welles, Charles Chaplin, von Stroheim and others, who enjoyed the fruits of success only to have their work and talents abused with the speed of one of those montages of swirling calendar dates and newspaper head-

lines that make a cinematic short-cut between riches and rags.

He had started out as a screenwriter of promise and came to the attention of Clint Eastwood, who provided him in 1974 with his first feature as director, *Thunderbolt and Lightfoot*. Then, with his second film, he struck gold. *The Deer Hunter*, about three Vietnam veterans, swept the Oscars, including Best Film and Best Director. Cimino was the hottest property in Hollywood and Hollywood responded in the time-honoured way, United Artists, the owners of Francis Coppola's less obviously successful Vietnam epic, *Apocalypse Now*, and made an offer he couldn't refuse.

Cimino would be allowed to make a film of his own choice. The budget would be substantial and it was made clear that there would be no trouble at head office if it turned out that he needed more. He would be granted total artistic licence and there would be the minimum of interference. Even the senior executives of UA would forego their usual alarm mechanism of seeing the daily rushes. In short, he was given enough celluloid to hang himself.

Cimino decided to revive the Western, a type of movie which had fallen from popular favour. He would base it upon the Johnson County Wars, a little-remembered incident of US history in which stockholders took the law into their own hands in the systematic murder of 125 immigrants accused of stealing cattle. He hired the most fashionable actors of the times: Christopher Walken, the Russian roulette-playing star of *The Deer Hunter*; John Hurt, the Englishman from *Midnight Express*; Isabelle Huppert, the French beauty from Claude Goretta's *The Lacemaker*; and Kris Kristofferson, the singer.

The cost of Cimino's perfectionism became a great source of film-world gossip. All the sets and costumes were based on contemporary photographs. All the hats were hand made. All the location work was in remote areas, often meaning the cast and crew driving four hours to and from work each day. Two hundred thousand tons of Fuller's earth was spread about the key location to simulate mud. A steam train was brought across five states on a railway wagon.

There were other extravaganzas. Members of Cimino's old fighting unit, the Green Berets, were hired to teach actors how to handle firearms "not as a prop but as a lethal aid". When Mansfield College, Oxford, stood in for nineteenth-century Harvard, a treeless quad had erected at its centre a huge oak, which had been bought, cut up,

Cimino on the set of *Heaven's Gate*: an offer he couldn't refuse.

numbered, then reassembled. The size of the cast swelled into four figures as the number of extras was spontaneously doubled or tripled. All the interior shots were photographed through a chemical smoke-screen for period effect, causing costly retakes to match previous footage. Cimino, engrossed and working around the clock, rode about in a Jeep, oblivious to the fact that he was riding for a fall.

For reasons unconnected to Cimino or the *Heaven's Gate* project, the press and public had come to hope that one of a number of wildly expensive films made by young directors, whose precocity had been rewarded by high budgets and low accountability, might come a cropper. One after another, the wobbly films arrived: Steven Spielberg's *Pearl Harbour* comedy, 1981; Martin Scorsese's 1940s musical romance, *New York, New York*; Francis Coppola's *Apocalypse Now*. Each had teetered but not quite fallen. When *Heaven's Gate* loomed into view with a budget of \$40 million, it looked as if it had been set up to fall over. There was a ready appetite for a disaster of Titanic proportions.

Today, Cimino prefers not to become involved in recriminations. "I think it was probably connected with the success of *The Deer Hunter*, but in order to understand it you have to understand so many things other than movies." He would have liked to have

had time to cut and edit at leisure. "There was no time for previews. There was great pressure from inside United Artists to get it out. I expected that it would open at two small cinemas, in New York and LA, and that I would be able to change things, like Kubrick did with *2001*. But it was made into a conspicuous event."

The build-up had been so considerable that the press could not resist pronouncing. Cimino flew to New York for the press show and watched the film crumble before his eyes. The press smelt blood and leading the pack was Vincent Canby of the *New York Times*, usually the gentlest of critics. He wrote: "You might suspect Mr Cimino sold his soul to the devil to obtain the success of *The Deer Hunter* and the devil has just come around to collect."

The verdict was unanimous and merciless. *Heaven's Gate* jokes became the latest thing. Cimino and his producer, Joann Carelli, the uncredited producer of *The Deer Hunter*, begged for a reprieve. They asked their bosses at United Artists to withdraw the film from public view so that they could continue work on it. After a bare week in New York, the film was recalled.

Did the abuse and gloating hurt Cimino? He answers the question with absolute dispassion, as if his raw feelings had been soothed by a "think positive" therapy. "I am for the most

The cost of Cimino's perfectionism became a great source of film gossip

part unaware of those critics. I went straight back to work. I try not to read too much criticism, but in this case there was no time. We were still at work after the original opening. There really didn't seem to be much point in reading it. What I was told didn't seem to be about the movie or myself, but about some other movie and someone else."

Several months and a futher \$10m million later, Cimino was ready with the second version, cut by an hour but even less coherent than the original. By the time of its second coming, most people had become bored with the whole affair. It opened to apathy and didn't last.

"One of the things that is disturbing about that sort of reaction has to do with all of your colleagues. For instance David Mansfield, who wrote all the music. He played the boy with the fiddle on roller skates in the film. It was his first time and it was a superior score."

Vittorio Storaro, who photographed *Reds*, said to Vilmos Zsigmond, who worked for me, that he thought Vilmos was bound to take the Oscar for *Heaven's Gate*, but you do not like to see your own people not getting work."

Does he regret the way it all turned out? "No, I do not have regrets about the work that I do. You cannot work that way. It is a bit like being in the army. There are no excuses, no complaints. You cannot be effective if you are always looking back over your shoulders. There is an old Arab saying 'The blow that doesn't break you strengthens you' And who is there to be angry at?"

Cimino has not directed a film in the three years since *Heaven's Gate*. Many projects have been mentioned, but none have come to fruition. It was suggested that might direct the latest remake of *Moby-Dick*, which his hero, David Lean, had turned down; the plan did not work out. And he is reluctant to be drawn on his current work, which he simply calls "a project for Columbia."

"Other directors work on a number of projects at the same time, some of which might work out, and they can talk about them. But if I say anything, it is all over the newspapers. It is a bit dismaying because I am treated in the press more as an actor than a director. A director should be invisible."

And he insists that he is still a director and writer and has been working solidly since the debacle. "Time and time again we have seen musicians and artists suffer similar criticisms to that which I have received for *Heaven's Gate*, but they keep working, they keep writing, they keep painting and, if they are lucky, the work endures. Finally, that's what it is about. It sounds like a cliché, but work is the reward."

Heaven's Gate is being shown twice daily at the National Film Theatre tomorrow, Sunday, Monday and Tuesday.

moreover... Miles Kington

Grouching about the Twelfth

From Lord Disgusted
Sir, Many people mock the concept of grouse shooting as old-fashioned and behind the times. But this year you will have read that there are very few grouse left on the moors and that it will be a lucky shot who bags a pair, or pairs a bag, or whatever the expression is. This proves that grouse shooting does work. We have almost exterminated the little blighters. Another year, and perhaps the Scottish highlands will at last be free from these cunning, evil-minded little blighters. Keep shooting!

From Lord Whortle
Sir, I read that as grouse are now so rare, many owners of grouse moors are thinking of turning their property over to forestry. As one who did so 10 years ago, may I be permitted to comment?

Our experience is that although people find it strange at first shooting at trees instead of grouse, they come to enjoy it very much. Foreign businessmen who have come to Scotland year after year without hitting a single grouse suddenly discover that shooting at and winging a tree is comparatively easy, and of course the tree does not die. Ignorant quarters say that hitting a stationary tree is not sportsmanlike: the truth is of course that on all but the calmest days the trees blow about a lot and it still requires skill to bring down a young larch or spruce.

Our season, too, starts on the twelfth, and we shall enjoy the usual race to be the first to bring the season's first pine needles to a London restaurant. Last year, by the way, I shot at and missed a young fir on the opening day, but brought down a pair of grouse sitting in the branches!

From Mr J. G. Lavoisier
Monsieur, As usual we shall be taking part in the race to be the first people to bring a London restaurant up to the Scottish moors to serve a grouse on the Glorious Twelfth. At midnight on the eleventh, we at the Petit Bistro de Chez Jean shall be air-lifting our little *boite* by helicopter and tying it through the night in Scotland. By dawn we shall be in position in Glenhutter near Loch Rannoch and open to serve grouse all day. If no grouse are available, we shall be serving freshly shot trout and salmon. Looking forward to seeing you all!

From Colonel Wagwagler
Sir, I might have known it. Every year, as regular as clockwork, we get so-called satirical comments from such as your columnist Miles Kington (is that really his name?) about the noble sport of grouse shooting. How many times do I have to explain that without the dedicated breeding and conservation of those concerned, there would be hardly any grouse left? Shooting is conservation.

If you then ask me how it is that there are hardly any grouse left, my answer is: I do not know. But that is quite beside the point.

From Henry the Talking Avocet
Hello darling! Your old friend Henry here, halfway through his summer season at Lowestoft or Skegness or somewhere, and my goodness the crowds have been flocking this year to see me in my spectacular production of *Seagulls Over Sorrento*. But enough of me. I just wanted to reminisce briefly about the one time I got involved in the grouse shooting season.

In 1978 I was in Scotland to see a rather charming parramigan with whom I was conducting a passionate but short-lived *affaire scandaleuse*, and on August 12 we happened to be out on the moors when all hell broke loose. Not since a cabaret tour of the Lebanon had I felt so at risk.

Keeping my head, I infiltrated myself among the beaters and cried out in my best Knightsbridge accent: "Aim at the trees over here, you chaps!" The result was gratifying. Six beaters shot, two winged and Lord Strathcumfrey driven round the bend. Yes, a good day's sport all round.

If a certain young quail named Yvonne should chance to read this, may I make it quite clear that all is over between us? You may keep the ring if you like, it is only from the top of a larger tin.

Taking the red tape road to Turin

Robert Moreland, Euro-MP for Staffordshire East, recently travelled across Europe in the cab of a long-distance lorry to see how the European Community looks to the men whose daily business is crossing borders. Here he tells Patricia Clough of the endless waiting, the red tape and the corruption in a Europe supposedly dedicated to free and unrestricted travel.

It was about dawn on Monday, July 18 as I set out from Tilbury in the co-driver's seat of a 32-ton articulated lorry bound for Turin. Beside me was Monty Murrell, an experienced long-distance driver who did the run regularly. Behind us was some £80,000 worth of mixed freight, ranging from radio-cassette recorders to titanium dioxide, which we had to deliver in France and Italy.

For four years I have sat on the transport committee of the European Parliament, battling with the mass of different rules and regulations, the vested interests and other problems which when it comes to transport still prevent the Common Market being a common market. Now I wanted to see for myself what really goes on at the Community's internal borders. It was even worse than I feared.

The first incident happened before we had even left Britain. At Dover the Customs asked to see a consignment of photo-chemicals imported from the United States but bound for France. The officer just looked at the boxes, not at the content. It was a short delay, but it meant we missed the boat. We had to wait 90 minutes for the next ferry and consequently failed to reach the French customs clearing house near Paris that night. Think of the cost of such a delay which ties up a £50,000 lorry and a driver earning £300 a week plus expenses, then

Robert Moreland: cigars, but no whisky for the Italian passport officials.

have declared it illegal. Then you have to have a permit to drive the lorry through France. Germany and Italy insist on permits. They are issued on a quota system and there are never enough, so some drivers travel illegally. The European Parliament wants many more permits, but Germany especially is against it because it wants to channel freight on to the railways. Then there are T-forms - T for Transit - one for each type of goods carried, six copies of each. On the

return journey we carried machine tools. Each tool and each individual type of drill attachment had to have its own T-form. Of course the log-book, passport and insurance all have to be in order. At the Italian border the passport official asked if we had any cigarettes. Monty gave him some cigars. I asked what would have happened if he hadn't given him anything. "He would have made us wait a quarter of an hour," he said. A second official then asked for

forgotten misdemeanour and written off by their owners.

We were lucky by Turin standards; we only had to wait four hours. The Italians insisted on us going through the whole clearance process again as we were leaving, though why I cannot imagine. You would think they would be glad to export their goods. The French did not care about us on the way back, but we had a four-hour wait at Dover because it was busy.

I was astonished not by the mountain of paperwork involved in the journey, but by the amount of time wasted at customs' posts. During the week we spent a total of seventeen and a half hours waiting at customs' offices. The Commission estimates that these delays alone cost £600m a year. Customs duty has been abolished; the delays are caused by working out the differences in VAT and excise duty in each country. Not one official asked to look at our load.

So much of that paperwork could be reduced by inter-connected computers and data processing. One suspects that the officials themselves are resisting such changes; inevitably they would mean fewer jobs. France must be told to stop demanding the *Carnet de passage* risk being banished before the European Court of Justice. We must put a stop to the permit system, it is an encouragement to bribery and corruption.

All the drivers I spoke to complained that no one ever takes any notice of their problems. If the EEC's transport ministers and officials could see what things looked like from the cabin of a lorry, perhaps those problems would be dealt with.

Drugs ring with a difference

Jenny Bryan examines the curious route taken by British drugs from manufacturer to chemist, a route costing the NHS about £50m a year

Information on drug packaging can be confusing at the best of times. If it is in French or Italian, it becomes incomprehensible, but more and more drugs manufactured for people on the Continent are finding their way on to the British shelves because it is cheaper to import them from Europe than to buy them in this country. And it is probably costing the Department of Health and Social Security £50m a year.

The practice of importing cheap drugs has arisen because of the enormous price differences around the world. In some cases, British made drugs are actually reimported to Britain because they can be bought so much cheaper in Europe. In other instances, drugs get into Europe from the Far East and eastern Europe, are repackaged and brought to Britain with French, Belgian or Italian stamps on them.

Anyone importing a drug to Britain needs a product licence and normally it is only the manufacturer who holds such documents. A loophole in the law, however, allows people without licences to import small quantities of drugs which are not available in Britain but are needed for individual patients.

In the last year the practice of "parallel importing" cheap drugs has increased dramatically. Wholesalers found an unexpected ally in Brussels, since EEC legislation encourages free trade in drugs across the borders of member countries. The DHSS made a brief effort to curtail the practice, but discovered it would be breaking EEC law if it did so.

Parallel importing is reckoned to be costing the DHSS £50m a year. This is because pharmacists who buy cheap imported drugs do not pass on the results of their good housekeeping to the NHS. When putting in their accounts to the DHSS for reimbursement of the cost of buying drugs, they charge the department the full recommended British price.

The DHSS recently announced that it would claw back the estimated 6 per cent profit which pharmacists are known to make from buying drugs from the big three British wholesalers who do not import drugs. But the DHSS has not tackled the 20-25 per cent

profit they are reckoned to be making from imported drugs.

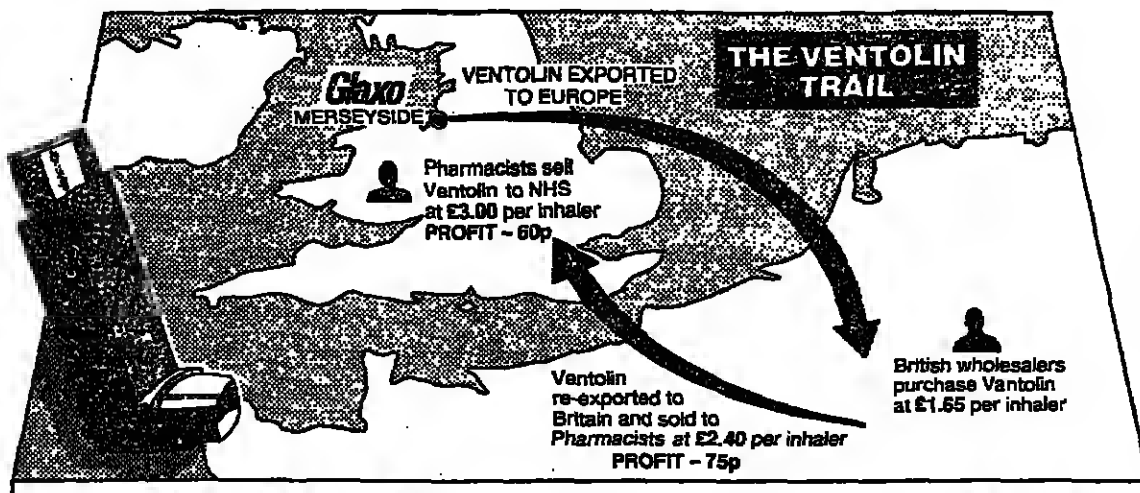

Feelings run high over parallel importing. Drug companies selling in Britain deplore the practice because of their loss of earnings. Pharmacists' representatives are worried because of the risk of pharmacists being held responsible for drug accidents. Repackaging of drugs in Europe or in Britain often makes it difficult to find the manufacturer so pharmacists, as the last traceable link, could find themselves liable for any serious side effects of the drugs.

Both companies and pharmacists are especially nervous about drugs which come into Britain from outside Europe and may have been stored under highly questionable conditions. The importers insist that they know their sources and can guarantee the quality of the drugs they bring to Britain. But as with any commercial venture, there are always cowboys who make their money and conveniently disappear.

Drug companies do not sell their products more cheaply in Europe from choice. France, for example, introduced tough controls on drug prices which prevent companies from charging at British levels. The industry argues that such measures stifle investment and hence research and development of new drugs.

Recently Mr Norman Fowler, the Health Minister, announced a 2.5 per cent cut in British drug prices, and further controls on the profitability of the industry are expected. A leading parallel importer in the North of England said he found the present cut derisory. "It won't make a scrap of difference to parallel importing," he said. "We are open to a 5 per cent negotiation on our prices to pharmacists and other wholesalers: 2.5 per cent is nothing."

Both the drug industry and major wholesalers who do not import cheap drugs have urged the health minister to crack down on parallel importing. Any further package to control drug prices in Britain may include a curb on importing which will make the total deal more palatable to the drug industry. In the meantime, drug sales in Britain are as subject to vagaries of the marketplace as the fruit and vegetable stall or the car industry.

Four other examples				Cost to British wholesaler in Europe	Cost to British pharmacist (% discount on cost to NHS)
Drug	Manufacturer	Uses	Dosage	NHS price*	
Tagamet	Smith, Kline (US)	Stomach ulcers	200mg (500 tablets)	£75.65	£60.50 (£66.20 (12-5%))
Stugeron Forte	Janssen (Belgium)	Diseased peripheral blood vessels	75mg (100 tablets)	£16.06	£5.20 (£9.63 (40%))
Aldomet	Marck, Sharp and Dohme (US)	High blood pressure	250mg (500 tablets)	£27.23	£20.50 (£21.78 (20%))
Septtrin (Eusaprim in Europe)	Wellcome (UK)	Infections	480mg (500 tablets)	£60.48	£39.31 (£40.38 (20%))

*Basic price and does not include dispensing fees and other pharmacist's allowances. All NHS prices will be reduced by 2.5 per cent from August 1, in line with DHSS cuts.

The parallel path to profit

Ventolin is the most commonly prescribed drug in Britain. Most of this country's two million asthmatics will probably take it some time in their lives. Its manufacturer, Glaxo, is not the only one to benefit financially from its success. Ventolin is on the best seller lists of a growing army of people buying drugs cheaply in Europe, importing them to Britain and selling them for profit to pharmacists.

Only Glaxo at one end of the deal and the NHS at the other lose out. Both the wholesaler and the pharmacist make money through "parallel importing" of drugs. Ventolin leaves Glaxo's Merseyside factory stamped with the company's batch numbers and guarantees of quality and safety ready for export. It is transported to the Continent and stored in the warehouses of Glaxo's subsidiaries.

Wholesalers can buy the drug and sell it in turn to hospitals and chemists, or they may pass it on to British wholesalers, with bases on the Continent. They then reload the

Ventolin back on to trucks and head for the English Channel. The drug, having had the dubious pleasure of a trip round the European countryside, arrives back in Britain a few weeks after it leaves. The only difference is its price.

In Britain the basic cost of a Ventolin inhaler to the NHS is £3. In Europe, British wholesalers involved in parallel importing can buy it for just over half that price - £1.65. They pay the cost of transporting it back to Britain and then charge pharmacists working in local chemists £2.40. The pharmacist charges the NHS the normal recommended price - £3. So he makes 60p on each inhaler and the importer makes 75p.

It may not sound a great deal of money, but that saving is on just one inhaler of one drug. The cost of parallel importing as a whole to the NHS is reckoned to be £50m. Some companies are known to have bigger worldwide price differentials. These include Glaxo, Merck, Sharps and

Dohme and Wellcome. Others, such as Smith, Kline, do not.

Parallel importers like to trade in Veotolin because it has a fast turnover. They can make more money on other drugs, but may not be able to sell them so quickly. Stugeron Forte, for example, is used to dilate blood vessels in the arms and legs. It is made by Janssen a Belgian company, and costs in Britain, £16.06 for a pack of 100 tablets. In Belgium it can be bought for just over £5, brought to Britain and sold to pharmacists for around £10 - a massive 40 per cent saving on the official NHS price.

Other highly profitable drugs are Adalat, used to treat angina. Aldomet for high blood pressure and Zyloric, for gout. Price reductions depend on how much the pharmacist is buying and how quickly he can pay. But he can make an average saving of 20 to 25 per cent - three to four times that available from the big three British wholesalers who do not practise parallel importing.

TALKBACK

Undercover security

From Mrs Eleanor Tobio, Glencairn Drive, Glasgow

Last Saturday I set off alarm bells in a department store, as happened in the article about being wrongly accused of shoplifting. I was carrying a large carrier bag which contained at least eight items of clothing I had bought during the morning.

As I came off the escalator on to the first floor the security bell rang and I was approached by two members of staff. I think I may have been lucky as they were extremely polite, helpful and reassuring. My innocence seemed to be presumed.

After a long search which revealed no tag (I began to think I might be bionic they took each item and passed it through the alarm beam till at last the trousers were declared guilty (bought in another store belonging to the same group).

Eventually from the very bottom of a pocket there emerged a piece of card with a serrated edge. Problem solved. I can't complain about how the incident was handled but it's worrying nonetheless. It could happen to someone less confident than I was. And can one be sure that every security tag had been removed if they bury them deep in a pocket?

From Mrs Cillo Paget, Westcott Road, Old Town, Swindon, Wiltshire.

The recent article by Maureen Park on the misery of being wrongly accused of shoplifting surprises me. The attitude of the lady and the tone of the article seem to be one of the righteous indignation for an event which was utterly, through unfortunately, of her own making. She demands apologies from the shop management where, I would have thought, apologies were due from her. Would there not have been a "regrettable breakdown in the system" if she had walked out with the T-shirt?

From David Lintott, Selbourne Road, Sheffield.

You may be amused or even concerned to know that the day when your First Person article by Maureen Park concerned her wrongful arrest for shoplifting, I was myself accused by an over-zealous employee of one of our major bookshop chain stores.

pleted the crossword in the train en route to the office this morning. Incidentally, what was 9 across?

Pension board

From Mrs Anne Harris, Chairman, National Federation of Women's Institutes, Eccleston Street, Victoria.

Margaret Drummond's article, "Beware the Small Print," highlighted the little-known areas of discrimination in pension schemes. The problem has two roots: the historical attitude to women's earnings as insignificant pin-money, and the continuing discrimination in the state scheme.

Insignificant women's wages may too often be, but they are the less make an important - and sometimes the only - contribution to their household's budget. The actuarial insistence on regarding women's incomes as in some way different from men's is nicely summarized by Robie Ellison, whom you quoted: "We should be thinking, as he said, not of men's and women's distinctive needs, but of people's needs."

The fact that the Government refuses to do this in the state scheme, and moreover has made pensions an exception to the terms of the Sexual Discrimination Act is the outside of the problem.

The Occupational Pensions Board, reasonably enough, takes the line that occupational schemes should not be required to provide benefits which the state does not itself provide. This means that the onus on improving the position is on the institutions which set up the schemes, on the employers and on each of us as employees, to see the women and men are treated equitably.

It was in the light (or should I say "the dark") of this inequity that our AGM of the National Federation of Women's Institutes passed, by an overwhelming majority, a resolution urging the provision of equal spouses' benefits in occupational pensions schemes.

From R W Farrington, Marsham Court, London SW7.

Your Wednesday Page article makes the familiar point that women are commonly hard done by in not being able to secure for their husbands an entitlement to widowers' pensions.

It would be as true to say that employed men are generally quite as hard done by.

Contributing as I do, as a civil servant, towards the pension to be paid during the hypothetical widowhood of my non-existent wife, I feel the disadvantageous inequality to which the article refers to bear much more on the male sex.

How to claim benefit and keep the Rolls

COMMENT

Company directors whose firms go into liquidation leaving nothing for a golden handshake may be relieved to learn that there is a possibility that they can hang on to their Rolls-Royces, Cessnas and Camper and Nicholson's and still claim money from the state.

The occasions will, of course, be rare, as is made plain in the S Manual of instructions to supplementary benefit officers, which is now published in fulfilment of the Government's pledge to make the rules public.

No-one can receive supplementary benefits if he has capital of £2,500 or more, rising to £3,000 in November. But deciding what counts towards that capital limit is one of the tasks facing supplementary benefit officers when faced with an initial claim.

The S Manual tells them that

ordinary personal possessions, like a house and furniture, are not to be taken into account. But the value of possessions like paintings, jewelry or a vintage car are to be counted if bought instead of putting the money into safe investment places, like deposit accounts or building societies. The S Manual says dryly "This is likely to arise only very rarely."

In such cases, it is not the value of the possession that counts, but the intention when it was bought. The reverse is true of luxury items that are incompatible with the standard of living of other people on supplementary benefit.

It would be unreasonable to disregard the possession of a very expensive car, a yacht or an aircraft, if they were bought before the claim for benefit was made - and it could hardly be otherwise - and benefit has been paid for less than a year, then what has to be considered is whether possessing the Rolls is compatible with the living standards of other people with a similar lifestyle or job.

Even if the supplementary benefit officer decides that the former company director was living only up to the standards of his peers, but it would be unfair to disregard the Cessna, there is still a let-out clause. If it would take time to realize the asset, he must consider whether to make an urgent needs payment to tide the claimant over.

It is different at the other end of the scale. Supplementary benefits

are supposed to be sufficient for normal clothing and footwear and, except in cases of exceptional hardship, lump sum grants are no longer payable to replace them.

If items regarded as essential are damaged, destroyed or stolen, lump sums can be paid to replace them. The manual says two pairs of shoes per person are essential.

The rules cover all kinds of other obscure cases, including instructions on how to deal with claims from a polygamous household. In that case, the second or subsequent spouse is to be treated as peeing to live on the difference between the rate for a couple and a single householder: an amount that works out at less than the normal rate paid to an 18-year-old school leaver still living at home.

Pat Healy
Social Services correspondent

Knowing schizophrenia

Many doctors who suffer from a disease later become an expert in its treatment; by the very nature of the symptoms this is unlikely to occur if they

develop schizophrenia. A mother with psychiatric training would make a good substitute for such a doctor, particularly if she has watched the disease change her son from a stimulating independent and imaginative schoolboy to a withdrawn, confused Oxford undergraduate and much later a bizarre petty thief. She would develop an understanding of schizophrenia, its problems and its treatment denied to those who have only seen patients in a clinic, a ward or at a formal consultation. Just such a mother, Naomi Smith, helped by Dr Derek Richter, former director of the Mental Health Foundation, had written a book full of perception and minute observation. If read by the family of sufferers they may learn that their son, parent or spouse is not just being more holedly minded than usual, but is displaying well-recorded symptoms.

Schizophrenia is obviously Naomi Smith's great interest, but the book also deals in detail with depression and other common psychiatric diseases. She illustrates her text with pertinent case histories selected either from past or present public figures or from her experiences as when working in hospitals in America, Britain, Australia and, during the war, the Far East.

Naomi Smith told *The Times* that this book was an attempt to excite in the British general public a greater interest in mental disorders. She had always noted the contrast between the knowledge and understanding displayed by the Americans and the indifference of the British, but only when her own son was a patient did she realize how damaging this could be.

MEDICAL BRIEFING

Watch the water

Dr William van Heyningen, former Master of St Cross College, has recently retired from the Oxford School of Pathology and the US National Institute of Health Cholera Advisory Committee and the Cholera Research Laboratory at Dacca, but has remained as outspoken as ever over the problems of gastrointestinal infections.

Travellers and tourists in his view catch typhoid, cholera, food poison and many forms of hepatitis because they eat or drink other peoples' sewage. Inoculations may be helpful against some diseases, but as a precautionary measure they can never replace the need to be careful about food and drink. He advises that except in exceptional circumstances care should be taken to eschew uncooked foods including salads, even washed fruit can have its dangers as it is impossible to know whether the water was clean. Melons he views with particular wariness as in some places it is the local custom to make them heavier by injecting water, or as he prefers to call it, very dilute sewage. Oranges, lemons and bananas he will take.

Other points to watch are ice added to drinks, water, soft drinks bottled by little-known firms, ice creams and shellfish, which have an ability to concentrate micro-organisms in the body.

One of Dr van Heyningen's major interests has been in cholera control; he fears, and most experts agree, that the present cholera infection is practically useless; it stimulates antibody formation in the wrong parts of the body. Cholera is a disease of the intestines and it is in the intestines that the antibodies must be operative. Doctors are now working on a vaccine which can be given by mouth and which will provide the resistance where it is needed. Typhoid infections are still

Safe drug

This year it may not be a glorious twelfth on the grouse-starved Scottish moors, but it is for your friendly neighbourhood chemist who always feels frustrated that he spent many years learning pharmacy, only to find that when qualified his income is dependant on the sale of hot water bottles, lipstick and cameras.

As from today the pharmacist will be able to supervise the sale, without a doctor's prescription, of a powerful, but safe drug, ibuprofen. It is one of the post-war, post-aspirin, non-steroidal anti-inflammatory drugs, invaluable in the treatment of various forms of rheumatism, muscular aches and pains and headaches. Some of this group, including ibuprofen, are very useful for treating painful periods.

Professor Stuart Adams of the University of Nottingham, who also works for Boots Research, says that it has been on prescription since 1969 and has proved a very safe drug for people of all age groups.

Sales of ibuprofen, which will be sold to the public under the trade name of Nurofen, one unlikely to be affected by the adverse publicity engendered by Opren. Although a member of the same family of drugs, so is distantly related to Nurofen that, in the view of Professor Adams, it would be unfair to consider it even as a fifth cousin.

Only middling

Politics in relation to aging is, as the Prime Minister has discovered, an irrational subject. Since she has none of the usual predisposing causes, for a rational test we must assume that this occurred as a complication of the normal middle aged reaction of the virtuous jelly within the eye; this is no more sign of sickness or overwork than other politician's baldness, greying or corpulence.

Coughs and sneezes....

Mothers who spend the winter months writing sick notes explaining the absence of their children from school may be glad to hear that science confirms their suspicions: their children's coughs and colds could be related to the low temperature of some classrooms, and the dry atmosphere.

Mr G H Greeo from the Department of Mechanical Engineering at the University of Saskatoon has collected evidence which shows that the control of temperature and humidity in communal buildings should be precise, as when all variations are likely to have an appreciable effect on the incidence of sneezing, coughing, sore throats and fevers but had no effect in regard to tummy upsets or urinary tract disorders. An interesting and unexplained finding was that foot infections are less common in correctly humidified surroundings.

Although most of the work quoted was written about conditions in American or Swiss schools or barracks, O M Lidwell and his team have in the past published similar findings on the epidemiology of the common cold in British schools.

Investigations have shown that there is a relative humidity which micro-organisms find particularly hostile; over or above that figure a greater percentage survive longer, not all these survivors will remain infectious, but the drying of the nasal passages as the humidity falls may encourage infection.

Why we must not desert Belize

In March 1981 I drank a glass or two of champagne in No 1 Carlton Gardens after the negotiation of an outline agreement on the long-standing dispute between Belize and Guatemala. The champagne was a bit sweet, the hour a bit early and the celebration premature. The agreement was later turned down by Guatemala's leaders.

Today, the problems arising from the Guatemala claim to the whole territory of Belize are still there. So are the British troops and Harriers "for an appropriate period". But Belize is still there, too, and by Central American standards thriving. Two questions remain: where is it, and why are we still there?

Churchill once said that he did not know where Guatemala (or presumably Belize) was and he was not going to start finding out so late in public life. In fact Belize sits facing Cuba on the Atlantic coast just below Mexico, its frontier with Guatemala suspiciously squared off. It is not seething with subversion, but a stable democracy with unarmed policemen.

George Price, the Prime Minister and leader of the main political party, the People's United Party, is something of an ascetic. A devout Catholic, he drives an old Land-Rover, works hard, and is untainted by corruption. His quiet, serious manner is effective internationally. The economy, based on sugar, fruit, fishing and forestry, has been buffeted by the recession, but has held up reasonably well with aid from Britain, the US, Canada and Mexico. The population is tiny: 150,000.

My fellow champagne drinkers on the Belize side were ethnically variegated. The country is an example of successful miscegenation, with Carib Indians, Hispanics, descendants of black slaves and now some Asians living together with little difficulty. Price himself has Welsh and African ancestors. The country is equally colourful. It is mostly jungle, with village names like "Double Headed Cabbage" and "Banana Bank", huge tarantulas, frogs that jump at you (spring chickens), parrots and Booby birds. The Victorians made furniture from its mahogany, and the Americans chewing gum from its sapodilla trees.

The dispute with Guatemala revolves around an obscure quarrel about a road. The 1859 treaty by which the Guatemalans recognized the frontiers of Belize (then British Honduras) spoke of linking Guatemala City to the Atlantic coast. The British showed willing, but in the end the treaty was denounced by the Guatemalans, who decided to claim the whole of Belize instead. The claim was written into their constitution in 1946, thereby engaging national pride (another reason for not having consultations).

There seems no reason for Mr Price to save this pride by dismembering his country, especially in the run-up to next year's election, which will be the first since independence in 1981. The British case has been frequently supported by the United Nations Organization, which has now also endorsed Belize's right to independence, self-determination and territorial integrity.

But it is not a happy situation for Britain. We do not like having troops in an independent country in a volatile part of the world, and in a situation not totally under our control. What if the Guatemalan guerrilla war overflows, as in El Salvador, with refugees, close pursuit and the rest? Moreover, the cost of the garrison, though not remotely comparable to that of the Falklands, represents an unwelcome charge on our forces and on the Treasury. All this argues for getting out as soon as some agreement with the Guatemalans or regional security arrangements can be negotiated.

There is another way to look at the problem. It is no secret that a discreet British presence in the combustible Central American area is comforting to Washington in these uncertain times. We cannot and should not become involved in the wars of the region. But we can, and perhaps should, avoid any precipitate movement out of Belize which might add to Washington's headaches. Seen in this light, our presence is an honourable and cost-effective contribution to our major ally's search for stability in an area of crucial security interest to it.

And such is international morality that many of those who accused us of staying too long in our own territory in the South Atlantic would be the first to criticize us for moving too soon out of somebody else's.

The author, Conservative MP for Buckingham, was formerly Lord Carrington's private secretary.

Philip Howard

Dog-knobbler days with the beagles

When August with his driving rain has washed away the heatwave of July, then good hawks long to go on holiday. They are unchained us from our typewriters at the word-factory and we have scattered around the nooks and crannies of the world, blinking a little in the sunlight like canaries escaping from our gilded cages.

The place to go on holiday is somewhere quite different, where people know nothing and care less about the *sturm und drang* of daily journalism, where the phone rings only for talk about country matters, and where the most exciting event of the week is the price of black-footed sheep at the market.

Such a place is darkest Ayrshire, which has been mercifully untouched by history since our rude forefathers of the Stone Age built their circular huts on the damp and barren hills. Agricola's legions passed through and left not a Roman rucksack behind there. There have been covenants and other little disturbances of life, but the locals were, as usual, too busy killing deer to pay much attention.

That was a use of deer in its original meaning of an "animal of any sort; of Shakespeare's 'rats and mice and such small deer'" where he was not being facetious or cute. The German counterpart of the word, *Tier*, has retained its original meaning of any old animal, as in *Tiergarten*, an animal garden or zoo. In Scottish and English the word has changed its meaning to signify one kind of animal only, the kind with antlers that our Notting Hill beagles chase through the bracken. Diana only knows what they will do if they ever catch up with ome.

Up here in Ayrshire the locals are still busy slaughtering animals of all kinds, minding their own business, and letting the rest of the world go by. Not a ripple of the troubles of Central America or the tedious contest for the leadership of the Labour Party disturbs the even tenor of the columns of the local newspaper, which are full of television and football candy floss, and pictures of brides with grooms in kilts and mothers with bonny babies, and the bard stuff of fatstock prices.

The estimation of journalism as a way of earning a living has not

moved on much since Sir Walter Scott was asked for advice by John Gibson Lockhart, who had been invited to edit a proposed new Tory newspaper: "Your connection with any newspaper would be disgrace and degradation. I would rather sell gin to poor people and poison them that way, besides no gentleman can ever do that sort of thing by halves. He must while he retains a rag of shirt to cover his nakedness, be inferior to the bronzed, mother-naked, thorough-going gentleman of the press."

Quite so. It is a good place for the hack on holiday, especially any hack in danger of the occupational vice of taking himself and his trade too seriously.

It is a grand year up here, as usual, for the wild raspberries and after the first few days you no longer notice the nettle stings and thistle scratches as you pick them. Pass me that shaggy orange fly, improbably called a dog-knobbler, which the local potcher swears has had to be banned down south because it is too attractive and unfair on the fish.

Fortunately, it does not seem to have that lethal effect on canny Ayrshire trout. Angling may be said to be so like mathematics that it can never be fully learnt, or indeed even partially learnt by some of us. But there is satisfaction and relaxation in sitting all afternoon in a boat on the loch, untangling the almost inextricable knots that an imprudently cast fly can tie itself into in the twinkling of an eye.

Of course you need some good solid books as well for a rainy day. I have lugged up north the very solid four-volume history of *The Times* for our bicentennial preparation, and for light reading and frivolity have discovered in an attic the ninth edition of the *Encyclopaedia Britannica*. We are grooming fat animals for the agricultural show, the big event of the year. There is a plague of rabbits, which have survived myxomatosis, snares, frequent egg-cases with strychnine, and baggots. There is a plague of midges. So what else is new?

In short, life in darkest Ayrshire rolls peacefully on much as it has since the Stone Age. Dynasties pass. Fleet Street may be in an uproar. Up here, we have more important things to fuss about.

food and machinery reached this country from the United States and Canada. Of course, 40 years on, British agriculture has become more efficient and has a greatly increased output. However, modern warfare is also vastly more precise than it was 40 years ago. Even if we totally ignore the nuclear dimension, well-directed attacks on power stations, water treatment plants, spare parts depots and fertilizer factories could completely disrupt our agricultural system, reducing production by perhaps four-fifths. The same would apply elsewhere in the industrialized world. The action of an enemy need not be directed even to food production centres, because power stations, distribution and transport networks and fuel depots would be natural targets in any conflict.

Oce should not ignore the possible effects of such a breakdown in the food distribution system on ordered behaviour. The possibility of a situation arising in which food was available only to a limited or to a selected part of the population would lead to wide-scale civil disorder. One may equally imagine the effects of hunger on a nation which possesses nuclear weapons but does not wish to use them. If the inhabitants of Leningrad had known of such a major weapon they would eventually have used it, no matter how greatly this offended their moral principles. Hunger is a powerful force.

So, important as it is that the nuclear debate continues, the aim of any national policy of national security must not confine itself to avoiding nuclear war or suggest that conventional war is in any way acceptable; it must concentrate on the overriding need to avoid all forms of war.

Mr Hermann Bondi, previously Chief Scientific Adviser to the Ministry of Defence, and Dr Bowman, previously Director of the Centre for Agricultural Strategy, are now chairman and secretary of the Natural Environment Research Council. Jonathan Bates is a freelance writer.

Though Britain managed to survive on a minimal diet during the Second World War this was mainly because a relatively large supply of produce from the countryside to a largely urban population. Food processing and distribution have become complex activities, heavily dependent on techniques such as pasteurization, freezing, freeze-drying and the application of chemical additives for preservation.

However, the effect of these changes has been to increase sharply the vulnerability of the food production supply chain. There are three critically essential inputs to the modern agricultural system: fossil fuels, electricity and water. A disruption to the availability of any, even for a few days, would have serious consequences. There are just not enough people available to milk cows by hand. Equally, if the electricity fails there will be no way to save the bulk of the milk produced. In the absence of water and ventilation, poultry in battery cages and broiler houses would have to be killed. Without fossil fuels it would become extremely difficult to distribute food.

The short-term consequences of any disruption to the system would be noticeable in towns and cities within weeks. We would soon see a sharp reduction in supplies of frozen goods, milk and eggs. While the staple foods such as grain and potatoes would not be so quickly affected the consequences of disruption for more than six months would be severe. As a conventional war dragged on, the availability of liquid fuels and machinery spares would become even more restricted, with inevitable consequences.

Food has been so plentiful in Britain for so long that a sudden disruption in supply is hard to imagine. Hermann Bondi, John C. Bowman and Jonathan Bates warn how it could happen in war - even non-nuclear

Famine, the forgotten enemy

Food has been so plentiful in Britain for so long that a sudden disruption in supply is hard to imagine. Hermann Bondi, John C. Bowman and Jonathan Bates warn how it could happen in war - even non-nuclear

changing rapidly, largely because of a substantial increase in mechanized methods. Whereas the horse was once the major means of power and transport, we are now dependent on the tractor, which in turn depends on oil. In Britain alone this has released almost 10 million acres of land previously used to produce food for horses to produce food for people.

The genetic potential of crops has also increased, the application of appropriate levels of fertilizers and pesticides has become routine and the cultivation of land and harvesting of crops takes place at the optimum time because of new machinery. Yields of the important staple grains are now virtually independent of the vagaries of climate.

Livestock production has undergone a similar revolution. Cattle, pigs and poultry are now housed in heated and ventilated buildings with piped water and mechanized feeding. Vastly improved methods of hygiene, together with vaccines and medicines, control the most significant disease problems. Automated manure disposal, machine milking and automatic egg collection contribute to the low levels of labour required for livestock husbandry. All these systems depend on regular, uninterrupted supplies of electricity, liquid fuel and gas, and water.

While these changes have been taking place, a revolution has occurred in food distribution. Whereas distribution was once based around local markets and small, independent shops selling fresh produce, we now have a complex chain of food processing organizations, transferring farm

produce from the countryside to a largely urban population. Food processing and distribution have become complex activities, heavily dependent on techniques such as pasteurization, freezing, freeze-drying and the application of chemical additives for preservation.

However, the effect of these changes has been to increase sharply the vulnerability of the food production supply chain. There are three critically essential inputs to the modern agricultural system: fossil fuels, electricity and water. A disruption to the availability of any, even for a few days, would have serious consequences. There are just not enough people available to milk cows by hand. As a conventional war dragged on, the availability of liquid fuels and machinery spares would become even more restricted, with inevitable consequences.

Though Britain managed to survive on a minimal diet during the Second World War this was mainly because a relatively large supply of produce from the countryside to a largely urban population. Food processing and distribution have become complex activities, heavily dependent on techniques such as pasteurization, freezing, freeze-drying and the application of chemical additives for preservation.

High drama on the moors

In the days when we never had it so good, you knew that the Establishment had started its summer holidays when you saw newspaper pictures of the Prime Minister and his parliamentary colleagues relieving their political frustrations on the grouse moor. Although today is the opening of the grouse season, it is not expected that Mrs Thatcher or Mr Tebbit will take to the butts, but in the coming weeks there will be no lack of top people in exquisite tweeds blasting matched shotguns at swarms of grouse driven straight at them by lines of beaters. On the stubby hills and boggy moors of Calthness, however, where the grouse are too few to be worth driving, the Glorious Twelfth will be celebrated in a more arcane way by the few dedicated individuals who hunt grouse with trained falcons.

Of the estimated 10,000 to 20,000 falcons throughout the world, no more than 20 practise the mysteries of grouse-hawking. They include an insurance broker from Lincolnshire, a potter who gave up his job as a Reading schoolmaster to live near his beloved moors, a French manufacturer of bathroom furniture, and an Italian count who takes leave from his family aerospace company to seclude himself and his hawks in a shooting lodge 14 miles from the nearest road. Occasionally, Arab dignitaries join the hawking parties, but they find the sport too artificial, preferring their own more casual style of falconry - nowadays often conducted from the air-conditioned comfort of a vehicle.

Indeed, grouse-hawking is the most stylized branch of the falconer's art, a ritual as formal as a medieval pageant or a game of cricket. In most forms of falconry, the falcon is flown at quarry already on the wing, making the falconer little more than a spectator of the ensuing flight. In grouse-hawking, however, the falconer contrives to dictate the course of the flight by carrying out a series of preliminary manoeuvres involving the cooperation of man, dog and falcon.

First a pointer or setter is run until it scents game and marks it. Then the falcon is cast off and allowed to ring up to a commanding height over the point. When the falcon has reached her "pitch" and is steady overhead, the dog is ordered to flush the quarry and the falcon stoops, using the advantage of height to overhaul the grouse as though it were standing still.

At least that is what should happen. In practice, the alliance often breaks down, enabling the dog to escape. Sometimes the dog false-points at a bark or hare, and the falcon may show her contempt by stooping at her hand-god partner. Occasionally the falcon drifts away downwind or gives chase to a distant pigeon and is lost, sometimes permanently: a recent survey among British falconers revealed that about 30 per cent of trained falcons eventually sever the partnership and return to the wild.

The grouse themselves, made cunning by encounters with wild prey, are anything but easy prey. They fly low and fast, hugging the contours or keeping to gullies so that the falcon is denied air-space for a telling stoop. They make for fences or other obstructions, timing their approach so that they can jink over or under the obstacle as the falcon closes. When hard-pressed, they may literally fling themselves to the ground, bouncing up like a ball and flying off in another direction while the falcon is carried out of position by the impetus of her stoop.

As the season progresses, they grow wilder, running ahead of the dog and exploding into flight before the falcon can be put on the wing. Once that menacing anchor profile is overhead, though, they sit tight, so falconers who fly late in the season cast off their hawks as soon as they reach the moor. A falcon wedded to her quarry will follow her trainer for half an hour or more.

Hawking on horseback: a seventeenth-century engraving

Few species of falcon can take grouse consistently or well. The Italian count hunts with a gyrfalcon, a large and beautiful raptor species with plumage the colour of birch bark and lichen. In the medieval pecking order, gyrfalcons were assigned to no one below the rank of king, in a show of conspicuous onepmanship. Genghis Khan hunted with 20 of them from a palanquin borne on the backs of four elephants. Nowadays, most grouse-hawkers use peregrines - only fit for a prince according to the fifteenth-century *Boke of St Albans*, but universally recognized as possessing the ideal combination of speed, stamina and tractability.

One of the best peregrines that will be taking the field this year is Melody, a six-year-old female bird that was taken as a nestling - or, in falconer's parlance, an interwived cyast falcon. In fact, there is no term in falconry adequately to describe Melody's ancestry, for she was hatched in captivity from an artificially inseminated egg. With a virtual ban on taking wild peregrines since the population crash of the 1960s, most falconers this season will be flying birds bred in captivity by methods developed at Cornell University.

If Melody is flown today, she will be taken from her mews in the morning and offered a bath, since a falcon that is flown without bathing is likely to rake away in search of water. When she has bathed she will preen - a lengthy process carried out as meticulously as the servicing of a jet fighter. Sometime during the morning she will probably cast up a pellet of undigested feathers and other bones from her last meal, and after

current were being passed through their bodies.

Melody was unhooded, but she showed no hurry to fly. She roused and bobbed her head, then, as a breeze caught her, relaxed her grip on the gawntlet and was airborne. She clipped over the dogs' heads and began mounting in wide circles, occasionally looking down to check on the position of the field. At 400 feet she made a narrow turn and rested on the wind, indicating that she would climb no higher.

For a few seconds the falconer contemplated the scene he had orchestrated. In the stillness before the grouse is flushed, there is a tangle sense of communion between the falconer, the dogs standing rigidly on point and the tiny silhouette drawn taut as a bow against the sky.

The grouse burst out of the heather, Melody turned over and drew in her wings, falling like a teardrop and parting the air with a sound like tearing paper. There was no sense of violent contact - just a puff of feathers and a dark shape tumbling to the ground. Melody was already plucking the grouse by the time the falconer reached the spot where it had fallen.

Today there will be a race to set the first grouse of the season on some select West End table. If Melody does kill on her first outing, her falconer will not only take vicarious pride in her achievement, but can sit down to eat without having to worry about damaging his teeth on lead shot.

THE TIMES DIARY

Poll stars

Saatchi and Saatchi have just won yet another election. Margaret Thatcher's favourite advertising agency were called in at short notice to put the finishing touches to President Shibu Shagari's successful bid for re-election in Nigeria. Saatchi are getting a little blasé about such achievements. When I called to congratulate them, the account executive to whom I was connected said: "President Who?"

Tripe in, tripe out

Sir Brian Hayes, permanent secretary at the Department of Trade and Industry, recently inspected the DTT's computer centre at Eastcote. At his last department, Agriculture, Fisheries and Food, Hayes fulfilled a similar engagement and fed into one of the computers the name of the chief regional officer who was standing beside him boasting of the equipment's capacity for storing information about personnel. The computer responded: "No such officer exists." Determined not to embarrass an underling again, at Eastcote, Hayes tapped his own name into the data system. It promptly provided him with full details of the Hayes Tripe Company.

Labour of love

Publisher Aidan Ellis took to last year's Frankfurt Book Fair designs by Jonathan Biggs for *The Pop-Up Kama Sutra*. He sold £100,000 worth of rights in five hours. It has taken more than a year, though, to find anyone to print the book. Pop-up specialists are to Colombia (strict copyright), Singapore (strict morality laws), and Czechoslovakia (inability to promise how many copies of anything so deliciously decadent would ever leave the factory). Finally the contract will go either to Spain or Hongkong and the book, which Ellis promises will be both tasteful and witty, should appear in October 1984.

Poor layer

From Qatar a reader writes of a recent trip on an Inter-City 125. His order for bacon and eggs in the buffet met a refusal "because we have no eggs", followed swiftly by the offer of a bacon-and-egg sandwich. How could this be? "We do the eggs in the microwave oven and they don't look too good. But you don't see them in a sandwich."

Tooth's gap

A missing picture of the artist's wife is being urgently sought for the first full-scale exhibition since 1960 of the work of Sir Matthew Smith, whom Augustus John called one of the most individual figures in modern English painting. It is the only portrait Smith made of his wife Gwendoline, sister of Air Marshal Sir John Salmond. Painted in 1912, it was last heard of in 1978 when Tooth's sold it to a John Leslie who gave his address as c/o the Crown Commissioners. The commissioners have no knowledge of him. Vera Russell, who has chosen 90 paintings for the exhibition, which opens at the Barbican art gallery next month, says the tribute will not be complete without the missing canvas.

● A man called Fried in New York sells carpets. Accordingly his shop-front fascia says: Fried Carpets.

Humble pie

The great Cornish pasty competition ended yesterday, leaving the judges unanimously convinced that Mum baked better. Tesco arranged it, after their claim that their pasties were "as Cornish as they come" had excited some derision. They got 3,000 recipes, of which 10 were short-listed and cooked for the judges. The proper pasty is large, includes potatoes that are sliced, not diced, meat in chunks, not minced, pastry that is hard, not rich or crumbly, and edges curled so that tin miners with arsenic on their fingers could safely hold the crust and throw away that contaminated bit when the rest was eaten. David Penhaligon, Truro's MP who chaired the panel, said Cornish pasties were "unmentionable". After this experience he had new respect for his wife's pasties, his mother's, "and my mother-in-law's too, of course".

Those MPs still at Westminster are competing to obtain newly-designed House of Commons envelopes, which are much more distinguished than the old type. They now have the Commons portcullis in the top-left corner, but in place of the word "Official" on the right is this six-sided design of the Queen's profile, handsomely embossed in a style very reminiscent of the old penny black.

FEUDS IN THE CHOUF

The release of the three kidnapped members of the Lebanese government, through a relief in itself, has certainly not resolved the crisis in the Chouf, that beautiful and fertile area of Mount Lebanon south-east of Beirut in which is concentrated the greater part of the country's Druze population.

Kidnapping cabinet ministers may seem an excessively violent and dramatic way to make a political point. Even in Lebanon, such methods cannot be condoned. But this latest act of force was not sudden or unprovoked. It merely marked a small escalation in a conflict that has been going on for over a year.

Some would say for over a century. The conflict between Druze and Maronites, the two historic communities of Mount Lebanon, goes back to the mid-nineteenth century, when the Maronite peasantry of the mountain rose in revolt against the feudal shaikhs, most of whom were Druze. In the course of this jacquerie massacres occurred, the worst being carried out against the Maronites by Druze shaikhs and their partisans. French intervention then led to the disappearance of the old Emirate of Lebanon with its feudal order and the creation of a more centralised government under a Christian (but non-Lebanese) governor. Many Druzes emigrated to Syria, leaving the Maronites a clear majority.

The remaining Druzes continue to feel they have at least as good a right as the Maronites to regard themselves as the founders and guardians of Lebanese identity, whereas the other communities - Sunni and Shia Muslims, Melchite Christians - have tended to direct their loyalty towards foci outside Lebanon's frontiers: many, indeed, were only brought within those frontiers by their extension under the French mandate to form the Etat du Grand-Liban.

Regarding each other as authentically Lebanese, Maronite and Druze coexisted fairly successfully until the civil war of

1975 found them on opposite sides, partly because the outstanding Druze leader Kamal Jumblatt found his ambitions frustrated in a political system which gave the dominant role to the Maronites and the secondary one to Sunni Muslims. Jumblatt, a curious mixture of feudal landlord, social democrat, mystic and third-world liberationist, made himself the leader of the Lebanese "left" and formed an alliance with the Palestinian resistance movement in the hope of breaking this confessional system. In the process he antagonized his Maronite compatriots, including those (notably the Phalangists) who shared his ideal of a modernized non-confessional Lebanon but could not stomach his Palestinian allies.

Ironically, it was not Maronite resistance but Syrian intervention that deprived Jumblatt of his victory. In fact there was no serious fighting between Maronite and Druze in the Chouf until after Israeli forces occupied the area last year. The Phalangists, at that time allied to Israel, seized the opportunity to send troops into the area, and the Israelis unwisely allowed them to do so. The Phalange was a new element in the Chouf, whose Maronite inhabitants had traditionally been supporters of former President Camille Chamoun, and, by most accounts, the Phalangist interlopers behaved with no great tact.

Their attitude was that of the new masters of Lebanon, rather than of people seeking to heal the wounds of civil war and build a new national unity - a unity for which there were then some genuine prospects, since most Druzes and Muslims had come to share their antipathy towards the Palestinians. They insulted Emir Majid Arslan, the aged rival of the Jumblatts, and treated all armed Druzes, of whatever political persuasion, as "communists". Inevitably, a series of armed clashes began.

Many Lebanese believe that this conflict has been deliberately fomented by the Israelis on

the principle of divide and rule. That may be an oversimplification. It is probable that the Israelis initially intended to help their Phalangist allies whom, during the lifetime of Bashir Gemayel, they saw as the nucleus of a new and friendly Lebanon. Later their relations with the Phalangists worsened. In recent weeks the Israelis have been allowing the Druzes to obtain heavy weapons, and have given up any attempt to prevent shelling by either side. It seems probable that they hope to retain some gratitude and co-operation among the Druzes after their own withdrawal from the Chouf.

It appears that the Druzes are thus receiving tacit encouragement from Israel, as well as overt encouragement from Syria, to resist any attempt by President Amin Gemayel to impose his authority in the Chouf by sending in the Lebanese army. The Druzes see President Gemayel as a Phalangist president, and his army - especially under its present commander, General Ibrahim Tannous - as virtually a Phalangist army. Matters are further complicated by the fact that Kamal Jumblatt's role as Druze leader has been inherited by his son Walid, a highly unstable individual who has backed into the arms of that very Syrian regime which is universally held responsible for his father's assassination, and on its instigation has repudiated the legitimacy of President Gemayel because of the Israeli-Lebanese accord.

Lebanon cannot be revived unless the authority of the state and the president are accepted. But equally Lebanon will not be Lebanon if that authority has to be imposed on the Druzes without their consent. In any case, few who know the Chouf will believe that that can be done, and it would be a reckless Multinational Force officer who undertook to help do it. Difficult though it may be, the Druzes' consent must be sought and their aspirations respected.

THE HOW AND WHY OF THE HOW AND WHY

There are good reasons why successive governments should embark on the reorganization of the five research councils, the autonomous agencies which support research in agriculture, medicine, the natural environment, social science and science in general. For in their own estimation, the councils play a central role in the conduct of non-military research in Britain. Collectively, they spend more than £500 million a year on a great variety of activities.

The objective set for the councils is twofold - to enlarge the body of useful knowledge in fields such as agriculture, medicine and, fashionably, information technology, and to complement the support for scientific research in higher education that is normally provided by the University Grants Committee, in which the Science and Engineering Research Council predominates. The Government's recurring difficulty is that these two functions seem always to be unhappily married.

This no doubt is why Sir Ronald Mason has been asked to conduct a one-man inquiry into the organization of the research councils. Evidence that the system is not functioning as

intended has been accumulating for some time. Only last year, the Advisory Board for the Research Councils, which advises on the division of the science budget among the research councils argued that the dual-support system for university research is breaking down. Part of the reason is that universities are skimping on research support. Meanwhile, doubts have arisen about the clarity of purpose with which the research councils seek to accumulate useful knowledge.

All this implies that the outcome of the last upheaval in the affairs of the research councils, that recommended by Lord Rothschild in 1971, has not worked as intended. The plan then was that the applied research carried out by the research councils should be financed not by the Department of Education and Science but by the ministries most directly concerned, which were to equip themselves for their role as "customers" by appointing chief scientists capable of insisting on value for money from their contractors, the research councils. The experience of the past decade has been disappointing.

Sir Ronald Mason thus has a splendid opportunity. The Roth-

schild reorganization has not produced the upheaval intended but, rather, stasis. Too many research institutes have escaped the close examination of their function that might have been expected. Sir Ronald cannot in the two months allowed him suggest what happens to each of them, but he could usefully suggest some means by which their future is not entirely in the gift of the research councils which created them.

The most serious problem is the Science and Engineering Research Council, intended exclusively for the support of research in higher education. Universities may not be pulling their weight in the dual-support system, but the council itself has become too deeply committed to large central laboratories to be flexible. It is too ready to succumb to fashion (such as that for information technology) and to defend anomalies such as its ownership of nearly a hundred houses in Oxfordshire, against the criticisms of the Rayner-unit. Mason needs a way of making this council into the instrument the research community needs most urgently - not just a paymaster but a leader for Britain's splendid but demoralized research.

THE BULLY OF THE BALTIC

The meeting of Prime Ministers of the Nordic countries which has just occurred in Helsinki resurrected the proposal for a Nordic nuclear-free zone. Promoted by the USSR and its allies since the 1950s, it has had strong advocates in the Nordic countries themselves, particularly in neutral Finland and Sweden. In the Nato members, Norway and Denmark, advocates of the proposal are also to be found. The appeal is emotional rather than logical.

Popular support for a Nordic nuclear-free zone tends to fluctuate with the East-West political climate. Events such as the invasion of Afghanistan, imposition of martial law in Poland, Soviet submarines and bombers violating Scandinavian territory, all make the proposal appear less sensible, while the possible deployment of new US missiles in Western Europe, Soviet counter-threats and general stalemate at the Geneva talks, seem to increase its appeal.

The USSR promotes the concept largely for propaganda purposes in an attempt to present Soviet policy as one of peace. But the possibility, however remote, that Nato could be weakened by banning nuclear weapons from Norway and Denmark even in time of war, is sufficiently attractive to be worth some effort. For Nato countries

the idea suffers from fundamental defects: Soviet superiority in conventional forces would present an even greater threat since Nato's flexibility in responding to aggression would be reduced and the deterrent effect of the alliance damaged. The Nordic countries would still be in danger of nuclear attack because of the range of weapons deployed outside the proposed nuclear-free zone.

Soviet divisions in East Germany are equipped with nuclear weapons, and the Leningrad military district has missiles covering the whole Baltic area. In the Kola Peninsula alone there are dozens of airfields, two major bases for land-based nuclear missiles, and port facilities at Murmansk for nuclear-armed submarines.

There seems little possibility that the Kola and Baltic bases of the USSR would be included in any agreement. Appeals circulated clandestinely in Lithuania, Latvia and Estonia asking that the peoples of these Soviet-controlled republics be allowed some say in discussions of the Baltic zone have resulted in KGB persecution of those involved. Swedish suggestions that a nuclear-free zone must include inspection of Soviet submarine bases in the Baltic were greeted with stony silence in Moscow.

When the Finnish President

Mauno Koivisto visited Moscow in June to extend the Soviet-Finnish friendship treaty for a further twenty years, the question of freeing the Baltic Sea from nuclear weapons was discussed. However, the only precise Soviet offer in this direction concerns the removal of six Golf class submarines which are already obsolete and likely to be replaced anyway.

Verification of any agreement would be extremely difficult. The USSR has never acknowledged properly Swedish protests about the repeated violations of Sweden's territorial waters by Soviet submarines and the defiant Soviet reply to the public outcry in 1981 when a submarine ran aground near the Karlskrona naval base ignored the government's concern that it was armed with nuclear weapons.

The USSR is the only Baltic country with nuclear bases. The Nato members, Norway and Denmark, do not permit nuclear weapons on their territory in peacetime. Attempts to persuade them to ban Nato allies from bringing such weapons to Scandinavia even in wartime have not been successful, despite the efforts of Soviet diplomacy, communist parties, peace movements and the speeches of the former Finnish President Urho Kekkonen who for decades advocated the nuclear-free zone.

Places in society for young and old

From the Director of Population Concern

Sir, I refer to your article on the cost of pensions for the elderly in the next century (July 30) in which your correspondent expresses the fear that "a low birthrate means it is likely to be accompanied by a shrinking proportion of the population of working age" and that if the birthrate remains low "the burden of supporting the nation's elderly will be even greater".

There is no serious basis for this fear. Children, as well as old people, have to be supported by people of working age and are just as much of a "burden" on society.

A rough measure of dependency is the ratio of the number of those people of pensionable age and those under the age of 16 to the population of working age. Total dependency is lower for a lower birthrate (given constant death rates for each age group). Even if, as the birthrate falls, the percentage of the elderly increases at first, their numbers can be known well in advance and planned for accordingly.

On the other hand the financial burden on society of extra children is considerable. Their needs differ from those of the older generation, but they cost no less. Whereas the old incur high costs in pensions, and residential and medical care, the young incur the cost of education and mother-and-child health services.

Being in mind that many retired people can still contribute usefully to society, it seems probable that the burden of a dependent child is overall at least as high as that of a retired person.

We should take the long view: once a more or less stable population at a lower size were achieved, the number of old people in the population would also stabilize at a perfectly normal proportion. To conclude that there is a fear of an overwhelming burden of old people is one of the least defensible arguments used to advocate an increase in the birthrate for the United Kingdom.

It should finally be remembered that this argument is deployed in an economic setting in which there have been over a million unemployed since August, 1975, and where overmanning is estimated at several millions. It seems illogical to argue that a fall in the birthrate will not produce enough economically active people in the future when there are not enough jobs for those wanting employment now.

The effect of the continuing fall in the number of children born per family will be to increase the material standard of living of those

children that are born. But even more important, it will greatly increase the non-material standard of living - sometimes referred to as the quality of life.

Yours faithfully,
ERIC MCGRAW, Director,
Population Concern,
231 Tottenham Court Road, W1,
August 9.

From the Director of Age Concern, England, and others

Sir, As four British members of an international working group brought together by the World Health Organization to prepare material on self-care and health promotion among the elderly, we were encouraged to read Robert Bessell's letter (August 6), with its warning about the destructiveness of describing old people as a burden on the working population.

Setting aside the benefits we all derive from their past endeavours, in peace and war, we also recognize their immense contribution to our present wellbeing in a number of ways.

In many cases they do provide direct economic benefits by their work, and they are all consumers. Those who were made to retire on an arbitrary date cannot then be blamed for leaving the labour force.

The voluntary sector, properly valued by the Government, owes much of its strength to the accumulated skills and sense of continuing responsibility of those in later life.

As it happens, pensioners are the one group who pay twice for any inpatient care they receive in hospital through loss in pension. And, of equal importance, they provide stability in family life in practical ways as carers, as well as the generational links which give us our sense of continuity.

The contribution of older people to the arts, humanities, the professions and politics is generally recognized; but those who are less eminent do much to enrich younger lives, as my fortunate grandchild could testify.

Yours etc,
DAVID HOBBMAN (Age Concern, England),
JOHN HUNTINGTON (Health Education Council),
SALLY GREENGROSS (International Federation on Ageing),
KEITH THOMPSON,

World Health Organization, Regional Office for Europe, 8 Scheerjögvej, DK-2000 Copenhagen, Denmark, August 6.

Future of barn

From Mr Norman Howard

Sir, Your article on the future of the listed barn at Brockley Hill Farm (feature, July 29) amusing as it was, may have misled readers on some important points. Although timber-framed barns make better travellers than most kinds of historic buildings the Greater London Council does not encourage them to leave home, particularly where this would mean breaking up a family of agricultural buildings which have become attached to their old familiar surroundings and value their close relationship with one another.

In this case, however, the barn suffered very badly in a gale in the late 1970s when there was a partial collapse. It was part of a smallholding, inaccessible to the public, and the tenant farmer who held it on a fall repairing lease found it far beyond his means to reconstruct the barn with the expert care which the work required. London Transport, as the owners of the land, were similarly unable to spend heavily on a barn which served no operational purpose.

The future of the barn was

considered by the council's Historic Buildings Panel in August last year. It was agreed that if the cost of reconstruction was to come from the council funds this could only be justified by restoring the barn on a council-owned farm, where it would be widely enjoyed by schoolchildren and others. It is intended that it should form a home for an important collection of farm implements which the council wishes to put on public display.

The council is well aware of the philosophy of the Society for the Protection of Ancient Buildings, first advanced by William Morris as its founder. Its manifesto is opposed to unnecessary travel for ancient structures and my panel takes the same view. But this is a case where the SPAB, the Ancient Monuments Society, and the council all considered the journey to be necessary for the future health of the barn. As you rightly say, the Secretary of State for the Environment has already issued the necessary ticket.

Yours sincerely,
N. HOWARD,
Members' Lobby,
The County Hall, SE1,
August 3.

Soviet 'moles'

From Mr Nigel West

Sir, Professor Floud (July 25) has criticized those who have publicly described his father, Mr Bernard Floud MP, as a Soviet agent, myself among them. To support his contention that his father had never been a Soviet agent Professor Floud referred to private correspondence that took place between us in December last year.

The sentence he selected implies that I have had second thoughts about the comments contained in my history of the postwar Security Service, *A Matter of Trust*, apparently "confirmed in writing" to him that I had "no reason to believe that your father was ever disloyal to his country".

Since Professor Floud has decided to quote this part of my letter, I think it only appropriate that the

exact context be made clear.

In conclusion, I have to state that I stand by everything in *A Matter of Trust*. I would, however, point out that there are many different types of Soviet agents, and I have no reason to believe that your father was ever disloyal to his country. The Security Service were, and remain, equally concerned about Soviet "agents of influence".

In my book I described Bernard Floud as having been recruited as a Soviet agent while he was a student at Oxford. I also referred to him as an "associate" of Jennifer Hart. Mrs Hart has recently gone on record to confirm the fact that she had been recruited as a secret member of the Communist Party of Great Britain by Bernard Floud, whom she described as her "controller".

Yours faithfully,
NIGEL WEST
310 Fulham Road, SW10,
August 2.

Scottish salmon stocks

From Mr E. J. Lipscombe

Sir, The decline of salmon fishing in Scotland and the fears expressed by Sir Andrew Gilchrist (July 25) and others for its future, have been confirmed this spring when good water levels, following two dry seasons, have failed to produce any improvement.

Those of us who have travelled north for many years to fish the spring run on the Spey or wherever, to the considerable benefit of hoteliers, shopkeepers and their employees as well as owners of fishings, are reluctantly having to admit that it would be foolish to continue expending our substance for the privilege of fishing over virtually non-existent salmon runs, whilst legal and illegal netting is allowed seemingly unhindered to annihilate whole runs of the comparatively few spring fish remaining.

May we hope that the new Minister of State at the Ministry of Agriculture, Fisheries and Food will soon recognise the need for quick and decisive action to combat the deprivations of the commercial

'Alternative medicine' under scrutiny

From Professor P. N. Campbell

Sir, Although I am not qualified to practise medicine, I found your leading article, "Physicians, heal thyself" (August 10), deeply disturbing. Following as it did three articles on so-called "alternative medicine" ("Spectrum", August 8, 9, 10) I have to conclude that you set out not only to be provocative but also derogatory of the medical profession in this country.

To imply that our teaching in the medical schools is based on the concept that disease is caused by external agents and that "poor diet, lack of exercise, smoking, drinking and stress" are not important contributory factors is simply wrong. Such a phrase as "The hospital-based training of doctors leaves them ill-equipped to deal with psychosocial disorders" suggests that the authors of the articles have little knowledge of the current medical curriculum or awareness of the role of the psychiatrist.

The leading article admitted that the medical world has enormous scientific achievements to its credit, but correctly pointed out that it was not yet possible to treat effectively all diseases. At this point the merits of so-called holistic forms of therapy were promoted and it was suggested that the medical profession repudiates such therapy for dogmatic reasons.

Throughout the article the perfectly sound reasons for so-called repudiation are never mentioned. Is it not right that the claims for any therapy should be subjected to scientific analysis even though, at present, we do not understand the rationale for the treatment in scientific terms? It is admitted that few controlled experiments have been held.

Your leading article does not mention the encouragement you will give to the many unscrupulous purveyors of medicines and treatment who are out to make a lot of money from those in ill-health. Perhaps even more insidious than those who are downright swindlers are those who promote "cures" that can "at least do no harm and may do some good".

Experienced physicians do not doubt the impact of the personal outlook of the patient in the progress of disease and admit that there are aspects of the concept of "mind over matter" that are at present beyond our understanding. It is right, therefore, to open these aspects of medicine to general discussion. But to promote uncritically the concept of "alternative medicine" shows that you fail to understand the multidisciplinary approach to medical education which is not rigidly controlled by the medical establishment either here or in China.

Transport in London

From Mr James Booth

Sir, Mr Taylor (August 4) says that "Presumably the new traffic commissioners will be given the task of encouraging alternative private forms of transport".

Having just returned from a stay in Mexico, may I suggest as one of these alternatives a group or collective taxi system, which operates in the two largest and traffic-congested cities - Mexico City and Guadalajara. These taxis run in competition with individual taxis, the bus network and a developing underground train system.

Minibuses would have a set route, hold eight to 10 passengers, pick up and drop people where they wanted along their route and thus provide the convenience and cost to fill the gap in the service provided by our present forms of overground transport.

Yours faithfully,
JAMES BOOTH,
Old Bulkeley Coach House,
Englefield Green,
Egham, Surrey.

Nameless JPs

From Mrs Marjorie Jones

Sir, True, jurors are named in open court, as Mr Embrey writes (August 4), but not normally in newspapers and it was on the subject of newspaper publication of the names of JPs that this correspondence started.

Time was when court reports in local papers regularly included the names of the JPs, who were usually well known to the reporters. Nowadays the names will be wanted for publication only when they appear to be part of a news story - about some unusual decision in granting bail, or sentencing for instance. But newspaper editors have discovered that it can be difficult retrospectively to acquire information about the identity of justices. It appears to be nobody's duty to supply it on demand.

Yours faithfully,
MARJORIE JONES,
7 Southview Drive,
Walton on the Naze,
Essex.

A tiger's leap

From Brigadier W. M. T. Magan

Sir, I can confirm from my own experience the statement of the Hon J. W. Best, quoted by his son, Judge G. B. Best, in his letter to *The Times* of August 5, that a tiger can jump 17ft.

Many years ago, in the Indian jungle, I noticed the claw marks of a tiger on a tree trunk. I was so astonished by the height that I took the trouble, together with the Indian shikari who was with me, to measure the distance above the ground. It was marginally over 17ft. We supposed the tiger had been trying to catch a monkey - and it may have succeeded.

I have the honour to be, Sir,
Your obedient servant,
W. M. T. MAGAN,
St Michael's House,
Peckham Bush,
New Tombridge,
Kent
August 6.

Your message, if taken seriously, will merely encourage "quack" medicine, which will increase the misery of patients by raising false hopes and will channel scarce resources from research which, although not totally successful as yet, has an impressive track record in the conquest of disease.

Yours etc,
PETER CAMPBELL,
Courtauld Institute of Biochemistry,
The Middlesex Hospital,
Medical School,
Martiner Street, W1,
August 11.

From the Headmaster of Giggleswick School

Sir, Your leader today (August 10) and the recent articles to which it relates are timely. As a biologist by training, a headmaster by profession and a homoeopath by satisfied experience, there are two features of contemporary medical practice in this country today which disturb me.

First, is the arrogant reluctance of the medical profession as a whole to admit to the possibility of any value in healing methods for which there is at present no satisfactory scientific explanation for their efficacy. This leads to the failure to use, let alone introduce, trained doctors to, remedial methods which are well tried in practice and which often succeed where orthodox medicine has no effective cure or satisfactory ameliorative procedure. The ill person is, thus, denied available treatment or is frequently subjected to drugs or unnecessary surgery which may have undesirable side effects.

Second, there has been a growing and alarming practice of admitting people to medical training by selection which relies almost exclusively on the basis of ability in academic scientific knowledge as shown in A-level examinations or their equivalent. The interview seems to be a thing of the past.

Further, many admissions officers are quite happy to admit that they prefer a combination of mathematics, physics and chemistry to combinations which include biology or one of the Humanities subjects. This seems to emphasise a deplorable disregard for the importance of the personality of the potential doctor and his or her interest in living processes and human beings.

The fear is that our medical profession shows signs of becoming more and more a collection of glorified mechanics, each with his own narrow speciality, treating parts of bodies rather than whole persons. Yours faithfully,
I. D. WATSON,
Giggleswick School,
Settle,
North Yorkshire,
August 10.

Luis Buñuel

From Father D. C. Barrett, SJ

Sir, It is a pity that, when you decided to identify your correspondents, you did not include the writers of your obituaries. I am curious to know who was the author of the obituary in today's *Times* (August 1) on the film director, Luis Buñuel, which contained the statement: "His early education by the Jesuits at Saragossa goes a long way towards explaining his fierce anti-clericalism".

This is like saying that George Orwell's early education at Eton goes a long way towards explaining his particular brand of social conscience. *In itself* it goes no way at all, though, given other factors, it may in its time Eton has produced famous socialists and the Jesuits have produced famous anti-clericals, among them Voltaire and James Joyce. But the Jesuits are not in the business of producing anti-clericals any more than Eton is in the business of producing socialists. If the contrary were the case, then these two institutions have failed rather badly.

Should you see your way to publishing my letter, may I implore you to restrain your advanced wondrous technical machine from turning Buñuel into Brunel, as it almost did in the obituary ("Brunel"). Buñuel was another kind of engineer, and, to my mind, equally great in his own way. Yours faithfully,
D. C. BARRETT,
University of Warwick,
Department of Philosophy,
Coventry.

A Thames pageant

From Mr John Offen

Sir, Whenever discussion centres on the pleasures of London it is universally agreed that we have never made the best use of the Thames and indeed have architecturally turned our backs on it.

Would it not be an interesting idea to reproduce the superb livery barges and a royal barge to form some kind of river pageant? It would be of great interest to overseas visitors and make Londoners more aware of this sadly neglected asset. Yours faithfully,
JOHN OFFEN,
De Vere Cottages,
Kennington, W8,
August 8.

Intimations of mortality

From the Reverend Canon R. Robson

Sir, Being one of the last survivors of the old church pensions scheme whereby one third of my income was deducted to provide a pension for my predecessor, may I tell the true story of a ninety-year-old clerical pensioner who wrote to the Ecclesiastical Commissioners for his customary annual application form in order to apply for his pension. They sent him twenty forms! Yours faithfully,
R. ROBSON,
2 Oakham Court,
Sheffield,
August 11.

COURT AND SOCIAL

SOCIAL NEWS

The Queen and the Duke of Edinburgh will attend a reception at Guildhall to mark the golden jubilee of the Milk Marketing Board on November 2.

The Prince of Wales, chairman of the Prince of Wales's Committee, accompanied by the Princess of Wales, will attend the Red Dragon Ball, in aid of the committee and the Wales in Trust Appeal at Grosvenor House on November 29.

Princess Anne, President of the Save the Children Fund, will attend the premiere of *Oliver Twist*, in aid of the Save the Children Fund, at the Classic Cinema, Haymarket, on November 2.

Princess Anne, President of the British Olympic Association, will attend a reception to launch the association's appeal at Brelays

Bank, Lombard Street, on November 3.

Princess Anne, Patron of the Home Farm Trust, will open the trust's new home at Milton, Highgate, Milton, Oxfordshire, on November 7.

Princess Anne, Patron of the Riding for the Disabled Association, will attend the association's 1983 eve of conference dinner at the Redwood Lodge Hotel, Bristol, on November 14.

Princess Anne, Patron of the Riding for the Disabled Association, will attend the association's national conference and annual meeting at the Grand Hotel, Bristol, on November 15.

The Duke of Kent, as president, will visit the Automobile Association's National Training Centre at Wimbledon, Nottinghamsire, and, as Vice-Chairman of the British Overseas Trade Board, will carry out an industrial visit in the area on November 22.

Birthdays today

Sir Humphrey Atkins, MP, 61; Dame Frances Clode, 80; Air Marshal Sir Maurice Heath, 74; Lord Heycock, 78; General Sir Patrick Howard-Dobson, 62; Sir Anthony Jolliffe, 45; Mr. Norris McWhirter, 58; Baroness Phillips, 75; Lord Renton, QC, 75; Lord Rhodes, 88; Mr Peter West, 63; Sir Duncan Wilson, 72.

Barbers' Company

The following have been elected officers of the Barbers' Company for the ensuing year:

Master: Mr P. H. Champness; Upper Warden: Mr F. Lambert; Middle Warden: Mr J. F. A. Jones; Renter Warden: Mr H. F. Foxon; Deputy Master: Mr W. G. Cross; Clerk: Mr B. W. Hall.

Fortcoming marriages

Flight Lieutenant P. N. J. Applearth and Miss L. E. Callow

The engagement is announced between Piers, son of Mr and Mrs John Applearth, of Boldon Hall, West Boldon, Tyne and Wear, and Louise, only daughter of Mr and Mrs Ian Callow, of Marsh Hill Close, Kenley, Surrey.

Mr F. M. P. Campana and Miss A. J. Gready

The engagement is announced between Franco Mario, second son of Mr and Mrs Franco Campana, of Corina, Italy, and Alicia Jane, only daughter of Mr and Mrs Robert Gready, of Oakridge Lane, Gloucestershire.

Mr P. Davis and Miss A. Klitzgaard Bertelsen

The engagement is announced between Peter, eldest son of Mr and Mrs R. Davis, of Streatham, London, and Anne, youngest daughter of Mr and Mrs F. Klitzgaard Bertelsen, of Copenhagen, Denmark.

Dr J. Dunlop and Miss F. C. T. Walker

The engagement is announced between Jack, son of Mr and Mrs J. Dunlop, of Ballintrae, Ayrshire, and Fiona, younger daughter of Dr and Mrs A. I. T. Walker, of Sevenoaks, Kent.

Mr M. R. McV. Gubbins and Miss R. M. Aldins

The engagement is announced between Michael, son of the late Mr Rory M. S. Gubbins and of Mrs Jeanette Gubbins, of Old Granary Farm, Little Ouseburn, York, and Rachel, daughter of Mr and Mrs Richard Adkins, of Chase House, Baughurst, Hampshire.

Mr F. B. Hatfull and Miss A. Lersé

The engagement is announced between Francis, elder son of Mr and Mrs T. J. Hatfull, of Portland, Dorset, and Amanda, daughter of Mr and Mrs A. Lersé, of London, N.W.11.

Mr P. A. McAvoy and Miss L. A. Bird

The engagement is announced between Paul Jonathan, son of Mr and Mrs Adrian McAvoy, of London, S.W.1, and Loreta Ann, only daughter of Mr and Mrs Henry Thomas Bird, of Beckenham, Kent.

Mr L. H. Monk and Miss R. P. Howells

The engagement is announced between Lawrence, son of Mr D. L. Monk, of Sandhurst, Surrey, and Mrs Daphne Monk, of Sevenoaks, Kent, and Rosal, daughter of Wing Commander and Mrs M. A. Howells.

Mr C. J. Rose and Miss P. J. Mathews

The engagement is announced between Charles James, only son of Mr and Mrs C. J. Rose, of Famborough, Kent, and Penelope Ann, eldest daughter of Mr and Mrs J. C. Mathews, of Bleckley, Kent.

Mr C. W. F. Small and Miss J. D. Bailey

The engagement is announced between Christopher, only son of Mr and Mrs M. A. F. Small, of Warwick, and Judith Dorothy, youngest daughter of Mr H. J. Bailey, of Malvern Wells, and the late Mrs Bailey.

Mr A. R. Wood and Miss S. J. Miller

The engagement is announced between Andrew, second son of Mr and Mrs Robert Wood, of Aldwick, Sussex, and Susan, daughter of the late Mr Jack Miller and Mrs Katherine Miller, of Pimlico, London.

Marriages

Mr J. P. M. Hurst and Miss J. Smith Back

The marriage took place on Tuesday, August 2, at the Registrar's Office, Leeds, between Mr John P. M. Hurst, elder son of Mr and Mrs Mary Hurst, of Oakwood, Leeds, and Miss Jill Smith Back, eldest daughter of Mr and Mrs Raymond Smith Back, of Hertford, Hertfordshire.

Mr M. C. Rees and Miss E. S. Molesworth

The marriage took place on Saturday, July 30th, at Northam, Devon, between Mr Martin Rees and Miss Stephanie Molesworth.

Mr S. J. Scrimgeour and Mrs J. M. Carter

The marriage took place in Jersey on Wednesday, August 10, of Mr Simon J. Scrimgeour and Mrs Joanna M. Carter.

Penelope Keith, the actress, with the Earl of Harewood at Harewood House, Leeds, during the recording of a television programme on Capability Brown the landscape gardener. Miss Keith who starred in the series "To the Manor Born", also visits Chatsworth, Petworth House, Stowe and Blenheim Palace. The programme is due to be screened early next year.

Young help Anglican choirs to thrive

By Clifford Longley, Religious Affairs Correspondent

Singing in choirs in the Church of England is a pastime growing in popularity, according to a survey by the Royal School of Church Music.

It appears to be particularly attractive to younger people, and the stereotype of an elderly choir accompanied by an elderly female organist is virtually extinct.

The survey discovered that more choirs were gradually growing in membership than contracting. Compared with 30 years ago, there is a much higher proportion of female singers: in 1950 more than half a typical choir would have been made up of boy trebles, and the current ratio is less than a quarter.

Dr Berkeley Hill, who conducted the survey for the school with a grant from the Ecclesiastical Insurance Office, states in his report: "Pessimism about declining choir membership because of competition from television, sports, and greater mobility is not generally supported by findings from this survey. On the contrary there is reason to think that a modest expansion is occurring."

The most common service is the modern (Rite A) eucharist from the Alternative Services Book.

Although nearly half a typical choir's membership will be under 16, the next most common age group is between that age and 24. Choristers over 65 are uncommon, as are male altos.

Report available from the Royal School of Church Music, Addington Palace, Croydon, E3.

Latest wills

Latest estates include (net, before tax paid):

Anderson, Mr Harold William, of Little Hallingbury, Essex, master baker and confectioner, £242,383.

Beckett, Mr Alfred Frederick, of Bedford, Northamptonshire, £603,740.

Cornhill, Mrs Nora Mavis, of Bedford, £216,431.

Deal, Mr Edwin Thomas, of Amsbury, North Yorkshire, £13,381.

Brooke-Booth, Mrs Mathilde Leonie Ghislaine, of Northwood, London, £315,153.

Dobson, Mr Arthur Denison, of Fleet, Hampshire, former managing director of Associated Dairies, £268,335.

Evershed, Mr Norman William, of Harpenden, Hertfordshire, company director, £470,801.

Lister, Sir Charles Percy, of Charlton Kings, Gloucestershire, Deputy Lieutenant of Gloucestershire, £234,390.

Newsham, Mr Alfons of East Finchley, London, £900,000.

Ottawa, Mr Mohammed Ali, of Tripoli, Libya, intestate, estate in England and Wales, £407,129.

Rosenow, Mr Archibald Turnbull, of Thompson, Norfolk, £663,003.

Spalding, Mr Charles Walter, of Forest Row, East Sussex, £291,795.

Wightman, Mr Gerald, of Church Brampton, Northamptonshire, chairman and chief executive of Skitchley, the dry cleaning company, £162,118.

Warburg, Mr Hew Francis, of Golders Green, London, £248,498.

Latest appointments

Latest appointments include:

Mr David Dickinson, to be editor of *Newnight* BBC's current affairs programme, succeeding Mr David Lead, who is to be editor of the new 60 Minutes programme on BBC1.

Brigadier D. E. Worsley to be Honorary Physician to the Queen from June 11.

Brigadier A. J. Shaw to be Honorary Physician to the Queen from August 11.

Mr Gordon Jones to be chairman of the Yorkshire Water Authority from October 1. He succeeds Mr Peter Coverdale, who will be deputy chairman.

Church news

The Rev Peter St George Vaughan, Principal of Crowther Hall, Birmingham is to be Archdeacon of Westmorland and Furness, in succession to the Ven Arthur Henry Atwell, Bishop-designate of Sodor and Man.

Bishop's vote

A petition was launched in Douglas yesterday in support of the Bishop of Sodor and Man retaining his voting powers in Tynwald, the Isle of Man Parliament, where a draft constitutional Bill proposes removal of his vote.

OBITUARY

ADMIRAL JOSE PINHEIRO DE AZEVEDO

Leading role in Portugal's revolution

Admiral Jose Baptista Pinheiro de Azevedo, who died in Lisbon on August 10 at the age of 66, played a leading part in Portugal's revolution in April, 1974, and was later briefly Prime Minister from September 1975 to June 1976.

In the turbulent period after the revolution he came to be identified with the revolutionary socialist faction within the Armed Forces Movement, and because of that was accepted as Prime Minister by the Communists. But his government, which also included the Socialists, modified earlier commitments to "the revolutionary process towards socialism", and was sharply opposed by the extreme left.

In November, 1975, Pinheiro de Azevedo was himself besieged in his official residence by Communist-led construction workers. The government declared itself on strike unless the armed forces guaranteed its safety, and only went back to work after loyalist troops had put down a revolt of paratroopers in the Lisbon area.

The failure of this revolt strengthened the position of the moderates, and Pinheiro de Azevedo's own political position changed. By March, 1976, he was saying that Portugal should concentrate on building a western-style democracy and not "unrealistic socialism".

He was born on June 5, 1917, in Luanda, in Angola, where his father was a civil servant. He began his naval career in 1934, when he entered the Portuguese naval academy. From 1963 to 1965 he was back in Angola as commander of the sea defences at the mouth of the Congo. From 1969 to 1971 he was naval attaché in London.

In 1972 he was appointed commander of the Marine Corps, and it was in that position that he played a part in the preparation of the military coup. Like many others, he believed that there could be no military solution to the rebellions in Portuguese Africa,

and he used his position to make contact with Navy men throughout Portugal. Early in 1974 he became a member of the coordinating committee of the nascent Armed Forces Movement.

After the coup Pinheiro de Azevedo was promoted to Admiral, and ranked third in the hierarchy of the Junta of National Salvation. He became Naval Chief of Staff. His government, appointed by President Costa Gomes after criticism by moderates of the pro-Communist tendencies of General Goncalves's administration, was the sixth to be formed after the revolution.

After meeting the challenge from the left, Pinheiro de Azevedo decided to stand as a candidate in the presidential election in June, 1976. But he was not supported by any of the political parties, and had a hard attack during the campaign. He only received 14 per cent of the vote.

Pinheiro de Azevedo was a man with a bluff and forthright manner, who was known for speaking his mind freely, and became known as the "Admiral without fear". After resigning from the Premiership, he was publicly critical of President Eanes, his successful rival in the presidential election, accusing him of having been an obedient servant of the dictatorship.

CLYTIE HINE MUNDY

Peter Pears writes: The death has recently occurred in New York at the age of 96 of Clytie Hine, who was from 1911 to 1919 a leading member of Sir Thomas Beecham's Opera Company.

Born in Australia, she came to England to study at the Royal College of Music, where an annual prize was later founded in her name. She was a strikingly beautiful woman with a fine lyric voice.

In the early 1920s she went to New York with the Beggar's Opera Company on tour and stayed there with her husband

John Mundy who for many years led the cellos in the Metropolitan Opera Orchestra.

Clytie became a most successful voice teacher, especially in the Musical Theatre number Alfred Drake as one of her best known pupils. I had the pleasure of studying with her for some time and was much helped by her straightforward direct teaching.

She was a most lovable person and a wonderful friend. She was the mother of Meg Mundy, the actress and of Juko Mundy, the medieval historian.

Mr Allan Royle, CBE, who died on August 8 at the age of 78, was Town Clerk and Clerk of the Peace for Wigan from 1946 to 1969. He was also deputy chairman of the NW Industrial Development Association and an Hon Freeman of Wigan.

Sir Geoffrey Follows, CMG, who died at his home in Harare, Zimbabwe, on August 7 at the age of 87, had been a colonial administrator who was Northern Rhodesia representative on the Federal Interim Public Service Commission from 1953 to 1959.

University news

Manchester Appointments
Mr John Maxwell Irvine, reader in theoretical physics, has been appointed to a personal chair in theoretical physics from August 1.

Lecturers
I.C. Mackie (clinical health); P. Hodgson (computer science); P. P. H. Jones (mathematics); G. W. G. Wilson (social work).

Grants
Northampton: £26,500 to Professor A. J. Harris for a study of the effects of stress on the human immune system; £26,500 to Dr M. R. M. Taylor for a study of the distribution of antibodies in patients with rheumatoid arthritis; £26,500 to Dr J. P. Sullivan, J. P. Sullivan and D. R. Anderson for an investigation into the effect of various factors on the production of antibodies in patients with rheumatoid arthritis.

THE ARTS

Cinema

Potency of Fassbinder's hot-house imagination

Querelle (18) Screen on the Hill: Edinburgh Film House

Heaven's Gate National Film Theatre

Heartland Reggae (15) Screen on the Green

The most melancholy moment in Fassbinder's Querelle occurs at the very end: a written note about Jean Genet, author of the source novel Querelle de Brest, informs us that the date of his death 'seems to be near'.

Brad Davis, all at sea surrounded by murder and deceit in Querelle

camera wanders and the colour filters shift: we suddenly catch sight of familiar performers, all at sea: Brad Davis, the unfortunate hero of Midnight Express; Franco Nero; Jeanne Moreau, occasionally, and foolishly, bursting into song, Happier films, no doubt, await each and every one, for Fassbinder, alas, they were all in the past.

received in 1980, Heaven's Gate might well have become Michael Cimino's last film, too. American critics massed like huzzards to gnaw at Hollywood's latest golden boy (his previous film, The Deer Hunter, won five Oscars).

and quietly departed shortly afterwards. Luckily there is more to the story: as the resurrection of Napoleon proves, the length and lifespan of films are not necessarily determined by their original merchants, but the complete Heaven's Gate can now be witnessed at the National Film Theatre (tomorrow night Tuesday, two performances daily).

The extra footage, it must be said, does not substantially change the film's nature, virtues, or vices. The epic account of land barons and

immigrants clashing in late nineteenth-century Wyoming is still presented in gorgeous visual chunks, linked with token squirts of narrative glue. John Hurt's wistful intellectual still appears intermittently with the grating effect of a stone in a shoe. But the film eminently deserves another chance at its proper length, for few Hollywood products of recent decades have satisfied so well the spectator's basic craving for sitting back and gawping at the silver screen.

Cimino flaunts his visual treasure-chest with childlike delight. Observe the way he shows off his extraordinary set of Casper town: Vilmos Zsigmond's camera begins in the railway stationmaster's office, dashes on to the platform where a hulking train usefully steams in, then crosses the tracks to the towering buildings and milling crowds beyond; the set, moreover, is scarcely seen again.

But Heaven's Gate is not only a delirious spectacle mounted with anachronistic luxury; there are ideas and characters for consideration. Considering their fragile dialogue, most of the performers work wonders. Kris Kristofferson's onychalant charisma serves him admirably as the conscientious marshal striving to avoid conflict; Sam Waterston's cattle baron stalks effectively in satanic black; Isabelle Huppert, source of a triangular romance, is touchingly natural. Cimino's ideas have rather less luck: the concepts of civilizing the wilderness and educating America, first raised in Joseph Cotten's opening Harvard address, struggle with some difficulty through the visual set-pieces. Ooc emerges from the complete Heaven's Gate dubious, perhaps, about its intellectual worth, but dazzled and moved by cinema's magnetic power.

Back to mundane fare: Heartland Reggae is an artless compilation of concert footage shot in Jamaica during 1977 and 1978, narrated by a chucking voice who wisely remains anonymous. For students and fans of the reggae, the film usefully gathers the movement's great names (including Bob Marley and Jacob Miller) and points a finger at the social context. But no encouragement is offered to unbelievers; as 'Whip Them Jah' gives way to 'Legalise It, Yeh' (a reference to marijuana), even Anne Ziegler and Webster Booth seem preferable.

Nicholas Wapshott interviews Michael Cimino, director of Heaven's Gate page 6.

Intensity and guts: Ron Cook, Carolyn Pickles

Theatre

The Dillens Other Place

Emerging at the end of Ron Hutchinson's play (and after a three-and-a-half-hour ramble round the fringes of Stratford) with time to do little more than a bare report, I can at least record a job well done and plead with the RSC to revive it next year. It is a golden opportunity for them to capture the all-too-elusive local audience.

George Hewins was born in the workhouse, and on the wrong side of the blanket, within a few weeks of the 1879 opening of the first Memorial Theatre. He lived to be 98 in spite of being a little runty lad (rumt is what dillen means, though it can be simply a term of affection) and getting horribly woodcocked at the Foot.

He was as plucky as a terrier, as cunning as a rat and as ruddy as a sparrow. He had a sharp eye, an inexhaustible memory and a wonderful wit with language. And, fortunately, before he died, his grandson's wife Angela (quietly present with us in the audience) came to him with a tape recorder.

As soon as little George is old enough to walk, Barry Kyle's production is out of the Other Place, down past Holy Trinity Church to Lucy's Mill. We watch the cast, which includes more than a hundred local recruits, many of them children, picking strawberries in a field beneath the bridge, pitching a cheating pea-dealer into the Avon, drilled off to war.

Along the disused railway track we follow the show, moving a few yards further to stop for every brief scene as George (Ron Cook) starts work as a 56-hour week and meets his match, in more than one sense, in the tall and strapping Emma

(Carolyn Pickles). Eight children and some desperately hard times later, he gets to the point of being his own gaffer and laying bricks at a pound a thousand just as 1914 dawns. Our journey back is a torchlight procession behind a horse-drawn bus, Red-Cross requisitioned. A pause at the War Memorial for the Last Post and a roll call of Stratford's dead; and a brief epilogue back to the Other Place which ends as the book does with the hero's return on crutches to unemployment, housebound boredom, a pious but unhelpful welcome by the Establishment and the struggle to feed the family beginning afresh.

Simply as a feat of organization the production is an unimaginable achievement, but Barry Kyle also finds a few scoops for a director to get his teeth into. The war scene in particular is marvellous; crammed into a tent in a bare field on the far side of town, not all of us saw all of it, but the shells exploding in the scrub behind the grim-faced George, a dim glimpse of stretcher-bearers and snipers in the distance and John Leonard's sound effects were all we needed.

Ron Cook, who a few minutes earlier had been having the time of his life in a music hall knees-up, and had got through 15 years of ever more children and poverty in a few minutes, rose superbly to that scene. For his intensity and guts as much as his size, he is perfect casting. So is Peggy Mount as his great-aunt, guardian Cal, indomitably dispensing wisdom: "Never be afraid of the dead, my lad. They can't hurt you. It's the living as does that!"

It leaves you wishing that every theatre festival in a country town could come up with a celebration that shows the hardest side of local history with such grit and humour. But most other George Hewinses took the story with them to their graves. Stratford owes him thanks and is paying the debt.

Anthony Masters

Promenade Concert Cultivated Mozart

BBCSO/Leitner Albert Hall/Radio 3

Now in his seventies, the Berlin-born conductor Ferdinand Leitner made his Prom debut on Wednesday in a programme which was obviously, and often quite delightfully, right up his street.

His Mozart, as we heard in the first half, is crisp, cultivated and affectionate; the benevolent attentiveness and aphoristic grace of the opening movement of his Symphony No 36, the "Luz", gave the lie to Wagner's sneer about the rattle of dinner plates at a banquet. Modulations of harmony and metre were made urbanely, never didactically apparent, with even the Presto unfolding with a gentle inevitability of intent.

This discreetly illuminating approach can be cruelly revealing of ensemble with some fine, silverpoint wind solos, the BBC Symphony Orchestra almost unflinchingly stood up to close scrutiny both here and in the Violin Concerto No 3 in G in which Eugene Sarba was the soloist.

Now a gloss, and a high one at that, grew over Leitner's

painstaking direction: each note of Mr Sarba's opening Allegro quivered with tense, bright, nervous energy, phrases sharp and staccato, bowing short and light, and with a cadenza which epitomized the reading's capriciousness.

The fantasia between Sarba's finest, even glistery playing and Leitner's meticulousness gave the Adagio a fragile but edgy beauty and made the flurrying tempi of the final Rondeau as much of a battle of nerves as of wits.

After the interval, the car had to adapt from the tender brightness of Sarba's Mozart to the duller embers of Richard Strauss's Brahms, in a performance of the St Anthony Variations which communicated more duty than joy. The fun was reserved for Johann Strauss II - or so the arena determined it should be.

Eulging in Leitner's plush, even reverential readings of the Gypsy Baron Overture, and underlined by their comparative lack of élan, waltzers and boppers alike turned, twisted and applauded more than in all the Mozart put together.

Hilary Finch

Television Academics caught in the moonlight

Last night's edition of Campus (BBC1) may have been a confused and scrappy affair, but both in what it said and in what it did not say it was a fascinating sign of the times.

We were introduced to two professors at Edinburgh, John Erickson of defence studies and Jeff Collins of micro-electronics, both firmly ensconced in that military-industrial complex identified and exorcised by E. P. Thompson and his acolytes in the heady post-68 revolutionary days. From the relaxed manner,

however, in which questions about the sale - or at least use - of their expertise were deflected, it was clear that a decade's furious campaigning by Time Out and the New Statesman had gone for naught and that that notorious Penguin Warwick University Limited might as well have gone unpublished.

Collins went so far as to say that, in view of the disparity between academic and industrial salaries, it was incumbent on dons to put in some substantial moonlighting, say

60 days a year. Slightly haggard and owlish (or was it the camerawork?), he was confident that his "interfacing with industry" could only benefit his students. The impression given by the film (all it gave were impressions) was indeed of a cheerful and purposeful departmental community.

Erickson's haggard looks seemed more than adequately explained by the life he leads - maintaining his dominance as a world authority on Soviet strategy, making speeches to US naval top brass in Con-

nect, giving austere student tutorials, and all with the support of a single secretary. He has also built up a micro-film and journal archive of international repute (a beaming Max Hastings was seen consulting it), "paid for out of my own pocket". Whatever the depth of that pocket, British administrators must have been given food for thought by the contrast between the red carpet rolled out by his American admirers and the chicken coop provided at home.

Michael Church

Sir Peter Hall to be Glyndebourne artistic director

Glyndebourne began in May 1934 with two Mozart operas, Le nozze di Figaro and Così fan tutte. Both works will be in the fiftieth birthday season next summer, in revivals of Sir Peter Hall's productions.

Sir Peter, whose appointment as Glyndebourne's new artistic director has just been announced, is also responsible for the first new production of the season, Monteverdi's L'incoronazione di Poppea, which will be conducted by Raymond

Leppard and designed by John Bury. This is exactly the team staging the opera which marked Hall's first association with Glyndebourne, Cavalli's La calisto. The other new production of the season will be the first performance at Glyndebourne of Richard Strauss's Arabella, which will be conducted by Bernard Haitink. John Cox is the director and Julia Trevelyan Oman, in her Glyndebourne debut, the designer. The last revival of the season, another Peter Hall production,

is Benjamin Britten's A Midsummer Night's Dream. Glyndebourne's two major commercial sponsors next summer are IBM (Poppa) and John Player (Arabella). EMI will also be involved in the fiftieth birthday celebrations: the company is to record Glyndebourne's Don Giovanni, conducted by Bernard Haitink, next January. The cast is led by Thomas Allen (Giovanni), Richard Van Allan (Leporello), Maria Ewing (Elvira) and Carol Vaness (Anna).

The Stary Theatre of Cracow, following its appearance in the Edinburgh Festival, presents its Nastasia Filipovna at Riverside Studios from September 6 to 11. The show, based upon the final chapters of Dostoevsky's The Idiot, is directed by Andrzej Wajda, and stars Jerzy Radziwiłowicz, best known in Britain for his performance in Wajda's film Man of Marble. Sir David Wilcocks is to retire, at the end of next year, from his post as Director of the Royal College of Music.

In his last year as artistic director of South Bank Summer Music, Simon Rattle will be presenting in the opening concert on Sunday the first public performance in Britain of Osud, or Fate, the little-known opera Janáček wrote immediately after Jenufa.

The work was never performed in Janáček's lifetime; it had to wait for its premiere on Brno Radio until 1934; and it was first staged, and then only in a much rearranged version, in Brno and Stuttgart in 1938. František Jílek, who conducted the Brno performance, recorded the work in 1975-76 with the Brno Janáček Opera in an entirely illuminating and untempered version (Supraphon 1 12 2011/2); but its only authentic staged performance was in the 1978 production by the opera company of Česká Budějovice, and only then was the vocal score published.

Osud to a large extent brought its own fate upon itself. Not only does the awkward timescale of the piece, with its final act's opera within an opera, make its dramatic intention obscure, but the entire subject matter was too close for comfort. The story, a true one, about the destructive triangular relationship between a young girl, her vengeful composer-lover and her mad mother, found resonances within Janáček's own life which brought him too near the libretto to see its confusion and inconsistencies. So is a concert performance premiere in Czech not putting an immense strain on both the audience and the work itself?

Hilary Finch introduces South Bank Summer Music, which begins on Sunday with Janáček's little-known opera Osud A world unlike any other

Rattle (left) and Janáček: "It's a must"

"For a start, the audience will have a synopsis and translation", says Simon Rattle. "But the music is great enough to carry it; the story doesn't actually need to add up to a perfect Germanic equation. Anyway, it's no sillier than Trovatore and we've got used to that. What's so important is that the depth psychology connections in Janáček came from this piece, connections he was to develop a great deal later.

"About a couple of years ago, Oliver Knussen played me the beginning of the score - and from the word go it's obvious

that we're into a world unlike any other. Already the orchestration has changed completely from the Dvorak-like, heavily scored Jenufa. Suddenly the clarity of the Vixen is there - and so are the extraordinary difficulties. This is the first piece in which Janáček's style sprang forward: the use of fourths, the speech rhythms - they all belong to the late Janáček, and not in experimental form, but fully grown.

"It's crucial that the piece is played, and I hope it'll be just the first of a series of performances, so that people can see that the late works were not a phenomenon of the last five or

six years, but that this was the start of it all, I'm hoping that Welsh and Scottish operas will come and take it up. In a country where Janáček is so well loved it's a must."

Rattle grew to love Janáček when he was a child in Liverpool, a city which, under the baton of Sir Charles Mackerras and Sir Charles Groves, was an early pioneer of his music. Excerpts from The Cunning Little Vixen will be performed on August 20. "Having lived so long with the work, playing it at the Royal Academy, doing 20 performances at Glyndebourne and

on tour, I was desperate to hear the Sinfonietta play it. I've rarely had such withdrawal symptoms from a piece."

And then Sibelius. The symphony cycle which will span August 18, 21 and 28 is something that has obsessed Rattle ever since his very first concert with the City of Birmingham Symphony Orchestra. "The orchestra now has a feeling of possessio about the music - I really do think they know it better than any other orchestra, except possibly in Finland. Of course, we've had the opportunity to rehearse and play in Birmingham in a way that's just out possible in London." Birmingham and its orchestra remain Rattle's first love. "When they're playing at their best, I wouldn't be anywhere else in the world." Next year they will record Mahler's Das klagende Lied and the Schoenberg orchestration of the Brahms G minor Piano Quartet, one of Rattle's own favourite works, which the Loocho Sinfonietta will be performing on August 27.

At the moment Rattle is cutting down on guest conducting - "perhaps just once a year extra." The orchestra now has a feeling of possessio about the music - I really do think they know it better than any other orchestra, except possibly in Finland. Of course, we've had the opportunity to rehearse and play in Birmingham in a way that's just out possible in London." Birmingham and its orchestra remain Rattle's first love. "When they're playing at their best, I wouldn't be anywhere else in the world." Next year they will record Mahler's Das klagende Lied and the Schoenberg orchestration of the Brahms G minor Piano Quartet, one of Rattle's own favourite works, which the Loocho Sinfonietta will be performing on August 27.

TODAY

Interim: Alliance Trust, Ault and Wilroy, Prestige Group. Finals: Owen and Robinson. Economic statistics: Retail sales index (July), Tax-price index (July), Usable steel production (July), Index of industrial production (June - Provisional).

ANNUAL MEETINGS

Annual Meetings: Memory Computer, Berkeley Court Hotel, Lansdowne Road, Dublin 4 (11.00).

Steel production in the public and private sectors rose by 5 per cent last month compared with an average of 137,300 tonnes a week a year ago. In the first seven months of the year the weekly average was 390,500 tonnes, about 3 per cent down on the same period of last year.

Plessey has won the contract to install and manage the electronics and communications equipment for the new Falklands airport. This is the first time the Ministry of Defence has let a contract to a commercial company to coordinate the technical work at a military airfield. Plessey results, page 17.

Mr Jack Gill is to take over secretary of the Export Credits Guarantee Department when Mr Kenneth Taylor retires next month. He is director of the Department of Industry's Industrial Development Unit and a former secretary of the Monopolies and Mergers Commission.

A halt was called to dealings in the shares of William Whittingham, the housebuilding and film processing group which is expected today to announce agreed bid terms with one of two companies with which it has been talking. Tarmac is tipped by the stock market as the company concerned.

Worker-shareholders in the National Freight Consortium, the company led by the union to its work last year, are to get their third interim dividend this year.

Car production lifts GKN: domestic appliances help TI Profit increases by big engineering groups boost recovery hopes

By Our Financial Staff Two of Britain's main engineering companies provided evidence yesterday that they were beginning to recover from recession. Guest Keen & Nettlefolds, the largest engineering company in the country, reported that increased car production was boosting demand for components, helping the group to turn in half-time pretax profits of £38.1m, compared with £30.5m for the same period last year. And engineers TI Group showed, in a report of mixed news, that strong consumer demand for domestic appliances helped to produce half-time pretax profits of £6.2m, compared with £3.9m a year earlier and £600,000 in the second half of 1982.

Guest Keen & Nettlefolds Half-year to 30.6.83 Pretax profit £38.1m (£30.5m) Stated earnings 12.3p (9.4p) Turnover £979.5m (£988.8m) Net interim dividend 4p (same) Share price 179p, down 5p Yield 6.3% Dividend payable 9.11.83

continuing to trade at this improved level. After the severe downturn in business activity in the second half of 1982, GKN's British activities benefited from a gradual improvement in the economy and from the group's restructuring. In particular, the automotive-components companies benefited from higher British and American car production and improved productivity. But demand from commercial and agricultural vehicle companies remained low. GKN's formal offer for AE will be sent to shareholders within the next week. Both sides appear confident that the £67m takeover bid will go through despite efforts by brokers Laurence Prust, urging shareholders to reject it.

TI Group Half-year to 30.6.83 Pretax profit £6.2m (£3.9m) Stated earnings 5.5p (4.2p) Turnover £442.2m (£441.3m) Net interim dividend 2.5p (2.5p) Share price 160p Yield 6.7%

As the dollar continues to scale new heights against the Deutschmark and the franc, it is hardly surprising that apologists are surfacing in greater numbers to justify this apparently absurd state of affairs. Even before the Williamsburg summit, Mr Martin Feldstein, chairman of President Reagan's council of economic advisers, praised the inflow of capital into the US from a purely insular point of view. Using other countries' money helped to fuel US growth at lower interest rates or with less inflationary money growth than the budget deficit would otherwise entail.

City Editor's Comment Excusing 'spender of last resort'

As the dollar continues to scale new heights against the Deutschmark and the franc, it is hardly surprising that apologists are surfacing in greater numbers to justify this apparently absurd state of affairs. Even before the Williamsburg summit, Mr Martin Feldstein, chairman of President Reagan's council of economic advisers, praised the inflow of capital into the US from a purely insular point of view. Using other countries' money helped to fuel US growth at lower interest rates or with less inflationary money growth than the budget deficit would otherwise entail.

This is a sort of free market version of the locomotive theory and is open to the same objections that, as evidenced by American second quarter growth, it can set up an unsustainable or inflationary type of world recovery. Other countries can object that America's absorption of funds and high interest rates detract as much from others' growth as US imports add. But such theoretical niceties are really beside the point. The real threat posed by the huge advance of the dollar since 1981 is that it will destabilize world finances. The very fact that America has accidentally adopted the locomotive role is a reminder that capital flows rule the currency flows these days. Capital movements in the major currencies today affect trade patterns more than the other way round - as Britain discovered in 1981.

British bank delay on Argentine loan

By Peter Wilson-Smith Banking Correspondent British banks will not go ahead with today's planned signing of the long-delayed \$1,500m (£1,014.5m) loan for Argentina but other banks are being encouraged to go ahead and sign the agreement. It is hoped that British banks will add their signatures later. One of the main problems behind the delay has been continuing Argentine restrictions on British companies remitting dividends from Argentina. The British Government is now seeking to check that companies have been able to take money out of the country before giving British banks a signal that it is happy for them to go ahead with their part of the loan. The Bank of England is understood to be monitoring progress of a number of large British companies including Rio-Tinto, Zanussi and Shell, in trying to take dividends out of Argentina. However, it was unclear last night how much progress had been made. British banks including the four big clearers are due to provide about \$150m of the \$1.5bn loan which was originally due to have been signed in May but has been delayed by a succession of problems. Yesterday Señor Jorge Wehbe, Argentine Economy Minister, was locked in negotiations with international banks in New York. Señor Wehbe is believed to have told bankers that Argentina had lifted financial sanctions against Britain and was also prepared to waive a sovereign immunity clause in the loan documentation and amend domestic bankruptcy laws as demanded by international banks. However, the issue of British bank participation is still confused. The big clearing banks in effect extracted a public signal of approval from the Government before agreeing to participate in the Argentine loan because it was such a sensitive issue in the United Kingdom and had received a lot of bad publicity. They are now likely to go ahead with a signing unless the British Government once again indicates it is happy for them to do so. There is still some confusion over the extent to which bureaucratic delays rather than political decisions have prevented British companies taking money out of Argentina.

Yamani heading off price rise

The prospects of stable oil prices throughout the coming winter and possibly until mid-1985 has emerged after the adoption of new price and production targets by Saudi Arabia, Shaikh Ahmed Zaki Yamani, the Saudi oil minister, has headed off price increases demanded from other members of the Organization of Petroleum Exporting Countries by proposing and winning approval for an increase in the present production ceiling of 17.5 million barrels a day at an emergency meeting of Opec ministers at Taif, Saudi Arabia. Several Opec members had hoped that the Western world's pre-winter stocking would lead to prices rising above the present \$29-a-barrel benchmark. Faced with domestic balance of payments problems, several members of the Opec ministerial committee had hoped to force an overall increase in current Rotterdam spot-market prices of around \$31.50 a barrel. However, Shaikh Yamani pre-empted price rise discussions by announcing that Saudi Arabia would step up its oil production above the 5 million barrels a day level agreed at the March Opec meeting. Saudi output acts as an Opec "swing producer" and can quickly be used to regulate market demand.

Oils jump as Shell income tops £1.3bn

By Our Energy Correspondent Shell, the world's second largest oil company, has reported higher-than-expected half-year profits. Net income in the second quarter, at £621m, was £100m up on stock market expectations. The Shell profit and improved prospects of oil price stability led to oil shares rising on the London Stock Exchange. Shell's sales for the half-year were £25.9bn, up from £23.1bn in the previous half-year. Improved efficiency meant that net income on a replacement cost basis rose to £1.33bn compared with £953m, with increasing North Sea production playing an important role in the profit improvement. The weakness of sterling also helped Shell in the United States where profits rose by 19 per cent compared with the previous six months. Tax advantages announced by the Government in connection with North Sea exploration and production also helped. Current projections indicate that Shell is heading for full-year profits of £2.2bn, much more than brokers' forecasts. Ultramar, the other oil company reporting yesterday, also had its figures affected by tax changes for the North Sea. Half-year pretax profits were down from £85.9m last year to £70.1m although after tax the position is changed with profits of £47.7m, compared with £44m. Losses in Canadian petrol sales are largely to blame for the company's profit performance. Its North Sea investments are likely to make a more substantial contribution in the second half of the year.

Spring Grove takeover

By Wayne Lintott Spring Grove, the troubled clothing group which said last week that it was in takeover talks, has reached agreement with Sunlight Service Group. Sunlight will pay an estimated £16m for the laundry group which has seen profits drop sharply. Spring Grove has said that any bid would fall short of yesterday's 54p share price. Last month Spring Grove reported interim profits to last March down from £1.28m to £39,000. Analysts say borrowings are 107 per cent of shareholders' funds. Spring Grove's profits peaked in 1980 at £3.8m. Last year they dropped by £1m to £2.5m. Spring Grove paid £7.5m for St George's Group, the laundry company, last year. But instead of the expected £700,000 profit contribution from St George's, Spring Grove found poor accounting controls. Spring Grove inherited losses and write-offs totalling £800,000 over a six-month period and was consulting legal advisers in June. At the time of the takeover the value of St George's was in dispute among Spring Grove advisers. Sector analysts believe Spring Grove paid too much for the group and thus stretched resources which it needed to maintain cash flow at a time of increased competition. Suggestions that there could be a takeover fight for Spring Grove look unfounded.

Saudis raise production targets

By David Young Energy Correspondent The prospects of stable oil prices throughout the coming winter and possibly until mid-1985 has emerged after the adoption of new price and production targets by Saudi Arabia, Shaikh Ahmed Zaki Yamani, the Saudi oil minister, has headed off price increases demanded from other members of the Organization of Petroleum Exporting Countries by proposing and winning approval for an increase in the present production ceiling of 17.5 million barrels a day at an emergency meeting of Opec ministers at Taif, Saudi Arabia. Several Opec members had hoped that the Western world's pre-winter stocking would lead to prices rising above the present \$29-a-barrel benchmark. Faced with domestic balance of payments problems, several members of the Opec ministerial committee had hoped to force an overall increase in current Rotterdam spot-market prices of around \$31.50 a barrel. However, Shaikh Yamani pre-empted price rise discussions by announcing that Saudi Arabia would step up its oil production above the 5 million barrels a day level agreed at the March Opec meeting. Saudi output acts as an Opec "swing producer" and can quickly be used to regulate market demand.

Pound slips against dollar

Funds flowed into the dollar again yesterday pushing it above DM 2.74, although profit taking trimmed part of its gains. Sterling also came in for a bout of weakness against the dollar as selling pressure developed pushing the pound as low as \$1.4750. However, it recovered to close only 20 points down against the dollar at \$1.4800 and continued firm against Continental currencies with its trade-weighted value rising by 0.1 to 84.9. The dollar closed at DM 2.7325 for a rise of 80 points. The dollar was helped by the decision of the German central bank not to raise domestic interest rates and speculation on today's US money supply

Shares slip in active trading

New York (AP-Dow Jones) - Stocks turned mixed yesterday after giving up their broad early gains in active trading. The Dow Jones Industrial average was off two points after rising four points in early trading. International Business Machines was off 1/4 at 117 1/2; American Telephone & Telegraph off 1/4 at 65 1/2; General Motors off 1/4 at 68 1/2; Minnesota Mining & Manufacturing off 1/4 at 76 1/2; Texas Instruments up 1/4 at 107 1/2; NCR up 1/4 at 119 1/2; Dupont up 1/4 at 46 1/2; AMR Corp up 1/4 at 31 1/2; Sears Roebuck up 1/4 at 39 1/2; Eastman Kodak up 1/4 at 68 1/2.

P&O confirms Sterling

By Our Finance Staff Mr Jeffrey Sterling was yesterday confirmed as chairman of the Peninsular & Oriental Steam Navigation Company. He replaces Lord Inchcape on November 1, but will start tackling P & O's defence against the £300m takeover bid from Trafalgar House immediately. Trafalgar is headed by an old adversary, Mr Nigel Brookes. He and Mr Sterling have known each other for years, both emerging into the spotlight from property deals in the early 1970s. Mr Sterling's own company was caught in the mid-seventies property crash of Town and City which he effectively rescued and has only now pulled back to a point where the self-confessed workaholic can take on other things. The P & O job is a major challenge. It is the end of a power battle which leaves the chairman-elect, Mr Ian Denholm, as deputy chairman and Mr Richard Adams as managing director. Mr Sterling will eventually bring in his own men, Mr Bruce McPhail and Mr Oliver Marriott, both co-founders of the original Sterling Guarantee. The City widely expects Mr Sterling, aged 48, to inject parts of his company into P & O, a move which would incur the wrath of Mr Brookes. He has already said that such changes would cause him to call off the takeover bid.

Offer-for-sale may come in September Early BP shares sell-off likely

By Jonathan Davis The recent surge in the value of oil shares has increased the likelihood that the Government will launch its £500m sale of British Petroleum shares at the earliest possible moment. Some brokers and investment institutions now believe the sale will take place as early as next month, although this would mean completing the issue before the recall of Parliament in the last week of October, a move which may provoke protests from Opposition MPs. BP's shares have risen by more than 10 per cent from 390p to 440p in under three weeks, since Mr Nigel Lawson, the Chancellor, announced on July 25 that the share sale was pending. A week earlier the Government abandoned at the last minute plans to place a large chunk of BP shares with City institutions at a price believed to be in the region of 375p. The recent strong advance in oil shares, reinforced again yesterday by Shell's better than expected results, means that the Government is now poised to obtain a better price with its planned offer for sale than it would have done with its placing. The timing and pricing of large share issues are complex and sensitive political decisions, as last year's Britoil and Amersham International privatization offers demonstrated. The decision on BP will be taken by the Chancellor in consultation with his merchant bank advisers, the Government Broker and the Bank of England. So many factors have to be taken into account in determining the timing of a large issue that, in practice, the choice of dates is extremely limited. The Government has to take into account not only the company's financial state, but also the availability of institutional funds. There is a strong bias against holiday periods such as August for launching a large issue, while a date too close to Christmas is normally rejected for fear of delays in postal applications. The most likely time for the BP share sale is between the middle of September and the middle of November, when analysts say most of the conditions will be favourable for oil shares and BP in particular. Investors' notebook, page 14

Wayne Lintott looks at the challenges facing Keith Wickenden's successor

Charting a new course at European Ferries

Ken Siddle: Shy, reflective chain-smoker thrust into the limelight.

Last year European Ferries bought out the minority interests of its American investment, leaving two Canadians, Messrs John Dick and William Pauls, with a potential 20 per cent holding and large salaries. One is over £200,000 a year and rises by 8 per cent per annum.

They were recently made directors. They were not defensive appointments, Mr Siddle says.

And a look through the offer document of that deal shows why. Both men are contractually bound to offer any share sales to European Ferries or to allow it to find a buyer if the company can not afford to acquire them.

They can sell only one million of their 35 million shares a year for the first five years and their rights are tied both to their own performance and that of the group as a whole.

"We have not lost our sense of direction and soon we will be able to show that it is not the case" says Mr Siddle. "There are some internal moves we are putting together. We have the right developments and we intend adding to them, and that includes acquisitions if a company suitably fits our criteria."

The company is obviously still piqued at the Government's veto on a bid for Sealink. "It is illogical not to let us have it. Particularly in view of its inefficiency and large debts (about £70m)." But Mr Siddle refuses to give up trying.

He dismissed the threat of another price war with Sealink in view of its planned privatization.

European Ferries came out of the last war the accepted victor with an increased market share. There is no doubt he feels it would do so again.

He is actively looking at new ships with increased technology that dramatically cut down on manning. Felixstowe Port has proved a success - it is working flat out - but European Ferries is looking at new plans and investments.

Much of the surrounding acreage is owned by Trinity College, Cambridge. So if Felixstowe was its application to become a free port, would it have the space to take advantage?

"Discussions have taken place to make the necessary land available, and it is available. But something like that is as much dependent on luck as judgment," a phrase Mr Siddle uses often.

He remains optimistic about the property side. British trading is now self-financing and the business is looking up in the US thanks to the economic recovery there. But that has not yet manifested in contractual agreements.

The board of directors is now made up from a diverse group. There are two stockbrokers, two Canadian property men, two Norwegian shipping men from an earlier ferry merger, a freight expert, a marine architect and port manager.

"I have no reason to assume they would not back me in a fight," Mr Siddle concludes. "In fact I know they would," he said opening a packet of cigarettes.

European Ferries, the group that owns Townsend Thoresen ferries, the port of Felixstowe and the Singer & Friedlander bank, has successfully weathered the immediate turbulence that came after the death last month of former Tory MP Mr Keith Wickenden, its flamboyant 50-year-old chairman. But what is the future for a company so closely identified under Mr Wickenden as the entrepreneurial leading edge of the trend to privatization?

The group, at present capitalized at £200m, was immediately faced with two main questions. Would a predator use the period of uncertainty to mount a bid? And in which direction would a new boss take this, by now conglomerate, company?

European Ferries says it has not received "the faintest whisper" of a bid approach from any source. The two favourites, Traylor House and Sterling Guarantee Trust, are both preoccupied with Peninsular and Oriental Steam Navigation.

Within three weeks, important policy decisions will be disclosed internally to managers that will show them, at least, the planned future direction of the group.

It would be wrong to mistake the "new bossness" of Mr Ken Siddle, European Ferries' 47-year-old managing director and Mr Wickenden's successor as chairman, for any form of mental weakness. In his first interview on the business since taking over, Mr Siddle continuously paced his Kent office while chain-smoking.

But the pacing and smoking are more of a reflection of this speed of thought and the pressure placed on a shy man suddenly thrust into a high office.

Mr Siddle's unanimous appointment as chairman by the rest of the board - insiders said that he dealt with talk of introducing an outsider with the curt response "over my dead body" - facilitated a swift transference of power that helped maintain City confidence in the company. He has been managing director for 10 years and has been in day-to-day charge for the last five. He became managing director when Mr Roland Wickenden, Keith's brother, died of heart attack in 1972.

He now runs a company with 7,500 employees and 165,000 shareholders. Unusually for a public company, the majority, 156,000 are small shareholders who hold just enough shares, 300, to become eligible for concessions on ferry fares.

This is an attractive perk. Some shipping analysts think it effectively adds 30 per cent to the annual dividend and means that once every four years shareholders can transport their car and family across the Channel free.

The company's business is concentrated into four trading areas: ferries, ports, property and banking. Over the last five years turnover has doubled to almost £300m.

Pretax profits were on course for a similar rise, but slipped sharply in 1981 as a result of a ferry price war with British Rail's Sealink.

Nevertheless, profits were back up to £30.7m last year and analysts expect £35.5m this year and then a sharp rise to £50m next year.

The share price has not performed as well, however. This year shares hit a low of 50p when, even before Mr Wickenden's untimely death, the company would have been more vulnerable to a takeover attack than at its present speculatively supported level of 74p.

Shortly after Mr Wickenden's death, the shares touched 80p, when more than a million shares changed hands. There was one steady buyer whose identity has not yet reached the share register. That alone sustains bid hopes.

Mr Siddle makes clear his aversion to a takeover which would be furiously contested by both the management and, he claims, the workforce.

"At any price?" "Well, I am an employee of the shareholders and the work force and obviously if the price was right it would have to be seriously considered." But what would the right price be?

That question fudged the issue suitably. Mr Siddle thinks that the present share price "grossly" undervalues European Ferries. Its 1982 accounts show assets per share at 80p, but there are a number of assets that the directors have not revealed for years.

Taking the work in progress and theoretical valuations of the property, ports and ships, a ready reckoner figure looks to be 120p a share.

"I would be sorely disappointed at 120p," says Mr Siddle. He would not give the same answer when the figure was raised to 150p.

"Anyway," he added after a momentary pause, "we're worth a hell of a lot more than the Stock Exchange values us."

If a bid were made, then the bidder would have to take account of the cost of those share perks which would be hard to eliminate. Asset sales could be equally hard, given the complex contractual agreements European Ferries has worked out.

Some City murrings have accompanied the group's entry into the American property market in some big moves over the last five years. Critics claim that too much money and time have been spent in the US to the detriment of British operations.

The biggest of these moves two years ago left European Ferries with big holdings in Denver and Atlanta.

The deals have not proved as successful as had been hoped and Mr Siddle admits to being very "unhappy" about the profit performance of the Denver holdings last year. He suggests the group will concentrate on British operations in the future.

APPOINTMENTS

Dual role for Croda director

Croda Polymers International Mr R. A. Staff has become senior polymers director and director responsible for Croda links operations worldwide.

Ultrasmar Mr John Du Cane and Mr Ronald Dinger have been appointed non-executive directors. Mr Du Cane is a non-executive director of Amnax; Mr Dinger is deputy chairman and group managing director of the TI Group.

MY Dart Mr Charles Bruce has been made group financial director, continuing as company secretary, with S. Pearson and Son; Mr J. H. Hale will take up his appointment as managing director on September 1.

Edmond Holdings Mr Kenneth Lindsay, former chairman of Croudsae, has joined the board as non-executive deputy chairman. He will also be a part-time consultant to advise on expanding the group's house building.

Ransburg UK Mr Brian Carter, company secretary, has been appointed general manager.

Mr Mike Hughes, above, head of personnel and staff relations of Anglia Television, has been appointed to the new post of general manager.

Mothercare Group Mrs Rosemary Good becomes marketing director, Mr Bernard Greaves stone operations director, or Mrs Sandra Lewis personnel director.

Electricity Consultative Council (North West) Mr R. D. Wilson has been reappointed chairman.

Espley-Manston Mr Andrew Satterly has been made managing director.

FRIENDS' PROVIDENT LIFE OFFICE

NOTICE IS HEREBY GIVEN that an EXTRAORDINARY GENERAL MEETING of Members is appointed to be held at The Glaziers' Hall, 9 Montague Close, London Bridge, London, SE1 9DD on Wednesday 14th September 1983 at 12 noon when the following Resolution will be proposed as a SPECIAL RESOLUTION:

THAT in accordance with Section 13(2) of FRIENDS' PROVIDENT LIFE OFFICE ACT 1975 the Rules of Friends' Provident Life Office be amended as follows: By the deletion from Rule 34 of sub-paragraphs (3)(a) and (b) which state:

(a) In addition to the other requirements of this rule, a person who is not a Friend shall not be eligible for appointment as a director unless there are at least five directors who are Friends;

(b) In this paragraph, "Friend" means a person who is a member of the Religious Society of Friends commonly called Quakers.

AND By the deletion from Rule 48 of provisions (a) and (b) thereof which state: Provided that:

(a) If all the directors who are Friends (as defined in rule 34) are present at the meeting or have previously in writing to the chairman or the secretary their vote on the question under consideration and their votes are unanimous and the question under consideration is one that in their unanimous opinion raises issues involving Friends' principles then the decision made shall be in accordance with such votes;

(b) If the chairman present at the meeting when a decision is taken by the method described in paragraph (a) of this proviso by majority so resolve a statement of the facts and circumstances concerning the decision shall be read to the next general meeting.

If the foregoing special resolution is passed Rules 34 and 48 will then read as follows:

34. (1) The office of director shall, subject to paragraph (2) hereof, be held only by members.

(2) A person who is not a member may hold the office of director provided that if he does not become a member within two months of his appointment as director, he shall vacate his office.

48. Questions arising at a meeting of the directors shall be decided by a majority of votes the chairman or the secretary in the case of an equality of votes to have a second or casting vote).

A member entitled to attend and vote at the above meeting is entitled to appoint a proxy to attend and vote on his behalf and such proxy need not also be a Member of Friends' Provident Life Office. The instrument appointing a proxy, a specimen of which is set out in rule 30 of the Rules of Friends' Provident Life Office, must be deposited at Friends' Provident Life Office, Pixham End, Dorking, Surrey, RH4 1QA, at least four-eight hours before the time of the meeting. Proxy forms may be obtained on application to the Secretary.

Members intending to attend and vote personally at the meeting should be prepared to quote their policy number.

By Order of the Directors, B. W. SWEETLAND, Secretary.

FRIENDS' PROVIDENT LIFE OFFICE

Pixham End, Dorking, Surrey, RH4 1QA

HOWARD MACHINERY PLC

GROUP RESULTS FOR THE HALF YEAR ENDED APRIL 1983

12 Months October 1982		8 Months April 1983		6 Months April 1982	
£000		£000		£000	
45,832	SALES	21,927		22,000	
253	PROFIT (LOSS) BEFORE TAX	(148)		(519)	

- NOTES:
- During the first half of this year, the group maintained sales and improved operating performance despite no improvement in world agricultural machinery markets. The reduction in losses was achieved as a consequence of the major reorganisation undertaken over recent years and the market acceptance of new products, particularly within Europe where sales have again increased.
 - In the United States, government grants to encourage farmers to reduce land under cultivation during this year continue to adversely affect demand. In both Australia and South Africa, the drought continued to limit sales over the period. The Australian company has been brought back to a more stable position although the market remains poor and unpredictable in the aftermath of the drought.
 - The group's business is seasonal with the second half year producing better results than the first half. The current year should be no exception to this.
 - Extraordinary costs in respect of the reorganisation in Australia, including the potential loss arising from the granting of an option over 42.5% of the Australian company, are estimated at £1.1 million. It is anticipated that the total of extraordinary costs for the year, including the Australian costs, will be significantly less than last year's charge of £2.3 million.

SIX MONTHS - 1983

Ultrasmar

POISED FOR GROWTH

Review of Ultrasmar Group Financial Results and Operations

Summary of financial results	First Six Months 1983 £ million	First Six Months 1982 £ million
Turnover	823.9	645.3
Profit on ordinary activities before taxation	70.1	85.9
Net profit	47.7	44.0
Cash flow from operations	60.2	70.9
Capital expenditures	174.0	86.8

Extracts from the Chairman's Statement:

"Our producing operations in Indonesia, the North Sea and Western Canada did well in the first half of 1983, but the marketing and refining companies in Eastern Canada and the Western United States were disappointing. The U.K. marketing division was profitable in the first half."

"The profit before taxes and the cash flow were lower than those for the first half of last year; however, the net profit was a little higher."

"We have been stressing for the past two years our capital expenditure programme and are glad to be able to report that the upgrading units for the Quebec Refinery are expected to be on stream by the end of August. The Maureen Field, in which we have a 6 per cent interest, is scheduled to come on stream by the end of the third-quarter of this year. Most important are the two additional units (trains) which will double the capacity of the LNG Plant in Indonesia. One of the trains is already operational and the other will be producing LNG in the fourth quarter. One of the two original trains, which was damaged by an accident in April, is being repaired and is now expected to be operational by November."

"The Board has declared an increased interim dividend amounting to 6p per share (1982 5½p) on the Ordinary Shares. The dividend will be paid on 14th October 1983 to shareholders on the Register on 25th August 1983."

ARNOLD LORBEER
Chairman
11th August 1983

The completed Catalytic Cracker at the Quebec Refinery.

Consolidated Profit and Loss Account	First Six Months 1983 £ million	First Six Months 1982 £ million	Year 1982 £ million

Royal Dutch/Shell Group of Companies

Results for First Half 1983

An interim report by Royal Dutch Petroleum Company and The "Shell" Transport and Trading Company, p.l.c. on the results of the Royal Dutch/Shell Group of Companies, in which their interests are 60% and 40% respectively.

Net income of the Royal Dutch/Shell Group of Companies for the second quarter of 1983 was £621 million compared with £380 million in the corresponding period in 1982. Net income for the first half of the year was £1,129 million against £794 million for the first half of 1982. Calculated on the basis of estimated current cost of supplies, second quarter earnings would be £614 million compared with £494 million in the second quarter of 1982. Earnings on this basis for the first half of 1983 would be £1,333 million against £953 million in the same period of 1982 (see explanation below the segment earnings table).

The improvement in second quarter net income, when compared with the same quarter of 1982, arose largely in the oil and gas segment outside North America. The weakness of sterling against most major currencies in comparison with the same period in 1982 had a positive impact on Group sterling results.

Excluding Shell Oil and Shell Canada, end on an estimated current cost of supplies basis, there was a significant increase in the earnings of the exploration and production sector. This increase more than offset the deterioration in the manufacturing, marine and marketing sector, where the continuing intense market competition resulted in an erosion of proceeds exceeding the fall in crude oil and oil products acquisition costs. The chemicals segment reported a small profit compared with a loss a year ago. The metals segment continued to show losses, at a slightly increased level, whilst the coal segment continued to show a small profit. The nuclear sector gave rise to an exceptional loss of £36 million resulting from the write-off of the Barnwell (USA) reprocessing plant. Group net income benefited by £94

million following a re-assessment of certain provisions for taxation made in prior periods.

Shell Oil Company of the United States reported an increase of 3% in dollar earnings. This was amplified by the effect of weaker sterling against the dollar, resulting in the Group share of net income in sterling being 19% higher than a year ago. Shell Canada reported substantially lower dollar results attributable to the oil products segment and higher interest costs.

Capital expenditure and exploration expense at £2,229 million for the first half of the year was 4% below the corresponding period last year. Current assets net of current liabilities (excluding short-term debt, cash and short-term securities) declined in the first half of 1983 by £262 million, due principally to the reduction in inventory volumes and crude oil costs. Over the same period long-term debt increased by £111 million whilst short-term debt decreased by £50 million; cash and short-term securities stood at £5.0 billion after a rise of £945 million over the last six months. The long-term debt ratio remained unchanged at 26%.

Following the March 14 OPEC agreement on production quotas and the new reduced official price structure, spot prices for both crude oil and oil products recovered over the quarter. Along with the improvement in economic indicators in the USA and some other major industrial countries, there are indications that, in aggregate, Free World oil demand trends are no longer falling.

Earnings from operations by industry segment

Oil and gas

Excluding Shell Oil and Shell Canada, earnings in the second quarter 1983 from oil and gas exploration and production activities at £339 million were 45% above the 1982 level. The improvement was due to increased equity crude oil production, lower exploration expense, higher natural gas sales and the strength of the US dollar against sterling. Net equity crude oil production amounted to 839,000 barrels daily compared with 721,000 barrels daily in the second quarter 1982, reflecting increases in production mainly from Nigeria and the UK North Sea. The Group share of net production in the UK North Sea was 254,000 barrels daily, which was lower than the immediately preceding quarter due to scheduled maintenance. Natural gas sales volumes rose by 20% compared with the second quarter of 1982, due principally to the build-up of Brent gas production (UK), deliveries of Malaysian LNG to Japan and increased sales in the Netherlands.

Shell Oil's oil and gas exploration and production dollar earnings increased by 8% over the corresponding period last year, largely due to increased natural gas prices and lower Windfall Profit Tax. In contrast, crude oil prices were lower and natural gas production decreased by 12%, reflecting weak demand. Shell Canada's earnings in this sector were higher than a year ago, due to higher crude oil and natural gas prices and lower exploration and pre-development expenses.

Excluding Shell Oil and Shell Canada, reported earnings from the manufacturing, marine and marketing sector increased from £83 million in the second quarter 1982 to £134 million in the corresponding period in 1983. On the estimated current cost of supplies basis, however, there was a deterioration with earnings of £125 million in the second quarter 1983 compared with £205 million a year ago. Intense competition in major markets and the negative effect of a strong dollar contributed to a compression of current margins, with proceeds falling faster than average crude oil and oil products acquisition costs, between the second quarters of 1982 and 1983. Total oil products sales volumes remained virtually unchanged.

Shell Oil's underlying oil products earnings improved from \$70 million in the second quarter of 1982 (which excludes \$30 million relating to the sale of the Cinize refinery) to \$87 million in 1983, as margins improved. Contributing to this improvement was a decline in supply cost exceeding the fall in selling prices, and the impact of higher utilization of refinery conversion units and the introduction of new West Coast facilities. Products sales volumes were unchanged. Shell Canada's oil products earnings declined substantially, reflecting severe price competition.

Chemicals

Excluding Shell Oil and Shell Canada, and on an estimated current cost of supplies basis, chemicals showed earnings of £7 million in the second quarter 1983 compared with a loss of £8 million last year, reflecting a slight improvement in profitability in the major European countries. Petrochemicals sales volumes were 14% above the level of the corresponding quarter last year and total proceeds increased by a similar percentage. Although some improvement in margins was achieved by operating cost reductions and improved plant loading, prices for many products remained weak.

Shell Oil's chemicals earnings at \$5 million for the second quarter 1983 were essentially the same as last year, with low demand exerting downward pressure on prices and despite lower feedstock costs and higher sales volumes.

Other industry segments

On a Group-wide basis the coal segment reported earnings of £1 million compared with £6 million a year ago. Sales tonnages were higher than in the second quarter 1982, but the impact of very low prices gave rise to trading losses, which were offset by taxation adjustments. The metals segment losses for the second quarter of £23 million, compared with losses of £17 million a year ago, include a write-off attributable to the withdrawal from nickel operations in Australia and reflect the continuing weak market demand, particularly for bauxite/alumina. The improvement in the non-sectored corporate items from a loss of £111 million in 1982 to a loss of £8 million in 1983 largely reflects a re-assessment of certain tax provisions.

Notes

Financial:

1. Accounting policies for the first half 1983 are unchanged from those set out in the Royal Dutch and Shell Transport 1982 Annual Reports (pages 32 and 33).

2. Source and use of funds reflects movements in funds of Group companies as measured in their own currencies, translated into sterling at average rates of exchange for the quarters in question, and therefore excludes currency translation differences.

Under both Source and use of funds and Other financial data, long-term debt includes capitalized lease obligations and also the short-term part of each (i.e. that part repayable within one year). Long-term debt in Source and use of funds represents new borrowings net of repayments and currency exchange differences.

3. In the segment earnings table, associated companies' net interest expense, previously included in individual industry segments, is now included in Corporate Items; 1982 figures have been restated.

4. For illustrative purposes, to establish the division of income between Royal Dutch and Shell Transport, the percentage of net income applicable to them for the year 1982 has been used: Royal Dutch 61.8%, Shell Transport 38.2% (see 1982 Annual Reports, page 37 - Notes 2 and 3 to the financial statements of the Royal Dutch/Shell Group of Companies).

Royal Dutch figures are translated from the underlying sterling at average rates for the quarters in question; Royal Dutch and Shell Transport dollars are translations of the respective underlying guilders or sterling at average rates for the quarters in question.

Operational data:

1. The figures shown in these tables represent the totals reported by Group companies (in which there is a majority interest), reflecting their dealings with third parties and with associated companies (in which the interest is 50% or less); natural gas sales, however, include the Group share of these associated companies. Crude oil supply and crude oil processed figures include natural gas liquids.

2. Certain volume figures have been restated as follows:

- Crude oil supply: Production of crude oil and natural gas liquids from gas fields, previously excluded, is now included.
- Crude oil supply/Oil sales: Certain royalties taken in kind, previously reported as purchases, are now excluded.
- Natural gas sales: Sales in the USA now include sales from royalty purchases.

Estimated current cost of supplies

Most Shell companies use the first-in first-out (FIFO) method of inventory accounting, as a result of which the cost of sales reflects a mixture of costs incurred before the reporting period and costs incurred during the period. In recent years there have been marked movements in crude oil prices which have made comparisons between periods difficult to convey. A better indication of the underlying business performance is achieved if the cost of sales of the volumes sold in the period is based solely on the average cost of supplies incurred in the same period, and allowance is made for the estimated tax effects. On this estimated current cost of supplies basis, estimated earnings would be as shown below.

	Second Quarter		First Half

Deputy chief of Energy Finance quits

Mr Hugh Nicholson has resigned as deputy chairman of Energy Finance and General Trust just two weeks after Mr Denis Barkway announced he was stepping down as chairman.

Why Portugal cannot pay or sack its workers

An increasing number of Portuguese companies is defaulting on wage payments. And the situation, as the companies' financial problems generally, is likely to get worse before it gets better.

From Maritza de la Cal, Lisbon

Companies are not only unable to pay wages. Many have too many workers and, under the labour laws, cannot sack them.

Trade Development Bank Holding S.A. Luxembourg

NOTICE IS HEREBY GIVEN that a General Meeting of Shareholders of Trade Development Bank Holding S.A. (TDB Holding) will be held at the registered office of the Company, 34, Avenue de la Porte-Neuve, Luxembourg at 2.30 p.m. on 25th August, 1983 for the purpose of considering and voting on the following matters:

- 1. Approval of the Chairman's Statement.
2. Approval of the Statutory Auditors' report and the unconsolidated financial statements of TDB Holding for the fiscal period ended March 31, 1983.
3. Approval of the unaudited consolidated financial statements of TDB Holding for the fiscal period ended March 31, 1983.
4. Discharge of the Directors and the Statutory Auditors concerning their duties relative to the fiscal period ended March 31, 1983.
5. Appropriation of profits and approval of - a distribution in cash of US\$ 800 for each 100 shares - a distribution of 18 shares par value US\$ 0.60 of the Common Stock of American Express Company for each 100 shares - a distribution of 10 warrants exercisable in shares of par value US\$ 0.60 of the Common Stock of American Express Company for each 100 shares.

By Order of the Board, Edmond J. Saffa Chairman

Any shareholder whose shares are in bearer form and who wishes to attend the General Meeting in person must produce a depositary receipt or present his share certificates to gain admission. If he wishes to be represented at the meeting, he must lodge a proxy duly completed together with a depositary receipt at the registered office of TDB Holding at 34, Avenue de la Porte-Neuve, Luxembourg, not later than August 24, 1983 at 5:00 p.m.

The remuneration of the form of proxy will not preclude a shareholder from attending in person and voting at the meeting if he so desires.

Copies of this notice and of the Interim Report including the financial statements of TDB Holding for the fiscal period ended March 31, 1983 may be obtained at its registered office, and from any of the banks at the following addresses:

- *Manufacturers Hanover Limited, 8 Princes Street, London EC2P 2EN.
*Banque Internationale a Luxembourg S.A., 2, Boulevard Royal, Luxembourg.
*Manufacturers Hanover Bank Belgium, 13, Rue de Ligne, 1000 Brussels.
*Manufacturers Hanover Banque Nordique, 20, Rue de la Ville-Léopold, 75008 Paris.
*Manufacturers Hanover Trust Company, Rockingham Lane, 51/53, Frankfurt.
*Trade Development Bank, 21, Corso S. Gottardo, 6810 Chiasso, I.
*Trade Development Bank, 30 Monument Street, London EC3R 8LH.
*Trade Development Bank (France) S.A., 20, Place Vendôme, 75001 Paris.
*Trade Development Bank (Luxembourg) S.A., 34, Avenue de la Porte-Neuve, Luxembourg.
*Trade Development Bank, 2, Place du Lac, 1204 Geneva.
*Paying Agent of TDB Holding.

Table with multiple columns listing stock market data including company names, prices, and changes. Includes sections for 'Authorized Units & Insurance Funds' and 'Authorized Units & Insurance Funds'.

Systems margins help lift Plessey

A strong performance from Plessey's electronics systems division pushed first quarter profits ahead sharply, but flat results from the telecommunications side meant the figures were at the bottom of the City's estimates.

NOTES: Subject to the relevant resolutions being approved, the distribution will take place starting on August 29, 1983. (i) in respect of registered shares to shareholders on the register as at August 15, 1983 and (ii) in respect of bearer shares against collective and simultaneous surrender of coupons nos. 12, 13 and 14 to any of the Paying Agents listed below.

The figures include a contribution to turnover of £24.8m from Stromberg-Carlson in the US, acquired last October. But Stromberg made a £1.6m loss in the first quarter.

Large table containing financial data, likely a continuation of the Wall Street section, with columns for various financial metrics and company names.

RACING: STARS COME OUT AT NEWBURY

Horage at peak should hold Royal Heroine

By Michael Phillips, Racing Correspondent

Racing comes alive again in this country at Newbury today after the quiet fortnight since Goodwood. With Horage, Royal Heroine, On Stage, Salleri, Tecorno and Dramatis all standing their ground the Hungerford Stakes is as interesting as any race you will find at York this week. Half an hour later the Washington Singer Stakes will also demand the closest of attention. It will come to us to tie up some of the loose ends that still exist in the form of the best two-year-olds seen this season.

In going for Horage to win the Hungerford Stakes I am swayed by his trainer Jim McCormack's assertion that the colt who won nine races as a two-year-old and the St James's Palace Stakes at Royal Ascot this season, has never been better. McCormack took him to Bath racecourse for a gallop on Tuesday and was delighted with the way he performed.

Horage won at Ascot in spite of the fact that McCormack was adamant beforehand that he was not at his peak because he had had to cram a month's work into a fortnight after Horage's training schedule had been disrupted in the spring by a bruised heel. In the circumstances his defeat of Tolmaso at Ascot was all the more praiseworthy.

If last year's Free Handicap gave a correct assessment of Horage then my selection has only to be at his best off this field, especially as the distance of today's race is likely to suit him better than Salleri, his

conqueror in the Mill Reef Stakes last September. Salleri is being called upon to deputise for Disias, who is thought to need still more time to be at his best again. On paper there is little between On Stage and Salleri, especially if one goes on how they ran behind Habibi and Sobri in the July Cup. All that suggests that Royal Heroine could easily turn out to be the main danger to Horage at these weights. After all, her form has always been linked closely to that of Habibi, but whereas Habibi has turned out to be a sprinter, Royal Heroine has shown that she gets a mile well.

What the Washington Singer Stakes lacks in quantity it more than makes up for in quality. Head of Heights won the Chesham Stakes at Royal Ascot, Trojan Fen the Lansdown Champagne Stakes at Goodwood, Tuesday and Finian's Rainbow, the other members of today's select field were two of those who left standing by Vaccarne's explosive burst of speed at Ascot in June.

Hoyer has won at Haydock and Salisbury since then, but today he will be meeting Finian's Rainbow, who has not seen a race in the meantime, on 7lb which divides them for lengths that divided them at Ascot. Trojan Fen certainly had to be shaken up by Lester Figgitt at Goodwood before he finally got the better of Elegant Air, who is a stable companion of Finian's Rainbow. That was probably no disadvantage. In any case the form was his good because Captain Single-

Ascot on horizon as Raft sails on

By Michael Phillips

Raft's victory in the Simeons Kinner Stakes was by far the most impressive performance seen at Salisbury yesterday. No sooner had I remarked to my neighbour on the stands that Joe Mercer was going like a scalded cat on the leader Falsidar, who had won his last two races, than he said: "You've just past him and clear on Raft with an unassailable lead."

The acceleration he showed to do that in the last quarter of a mile had class written all over it. It was therefore not remotely surprising to hear Gray Harwood say that he among his best two-year-olds at Fairbairn this year. Raft lowered the course record for a two-year-old at Salisbury - which had stood since 1971 - by one-hundredth of a second. He provided that everything goes according to plan in the next six weeks, visitors to Ascot on September 24 will get the next opportunity to assess Raft in either the Royal Lodge Stakes or Harwood won in 1978 with Elam-Mon and again two years ago with Norwick.

Meanwhile Lear Fan and Bluff Roeser, Harwood's other two-year-olds to have caught the eye of late, will have had their opportunities to make a further impact - Lear Fan in either the Solario Stakes at Sandown or the Phoenix Stakes at Doncaster; Bluff Roeser in the Ascot Stakes at York where he will encounter among other Young Turk, the colt who shaped with so much promise when he won on his debut at Goodwood.

Young Turk is owned in partnership by Sir Michael Sobell and Lord Westminster. Yesterday he took me that their excellent filly, Sun Princess, was none the worse for her valiant attempt to win the King George VI and Queen Elizabeth Diamond Stakes at Ascot last week and that she was due to run in the Yorkshire Oaks on the same afternoon as Young Turk.

Langer strikes while the iron is hot to fire a unique 64

From Lewine Mair, Dublin

Yesterday's 63 was the best score he has ever made on a course of 64. He has never had any great love for Portlarnock, the usual Carrolls venue, but here at Royal Dublin, he has felt positively inspired by the flat lies on the fairways and the lovely putting surfaces.

Despite the Severiano Ballesteros was complaining there was not much petrol in the car, a reference to the fact that his early morning starting time had kept him from a proper breakfast. After which it was fascinating to hear Brian Barnes talk of how he is at present running on a supply of 30 pink pills. It was over 60 months ago that Barnes' doctor ordered the early signs of depression. Barnes, for his part, thought that he was merely bored with golf, until the day he found that he couldn't even get bothered going fishing.

The first time the tablets showed signs of taking effect, Barnes on the first hole of the third round of last week's Dutch Open. He took a six, and where for so long he had been accepting sizes and worse without demer, this time he hurried his putter to the green in anger.

On Tuesday the Netherlands, where he played all four rounds, he told his wife Hilary, that he thought he was striking the ball well enough to think in terms of

Rare distinction for Condor

By John Nicholls

The Bermudian entry, Condor, owned by Bob Bell, was confirmed yesterday as the overall winner of the 1983 Fastnet race. She had to wait for nearly 39 hours, after finishing on Tuesday morning, before it became impossible for any of the smaller boats to beat her on handicap. Soon after midnight on Wednesday, she was safe, even though beating the fastest small boat, from Class V, by five hours.

Condor thus achieved the rare distinction of being first boat to finish, first on corrected time, and holder of a new record for the race. She was undoubtedly helped by the unusual weather conditions over the course. It may be many more years before such suitable conditions for record-breaking occur again. Her first 350 miles, from Cowes to the Fastnet rock, were completed without tacking. She was miles ahead by Land's End and cleared the land before the wind died and she quit out. Perhaps as decisive a shot as any came with the score 12-8. Mrs Price held two on a long jack, but Mrs Valls found a perfect tail shot with her last wood to turn two down to one up.

At the start and Mrs Valls scored three more. Mrs Price was forced to fire with her last bow - a rare sight in the woman's game. The scores then ran 19-8, 19-1, 20-11, 20-13, 20-14, a recovery for Mrs Price. The four's championship was won by a team from County Arts, Norwich - Pamela Gill, Valerie Chapman, Sybil Symonds and, as skipper, Margaret Doggett. They beat the team from County Stockton, 21-16. The Stockton skip was Norma Shaw, the world singles champion, supported by Elizabeth Johnson, Joyce Jones and Marie Clark.

There was a brilliant last end. First Mrs Valls drew the shot, then Mrs Price. Looseness often appears in such a situation, with both players knowing how much depends on their ability to place a bowl on a napkin, if not a stepstone, and nerves making their presence felt - but not now. Mrs Valls' last bowl was a little more than a yard from the target, but Mrs Price's was a shade wider with her fourth. The applause rippled round the green after a fine match between two friends in their first year. The four's championship was won by a team from County Arts, Norwich - Pamela Gill, Valerie Chapman, Sybil Symonds and, as skipper, Margaret Doggett. They beat the team from County Stockton, 21-16. The Stockton skip was Norma Shaw, the world singles champion, supported by Elizabeth Johnson, Joyce Jones and Marie Clark.
